MATERIALS AND HARDWARE

Revision Log	iii
Measurement Standards	iv
Basic Knowledge Requirements	v
Part 66 Basic Knowledge Requirements	vi
Table of Contents	ix

6.1 AIRCRAFT MATERIALS — FERROUS..... 1.1

Properties of Metals	1.1
Hardness	1.1
Strength	1.1
Density	1.1
Malleability	1.1
Ductility	1.1
Elasticity	1.1
Toughness	1.2
Brittleness	1.2
Fusibility	1.2
Conductivity	1.2
Thermal Expansion	1.2
Iron	1.2
Steel and Steel Alloys	1.2
Spark Testing	1.2
Types of Alloyed Steel Carbon Steel	1.3
Nickel Steel	1.4
Chromium Steel	1.4
Stainless Steel	1.4
Chrome-Vanadium Steel	1.4
Chromoly Steel	1.4
Inconel	1.4
Substitution of Aircraft Metals	1.4
Metal Working Processes	1.4
Hot Working	1.4
Heat Treating	1.6
Internal Structure of Metals	1.6
Heat Treating Equipment	1.6
Furnaces and Salt Baths	1.7
Temperature Measurement and Control	1.7
Heating	1.7
Soaking	1.8
Cooling	1.8
Quenching Equipment	1.10
Heat Treatment and Application of Alloy Steels	1.10
Behavior of Steel During Heating and Cooling	1.10
Hardening	1.10
Hardening Precautions	1.11
Tempering	1.11
Annealing	1.11
Normalizing	1.11
Case Hardening	1.12
Carburizing	1.12
Nitriding	1.12
Forging	1.12
Casting	1.12
Extruding	1.13
Cold Working/Hardening	1.13

Section B	1.13
Hardness Testing	1.13
Brinell Tester	1.13
Rockwell Tester	1.14
Other Testing	1.15
Fatigue Strength Testing	1.15
Impact Testing	1.16
Electrochemical Testing of Stainless Versus Inconel	1.16
Section C	1.17
Defects	1.17
Inspection Procedures	1.17
Visual Inspection	1.17
Surface Cracks	1.17
Borescopes	1.17
Non-Destructive Inspection (NDI)	1.17
Corrosion Control	1.18
General Repair Methods	1.18
Submodule 1 Practice Questions	1.19
Submodule 1 Practice Answers	1.20

6.2 AIRCRAFT MATERIALS — NON-FERROUS..... 2.1

Section A	2.1
Characteristics, Properties and Identification of	
NonFerrous Materials	2.1
Aluminum	2.1
Wrought Aluminum	2.2
Effect of Alloying Element	2.3
Hardness Identification	2.3
Magnesium	2.3
Titanium	2.4
Titanium Designations	2.5
Corrosion Characteristics of Titanium	2.5
Copper	2.5
Nickel	2.6
Monel	2.6
K-Monel	2.6
Inconel	2.6
Substitution of Aircraft Metals	2.6
Heat Treatment of Non-Ferrous Alloys	2.7
Aluminum Alloys	2.7
Alclad Aluminum	2.7
Solution Heat Treatment	2.7
Temperature	2.7
Time at Temperature	2.7
Quenching	2.8
Cold Water Quenching	2.8
Hot Water Quenching	2.8
Spray Quenching	2.8
Lag Between Soaking and Quenching	2.8
Reheat Treatment	2.8
Straightening After Solution Heat Treatment	2.8
Precipitation Heat Treating	2.8
Precipitation Practices	2.9
Annealing of Aluminum Alloys	2.9
Heat Treatment of Aluminum Rivets	2.9
Magnesium Alloys	2.10

TABLE OF CONTENTS

Solution Heat Treatment	2.10
Precipitation Heat Treatment	2.10
Titanium	2.10
Stress Relieving	2.10
Annealing of Titanium	2.10
Thermal Hardening	2.11
Case Hardening	2.11
Casting	2.11
Extruding	2.11
Cold Working/Hardening	2.11
Section B	2.12
Hardness Testing	2.12
Brinell Tester	2.12
Rockwell Tester	2.12
Barcol Tester	2.13
Tensile, Fatigue and Impact Testing	2.13
Section C	2.13
Defects	2.13
Inspection Procedures	2.13
Visual Inspection	2.13
Surface Cracks	2.14
Borescopes	2.14
Non-Destructive Inspection (NDI)	2.14
Corrosion Control	2.14
General Repair Methods	2.14
Submodule 2 Practice Questions	2.15
Submodule 2 Practice Answers	2.16

