Foreword Dr. K. A. G. Miller	xiii
Preface 'Communication' G. J. de Horn	xiv
Acknowledgements	xvii
Standards and Metrication	
<b>Chapter 1—Plant Start-up:</b> Analysis of Start-Up.	1
<b>Chapter 2—General Responsibilities and Considerations:</b> What the Pipework Engineer Should Know About; Corrosion and its Dangers; Radioactivity related to Pipework; About Cryogenics; Mechanical and Structural Engineering; Computers; Specialist Manufacturers; Trade, Professional and National Bodies.	3
<b>Chapter 3—Theory in Practice:</b> Introduction; Physical Properties of Fluids; Specific Gravity; Specific Heats of Gases; Reynolds Numbers; Hydraulic Mean Depth; Bernoullis Theorem; Pressure; Head; Pressure Loss due to Friction; Properties of Gas and Vapour; Flow of Compressible Fluids in Pipes; Pressure Drop through Valves and Fittings; Two Phase Flow; Newtonian Fluid; Non-Newtonian Fluid; Head on Pump; Measurement of Flow in Pipes; Pressure Rise due to stopping the flow in a pipe; Thrusts developed in a pipeline; Pipe Wall Thickness; Useful Design Data; Summary of Formulas; Conversion Factors; Examples.	15
<b>Chapter 4—Pipes and Pipe Fittings:</b> Standardization; 'Standardized' Pipe; Pipes or Tubes?; Pipe Fittings; Cast Iron Pressure Pipe for Industrial Purposes; Standard Flanges; Spiral Welded Piping; Nickel Alloy Piping; Copper, Brass, Copper-Nickel Alloy and Bronze; Aluminium Alloy Piping; Lead and Lead Alloy Piping; Bi-metal (Composite) Tube; Permanently Bonded Glass Lined Piping; Rubber Lined Piping; Plastics Piping; Fluoroline Lined Piping; Pipe Lining by Vacuum Process; Tufplas Piping; Cement Lined Piping; Flexible Hose; Swivel Joints; Lima/Ring Fitting; Pressure Temperature Ratings; Leak Rate.	71
<b>Chapter 5—Gaskets and Jointings:</b> Mechanics of Sealing; Methods of Housing; Flange Design; Flange Specifications; Gasket Selection; Gasket Design; Materials; Metals; Pressure Responsive Seals; Sealing Problems; Fitting, Maintenance and Storage.	103
<b>Chapter 6—Valves and Allied Fittings:</b> About Valves in General; Guide to Valve Selection; Valves in Detail; Valve Sealing Methods; Valve Packing; Omnibus Valve Check List; Sundry Pipe Line Fitments; Steam and Air Traps.	117
<b>Chapter 7—Valve Operating Mechanisms:</b> Lever Operated Sliding and Rotating Stems; Extension Spindles, Gearing, Etc., Interlocking and Padlocking; Valve Actuators (Power Operated); Valve Positioners.	163
<b>Chapter 8—Automatic Process Control:</b> Self Contained or Self Operated Control Valves; Automatic Process Control Valves—Remote Signal Operated; Valve Characteristics; Valve Sizing; Accessories; Control Valve Check List; Control Valve Arrangements; Orifice, Venturi, and Pitot Tube Fittings; What the Pipework Engineer Should Know About Instruments and Controls.	169
<b>Chapter 9—Safety and Protection:</b> Safety Valves, Relief Valves, and Safety-Relief Valves; Purchase Order for	187

Safety and Relief Valves; Bursting Discs; Flame Traps; Explosion Protection Systems; Design Factors to be considered; Inert Gas Blanketing; Cathodic Protection; Fire Fighting Equipment; Noise, Pollution, etc.; What the Pipework Engineer Should Know About Electrical Safety; Clearances Required for Average Man.	Page No.
