

CONTENTS

Preface	v
Acknowledgements	vii

Part I. Introduction

Chapter 1. Polymer properties	3
A. Approach	3
B. The concept: "polymer properties"	4
Bibliography	8
Chapter 2. Typology of polymers	9
A. Polymer structure	9
B. Molecular weight and distribution of molecular weights	17
C. Transitions in polymers; polymer classification on the basis of mechanical behaviour	20
D. The structure of crystalline polymers	23
Bibliography	25
Chapter 3. Typology of numerical properties	27
A. Physical quantities and their units	27
B. Categories of physical quantities	28
C. Dimensionless groups of quantities	29
D. Types of polymer properties	32
E. Additive molar functions	33
Bibliography	36

Part II. Thermophysical properties of polymers

Chapter 4. Volumetric properties	41
A. Volume and density	41
B. Thermal expansion	55
Bibliography	64
Chapter 5. Calorimetric properties	67
A. Heat capacity	67
B. Latent heat of crystallization and fusion	76

C. Enthalpy and entropy	79
Bibliography	84
Chapter 6. Cohesive and adhesive properties	85
A. Molar cohesive energy	85
B. Internal pressure	91
C. Surface energy	95
Bibliography	106
Chapter 7. Transition temperatures	109
A. The glass transition temperature	109
B. The crystalline melting point	121
C. Relationship between glass temperature and melting point of polymers	130
Bibliography	132
Chapter 8. Solubility	135
A. The solubility parameter	135
B. Solubility limits	142
Bibliography	143

Part III. Properties of polymers in fields of force

Chapter 9. Mechanical (viscoelastic) properties	147
A. Elastic quantities	147
B. Rubber elasticity	161
C. Viscoelasticity	164
Bibliography	176
Chapter 10. Ultimate mechanical properties	177
A. Stress-strain behaviour of solid polymers	177
B. Long period ("macro-time") behaviour	188
C. Other properties connected with mechanical failure	189
Bibliography	193
Chapter 11. Optical properties	195
A. Absorption	196
B. Refraction	196
C. Light scattering	205
D. Reflection	209
Bibliography	210
Chapter 12. Electrical properties	211
A. Dielectric polarization	211
B. Static electrification and conductivity	218
C. Ultimate electrical properties	219
Bibliography	220

Chapter 13. Magnetic properties	221
A. Magnetic susceptibility	221
B. Magnetic resonance	223
Bibliography	229

Part IV. Transport properties of polymers

Chapter 14. Transport of thermal energy	233
Bibliography	239
Chapter 15. Viscosity of polymer solutions	241
A. Limiting viscosity number (intrinsic viscosity)	242
B. Viscosity of polymer solutions	251
Bibliography	254
Chapter 16. Viscosity of polymer melts	257
A. The concept of melt viscosity	257
B. Melt viscosity and its parameters	258
C. Melt elasticity	268
D. Generalized flow curve	271
Bibliography	273
Chapter 17. Dissolution and melting of polymers	275
A. Dissolution	275
B. Melting of polymers	279
Bibliography	279
Chapter 18. Permeation of polymers. The diffusive transport of gases, vapours and liquids in polymers	281
A. Solubility of gases and vapours in polymers	281
B. Diffusivity	286
C. Moisture absorption and transport	294
Bibliography	297

Part V. Physical and chemical change in polymers

Chapter 19. Crystallization	301
A. Crystallinity	301
B. Nucleation and growth	303
C. Overall rate of crystallization	308
Bibliography	310
Chapter 20. Orientation	311
A. Degree of orientation	311
B. Uniaxial orientation	312

C. Biaxial orientation	325
Bibliography	326
Chapter 21. Thermochemical properties	327
A. Thermodynamics and kinetics	327
B. Calculation of the free enthalpy of reaction from group contributions	329
C. Free enthalpy of polymerization reactions; ceiling temperatures	335
D. Thermodynamics of free radicals	337
E. Copolymerization by radical reactions	340
Bibliography	346
Chapter 22. Degradation	347
A. Forms of degradation	347
B. Quantitative description of polymer degradation	351
Bibliography	355
 Part VI. Retrospect	
Chapter 23. Interrelations	359
A. Characteristic "increment diagrams"	359
B. Effect of functional groups on properties	366
C. Interrelations of physical quantities	368
D. Epilogue	376
Appendix 1. Survey of group contributions	378
Appendix 2. Physical properties of polymers	386
Appendix 3. Values of some physical constants	394
Appendix 4. Conversion factors to S.I. units	395
Symbols of quantities	406
Subscripts, superscripts and indices	412
Author index	415
Subject index	421