6.3 AIRCRAFT MATERIALS — COMPOSITE AND

NON-METALLIC	3.1
6.3.1 SECTION A	3.1
Characteristics, Properties and Identification	3.1
Composite Materials	3.1
Advantages/Disadvantages of Composites	3.1
Composite Safety	3.2
Fiber Reinforced Materials	3.2
Laminated Structures	3.2
Advanced Laminated Composite Materials	3.2
Major Components of a Laminate	3.3
Strength Characteristics	3.3
Fiber	3.3
Fiber Orientation	3.3
Warp Clock	3.3
Fiber Forms	3.4
Roving	3.4
Unidirectional (Tape)	3.4
Bidirectional Fabric	3.4
Non-woven (Knitted or Stitched)	3.5
Types of Fiber	3.5
Fiberglass	3.5
Kevlar®	3.6
Carbon/Graphite	3.6
Boron	3.6
Ceramic Fibers	3.6
Lightning Protection Fibers	3.6
Dry Fiber Material	3.7

Thermosetting Resins	3.7
Polyester Resins	3.7
Vinyl Ester Resin	3.7
Phenolic Resin	3.7
Epoxy	3.7
Polyimides	3.7
Polybenzimidazoles	3.8
Bismaleimides	3.8
Thermoplastic Resins	3.8
Semicrystalline Thermoplastics	3.8
Amorphous Thermoplastics	3.8
Polyether Ether Ketone	3.8
Curing Stages of Resins	3.8
Thixotropic Agents	3.8
Pre-Impregnated Products (Prepregs)	3.8
Adhesives	3.9
Film Adhesives	3.9
Paste Adhesives	3.9
Foaming Adhesives	3.10
Sandwich Structures	3.10
Properties	3.10
Facing Materials	3.10
Core Materials	3.11
Honeycomb	3.11
Foam	3.11
Balsa Wood	3.12
Plastics	3.12
Reinforced Plastic	3.12
Transparent Plastics	3.12
Optical Considerations	3.13
Storage and Handling	3.13
Forming Procedures and Techniques	3.13
Heating Wear	3.13
Forms	3.13
Forming Methods	3.14
Simple Curve Forming	3.14
Compound Curve Forming	3.14
Stretch Forming	3.14
Male and Female Die Forming	3.14
Vacuum Forming Without Forms	3.14
Vacuum Forming With a Female Form	3.14
Sawing	3.14
Drilling	3.14
Cementing	3.14
Application of Cement	3.14
Repairs	3.15
Cleaning	3.15
Polishing	3.15
Windshield Installation	3.15
Installation Procedures	3.16
Sealant and Bonding Agents	3.16
One Part Sealants	3.16
Two Part Sealants	3.16
6.3.1 Section b	3.17
Detection of Defects/Deterioration in Composite Materials	3.17
Fiber Breakage	3.17