<b>Chapter 10</b> —Pipe Hangers and Supports: Design of Pipe Hangers; Interlocking Clamps; Anchorage of Underground Pipe Lines.	205
<b>Chapter 11</b> —Bellows, Guides and Anchors: Typical Problems and Solutions; Bellows; Installation of Axial Type Units; Pressure Balanced Units. Articulated and Angular Compensators; Axial vs. Articulated Compensator in Distribution Pipework; Articulated Compensators: where do you leave the cold-draw Gap?; Alternative Materials; Information Required by the Bellows Supplier.	229
<b>Chapter 12</b> —Stress Analysis: Introduction; Flexibility; Analysing a Pipework System for Flexibility; Pipework Application Design Codes; The Role of the Computer in Pipework Flexibility Analysis; Future Trends in Pipework Design; Conclusion; Bibliography.	251
<b>Chapter 13</b> —Thermal Insulation: Insulating Materials—General Requirements; Insulation Finishes and Protective Coatings; Fire Danger; Forms of Insulation; Notes on Application; Preparing an Insulation Specification.	287
<b>Chapter 14</b> —Piping Design—Organization and Practice: The Function and Its Importance; Piping within the Project Plan; The Work of the Piping Engineer; Process Engineering Data and Flowsheet; Plant Layout and Initial Design; Piping Specifications; The Line Diagram; Material Control, Ordering and Expediting; Piping Layout; Pipe Detailing; Pipe Supports; Insulation and Painting; Final Clean-up and Documentation; The Piping Design Office; Use of the Computer in the Pipework Drawing Office; References.	303
<b>Chapter 15</b> —Piping Systems: Pipe Line Heating Systems; Vacuum Jacketed Piping (Cryogenic); Glass Piping Systems; Glass-Filament-Wound Elastomer-Lined Piping System; Piping Systems for Powders and Solids Handling; Hygienic Pipe Systems; Pre-Insulated Piping System; High Pressure Coupling and Fittings Systems; The Graylock Connection and Fittings; Flexible and Articulated Pipe Systems.	369
<b>Chapter 16</b> —Piping Design and Drafting by Computer: The Computer; Computer Input; Pipe Specifications; Coordinate Dimensioning; Coding; Material Take off; Piping Detail Drawings; Error Detection and Reporting; Cost Analysis; Training; Computer System Flowcharts.	405
<b>Chapter 17</b> —The Piping Design Model: Objective of the Design Function; The Technique; Preliminary Layout Model; Piping Design Model; Model Costs (General); Cost Estimating; Space Requirements; Information Recording; Packing and Transport; Photographic Examples of the Technique.	441
<b>Chapter 18</b> —Future Design Methods: The Case for Computer-Aided Pipework Design; Computer Methods Available; The Pipework Design Office of the Future; References.	457
<b>Chapter 19</b> —Estimating, Measurement, Costing and Cost Control: General; Estimating; Measurement; Cost/Control/Monitoring; References.	465
<b>Chapter 20</b> —Piping Fabrication and Erection: Piping Fabrication; Estimating and Tendering; Methods of Fabrication; Heat Treatment; Cleaning of Pipework; Non-Destructive Testing; Surface and Internal Protection of Pipework; Inspection; Painting of Pipework;	507

Transport of Fabricated Pipework; Special Pipework Fabrication; Erection of Pipework; Training in Pipework Fabrication.	Page No.
<b>Chapter 21</b> —Pipework Maintenance: Modern Tools, Methods and Specialist Services.	535
Conclusion	543
Appendices	
Table 1. Registered Trade Names	545
Table 2. Greek and Russian Alphabets	545
Table 3. General Equivalents	546
Table 4. General Conversion Table	546
Table 5. Conversions—inches to millimetres	547
Table 6. Conversions—feet and inches to metres	547
Table 7. Conversions—gravity	548
Table 8. Four-place Logarithms to base 10	549
Table 9. Knotts Four-figure Mathematical Tables	551
Table 10. Wire Gauges	557
Table 11. Common Names and Abbreviations for Plastics and Rubbers	557
Table 12. International and National Standards Organizations	558
Table 13. British Standards Related to Pipework	558
