<i>Preface</i>	<i>page</i>	vii
<i>List of contributors</i>	<i>page</i>	ix
1 Introduction	1	
PETER CUTTANCE AND RUSSELL ECOB		
2 An overview of structural equation modeling	9	
RUSSELL ECOB AND PETER CUTTANCE		
3 Field dependence and the differentiation of neurotic syndromes	24	
KATHARINE R. PARKES		
4 High school seniors' reports of parental socioeconomic status: black-white differences	51	
LEE M. WOLFLE		
5 Modeling the hierarchical structure of learning	65	
PETER W. HILL		
6 A study of longitudinal causal models comparing gain score analysis with structural equation approaches	86	
LESLIE HENDRICKSON AND BARNIE JONES		
7 Some structural equation models of sibling resemblance in educational attainment and occupational status	108	
ROBERT M. HAUSER AND PETER A. MOSSEL		
8 Applications of structural equation modeling to longitudinal educational data	138	
RUSSELL ECOB		
9 The robustness of maximum likelihood estimation in structural equation models	160	
ANNE BOOMSMA		
10 An inquiry into the effects of outliers on estimates of a structural equation model of basic skills assessment	189	
JOAN K. GALLINI AND JIM F. CASTEEL		

11	Testing structural equation models W. E. SARIS, J. DEN RONDEN, AND A. SATORRA	202
12	LISREL models for inequality constraints in factor and regression analysis HENK KELDERMAN	221
13	Issues and problems in the application of structural equation models PETER CUTTANCE	241
	<i>Appendix</i>	280
	<i>Glossary</i>	312
	<i>Index</i>	317