TABLE OF CONTENTS

Matrix Imperfections	3.17	No Bleedout	3.30
Delamination and Debonds	3.18	Ply Orientation Warp Clock	3.31
Combinations of Damages	3.18	Mixing Resins	3.31
Flawed Fastener Holes	3.18	Saturation Techniques	3.31
In-Service Defects	3.18	Impregnation With a Brush or Squeegee	3.31
Corrosion	3.19	Vacuum Bagging Techniques	3.31
Non-Destructive Inspection of Composites	3.19	Single Side Vacuum Bagging	3.32
Visual Inspection	3.19	Envelope Bagging	3.32
Audible Sonic Testing (Coin Tapping)	3.19	Impregnation Using a Vacuum Bag	3.32
Automated Tap Test	3.20	Alternate Pressure Application	3.33
Ultrasonic Inspection	3.20	Shrink Tape	3.33
Through Transmission Ultrasonic Inspection	3.21	C Clamps	3.33
Pulse Echo Ultrasonic Inspection	3.21	Shotbags and Weights	3.33
Ultrasonic Bond Tester Inspection	3.21	Curing of Composite Materials	3.33
Phased Array Inspection	3.21	Room Temperature Curing	3.33
Radiography	3.21	Elevated Temperature Curing	3.33
Thermography	3.22	Composite Honeycomb Sandwich Repairs	3.34
Neutron Radiography	3.22	Damage Classification	3.35
Moisture Detector	3.22	Minor Core Damage (Filler and Potting Repairs)	3.35
6.3.1 Section C	3.22	Damage Requiring Core Replacement and Repair to One or Both Face Plates	3.35
Repair Procedures for Composite Materials and Structures	3.22	Step 1: Inspect the Damage	3.35
Layup Materials and Tools	3.22	Step 2: Remove Water From Damaged Area	3.35
Air Tools	3.22	Step 3: Remove the Damage	3.35
Caul Plate	3.22	Step 4: Prepare the Damaged Area	3.35
Support Tooling and Molds	3.23	Step 5: Installation of Honeycomb Core (Wet Layup)	3.36
Vacuum Bag Materials	3.23	Step 6: Prepare and Install the Repair Plies	3.37
Release Agents	3.23	Step 7: Vacuum Bag the Repair	3.37
Bleeder Ply	3.24	Step 8: Curing the Repair	3.37
Peel Ply	3.24	Step 9: Post Repair Inspection	3.37
Layup Tapes	3.24	Bonded Flush Patch Repairs	3.37
Solid Release Film	3.24	Step 1: Inspection and Mapping of Damage	3.39
Breather Material	3.24	Step 2: Removal of Damaged Material	3.39
Vacuum Bag	3.24	Step 3: Surface Preparation	3.39
Vacuum Equipment	3.24	Step 4: Molding	3.39
Vacuum Compaction Table	3.25	Step 5: Laminating	3.39
Heat Sources	3.25	Step 6: Finishing	3.39
Ovens	3.25	Trailing Edge and Transition Area Patch Repairs	3.39
Autoclave	3.25	Composite Patch Bonded to Aluminum Structure	3.40
On Aircraft Heating	3.25	Fiberglass Molded Mat Repairs	3.40
Heat Bonder	3.26	Radome Repairs	3.40
Heat Blanket	3.26	External Bonded Patch Repairs	3.41
Hot Air System	3.26	External Bonded Repair With Prepreg Plies	3.41
Heat Press Forming	3.26	Step 1: Investigating and Mapping the Damage	3.41
Thermocouples	3.27	Step 2: Damage Removal	3.41
Thermocouple Placement	3.27	Step 3: Layup of the Repair Plies	3.41
Thermal Survey of Repair Area	3.27	Step 4: Vacuum Bagging	3.41
Temperature Variations in Repair Zone	3.27	Step 5: Curing the Repair	3.41
Thermal Survey	3.28	Step 6: Applying Top Coat	3.41
Solutions to Heat Sink Problems	3.28	External Repair Using Wet Layup and Double Vacuum Debulk Method (DVD)	3.41
Types of Layups	3.28	Double Vacuum Debulk Principle	3.41
Wet Layups	3.28	Patch Installation on the Aircraft	3.42
Prepregs	3.28	External Repair Using Precured Laminate Patches	3.42
Secondary Bonding	3.29	Step 3: A Precured Patch	3.43
Co-Bonding	3.30	Step 4: For a Precured Patch	3.43
Wet Laminated Layup Techniques	3.30		
Bleedout Technique	3.30		

TABLE OF CONTENTS

Bonded Versus Bolted Repairs.	3.43	Glued Joint Inspection.	3.55
Bolted Repairs	3.43	Wood Condition	3.56
Bolted Repair Procedures	3.44	Repair of Wooden Structures	3.57
Step 1: Inspection of the Damage	3.44	Gluing Procedures	3.57
Step 2: Removal of the Damage	3.44	Preparation of Wood for Gluing	3.57
Step 3: Patch Preparation.	3.44	Preparing Glues for Use.	3.58
Step 4: Hole Pattern Lay Out	3.44	Applying the Glue/Adhesive	3.58
Step 5: Drilling and Reaming Holes in Patch and Parent Structure	3.44	Pressure on the Joint	3.58
Step 6: Fastener Installation	3.44	Testing Glued Joints	3.58
Step 7: Sealing of Fasteners and Patch	3.44	Structural Repairs	3.59
Step 8: Finish Coat and Lightening Protection Mesh	3.44	Wing Rib Repairs	3.59
Fasteners Used With Composite Laminates	3.44	Bolt and Bushing Holes.	3.60
Corrosion Precautions	3.45	Finishing Wood Structures	3.60
Fastener Materials	3.45	Precautions.	3.61
Fastener Systems	3.45	Finishing Exterior Surfaces.	3.62
Adjustable Sustain Preload Fastening System (ASP)	3.45	Finishing of End Grain Surfaces.	3.62
Hi-Lok® and Huck-Spin® Lockbolt Fasteners.	3.45	Sealing of Bolt Holes	3.62
Eddie Bolt Fasteners	3.46	Section 6.3.3	3.62
Cherry's E-Z Buck (CSR90433) Hollow Rivet.	3.46	Fabric Covering	3.62
Blind Fasteners.	3.46	General History.	3.62
Blind Bolts	3.47	Characteristics, Properties and Types of Fabrics.	3.63
Fiberlite	3.47	Fabric Terms	3.63
Screws and Nutplates in Composite Structures	3.47	Approved Materials	3.63
Machining Processes and Equipment.	3.47	Fabric	3.63
Drilling	3.47	Anti-Chafe Tape	3.63
Equipment	3.48	Reinforcing Tape	3.63
Processes and Precautions	3.49	Rib Bracing	3.63
Countersinking	3.49	Surface Tape.	3.64
Cutting Processes.	3.50	Rib Lacing Cord	3.64
Cutting Equipment	3.50	Sewing Thread	3.64
Repair Safety	3.50	Special Fabric Fasteners.	3.64
Eye Protection	3.51	Inspection Rings	3.64
Respiratory Protection.	3.51	Primer	3.65
Downdraft Tables	3.51	Fabric Cement	3.65
Skin Protection	3.51	Fabric Sealer.	3.65
Fire Protection	3.51	Fillers	3.65
Section 6.3.2	3.51	Topcoats	3.65
Construction Methods of Wooden Airframe Structures	3.51	Types of Defects in Fabrics	3.66
Wood Aircraft Construction and Repairs.	3.52	Excess Tension.	3.66
Characteristics, Properties and Types of Wood and Glue		Loose Fabric.	3.66
Used in Aeroplanes	3.52	Coating Cracks	3.66
Wood	3.52	Deterioration	3.66
Glues (Adhesives)	3.52	Inspection Methods for Fabric	3.67
Casein Glue	3.52	Determining Fabric Condition; Repair or Recover?	3.67
Plastic Resin Glue	3.52	Fabric Strength	3.67
Resorcinol	3.52	How Fabric Breaking Strength is Determined	3.67
Epoxy.	3.53	Fabric Testing Devices.	3.67
Preservation and Maintenance of Wooden Structures	3.53	Repair of Fabric Covering	3.68
Wood Preservation	3.53	Blanket Method Versus Envelope Method	3.68
Care and Maintenance of Wood Frame Structures	3.53	Preparation for Fabric Covering Work	3.68
Types of Defects in Wood Materials and Structures	3.54	Removal of Old Fabric Coverings.	3.68
Defects Permitted	3.54	Preparation of the Airframe Before Covering.	3.69
Defects Not Permitted.	3.54	Attaching Polyester Fabric to the Airframe	3.70
Detection of Defects in Wooden Structures	3.54	Fabric Cement	3.70
External and Internal Inspection.	3.54	Fabric Heat Shrinking.	3.71
		Attaching Fabric to the Wing Ribs.	3.71

TABLE OF CONTENTS

Rib Lacing	3.71	Screw Principles	5.2
Rings, Grommets, and Gussets	3.73	The Inclined Plane	5.2
Finishing Tapes	3.74	Screw Nomenclature	5.2
Coating the Fabric	3.74	Bolt and Screw Terminology	5.2
Polyester Fabric Repairs	3.75	Screw Thread Terminology	5.2
Applicable Instructions	3.75	Thread Forms, Dimensions and Tolerances	5.3
Repair Considerations	3.75	Coarse and Fine Pitch Threads	5.3
Submodule 3 Practice Questions	3.83	Single and Multi Start Threads	5.3
6.4 - CORROSION	4.1	Screw Thread Profile	5.3
Section A	4.1	International Thread System	5.3
Common Corrosive Agents	4.1	Unified Screw Thread	5.3
Corrosion Formation	4.2	Metric Screw Thread	5.3
Galvanic Action	4.2	Choosing Threaded Fasteners	5.3
Microbiological Corrosion	4.2	Thread Tolerances	5.4
Stress Corrosion	4.3	Measuring Screw Threads	5.4
Section B	4.3	Screw Thread Pitch	5.4
General Surface Corrosion	4.3	Go-NoGo Gauges	5.4
Pitting Corrosion	4.3	6.5.2 - Bolts, Studs And Screws	5.4
Concentration Cell Corrosion	4.4	Bolt Types: Specifications, Identification, and Marking of Aircraft	
Metal Ion Concentration Cells	4.4	Bolts, International Standards	5.4
Oxygen Concentration Cells	4.4	Aircraft Bolt Types	5.4
Active Passive Cells	4.4	Identification and Coding	5.4
Filiform Corrosion	4.5	General Purpose Bolts	5.4
Intergranular Corrosion	4.6	Close Tolerance Bolts	5.5
Exfoliation Corrosion	4.6	Internal Wrenching Bolts	5.5
Galvanic Corrosion	4.6	Special-Purpose Bolts	5.5
Stress Corrosion Cracking	4.6	Clevis Bolts	5.6
Fatigue Corrosion	4.7	Eyebolt	5.6
Fretting Corrosion	4.8	Jo-Bolt	5.6
Causes of Corrosion	4.8	Lockbolts	5.6
Material Types	4.9	Nuts: Self-locking, Anchor, Standard Types	5.8
Aluminum and Aluminum Alloys	4.9	Aircraft Nuts	5.8
Magnesium and Magnesium Alloys	4.9	Identification and Coding	5.8
Ferrous Metals	4.10	Non-Self-Locking Nuts	5.8
Noble Metals	4.10	Self-Locking Nuts	5.9
Chromium and Nickel Plated Parts	4.10	Boots Self-Locking Nut	5.9
Cadmium and Zinc Plated Parts	4.10	Stainless Steel Self-Locking Nuts	5.10
Titanium and Titanium Alloys	4.10	Elastic Stop Nuts	5.10
Susceptibility to Corrosion (Corrosion Prone Areas)	4.10	Pal Nuts	5.11
Exhaust Trail Areas	4.11	Sheet Spring Nuts	5.11
Battery Compartments and Battery Vent Openings	4.11	Internal and External Wrenching Nuts	5.11
Lavatories, Buffets and Galleys	4.11	Anchor Nuts	5.11
Bilge Areas	4.11	Nutplates	5.12
Wheel Wells and Landing Gear	4.11	Sealing Nutplates	5.12
External Skin Areas	4.12	Riveted and Rivetless Nutplates	5.12
Water Entrapment Areas	4.13	Rivnuts	5.13
Engine Frontal Areas and Cooling Air Vents	4.14	Machine Screws; Aircraft Specification	5.14
Electronic Package Compartments	4.14	Screws	5.14
Miscellaneous Trouble Areas	4.15	Identification/Coding for Screws	5.14
Seaplanes and Flooding	4.16	Structural Screws	5.14
Submodule 4 Practice Questions	4.17	Machine Screws	5.14
Submodule 4 Practice Answers	4.18	Studs; Types and Uses	5.14
6.5 FASTENERS	5.1	Standard Studs	5.15
6.5.1 Screw Threads	5.2	Waisted Studs	5.15
		Stepped Studs	5.15
		Shouldered Studs	5.15

TABLE OF CONTENTS

Self-Tapping Screws, Dowels	5.15	Hi-Lite Fastening System	5.33
Self-Tapping Screws.	5.15	Lockbolt Fastening Systems	5.33
Drive Screws	5.16	Installation Procedure	5.34
Dowels	5.16	Lockbolt Inspection	5.35
Thread Repair Hardware	5.16	Lockbolt Removal	5.35
Replacement Bushings	5.16	Blind Bolts	5.35
Helicoils	5.16	Pull Type Blind Bolt	5.35
6.5.3 - Locking Devices	5.17	Cherry Maxibolt Blind Bolt System	5.35
Aircraft Washers	5.17	Huck Blind Bolt System	5.35
Plain Washers	5.17	Drive Nut Type of Blind Bolt	5.36
Lockwashers	5.17	Installation procedure	5.36
Shakeproof Lockwashers	5.18	Tapered Shank Bolt	5.36
Special Washers	5.18	Sleeve Bolts	5.37
LockPlates	5.18	Rivet Nuts	5.37
Pins	5.18	Rivnut Hole Preparation	5.37
Cotter Pins	5.18	Deutsch Rivets	5.37
Cotter Pin Hole Line Up	5.18	Hole Repair Hardware	5.38
Cotter Pin Safetying	5.18	Acres Fastener Sleeves	5.38
Roll Pins	5.19	Identification	5.38
Quick Release (Captive) Fasteners	5.19	Hole Preparation	5.38
Turnlock Fasteners	5.19	Installation	5.38
Dzus Fasteners	5.19	Sleeve Removal	5.38
Camloc Fasteners	5.19	Submodule 5 Practice Questions	5.41
Airloc Fasteners	5.20	Submodule 5 Practice Answers	5.42
Keys	5.20		
Safety Wire Locking	5.21	6.6 PIPES AND UNIONS	6.1
General Safety Wiring Rules	5.21	Section A	6.1
Nuts, Bolts, and Screws	5.21	Rigid Fluid Lines	6.1
Oil Caps, Drain Cocks, and Valves	5.22	Tubing Material	6.1
Electrical Connectors	5.22	Copper Tubing	6.1
Turnbuckles	5.22	Aluminum Alloy Tubing	6.1
6.5.4 Aircraft Rivets	5.23	Steel Tubing	6.1
Standards and Specifications	5.23	Titanium Tubing 3AL-2.5V	6.1
Solid Shank Rivets	5.24	Material Identification	6.1
Solid Rivet Identification	5.24	Tubing Sizes	6.2
Rivet Corrosion	5.25	Flexible Hose Fluid Lines	6.2
Heat Treating Rivets	5.25	Rubber Hose Materials and Construction	6.2
Blind Rivets	5.27	Buna-N	6.2
Friction Locked Blind Rivets	5.27	Neoprene	6.2
Mechanical Lock Blind Rivets	5.28	Butyl	6.2
CherryMAX® Blind Rivets	5.28	Low, Medium, and High Pressure Hoses	6.2
Removal of Mechanically Locked Blind Rivets	5.28	Teflon™ Hose	6.2
Blind Rivet Specifications	5.29	Hose Identification	6.2
Rivet Material	5.29	Size Designations	6.3
Diameters	5.29	Fluid Line Identification	6.3
Blind Rivet Identification	5.30	Section B	6.3
Nonstructural Blind Fasteners	5.32	Fluid Line End Fittings	6.3
Pop rivets	5.32	Universal Bulkhead Fittings	6.4
Pull Through Nutplate Blind Rivets	5.32	AN Flared Fittings	6.4
Special Purpose Rivets and Fasteners	5.32	Flareless Fittings	6.5
Pin Fastening Systems (High Shear Fasteners)	5.32	Swaged Fittings	6.7
Installation of High Shear Fasteners	5.32	Cryofit™ Fittings	6.8
Inspection of Pin Rivets	5.32	Flexible Hose Fittings	6.9
Removal of Pin Rivets	5.32	Submodule 6 Practice Questions	6.11
Hi-Lok Fastening System	5.33	Submodule 6 Practice Answers	6.12
Hi-Tigue Fastening System	5.33
