

## Table of Contents

**Preface** XV

**List of Contributors** XIX

### **Part I**      **Polymers and Fillers** 1

#### **1**      **Polymers and Polymer Composites** 3

*M. Xanthos*

- 1.1 Thermoplastics and Thermosets 3
- 1.2 Processing of Thermoplastics and Thermosets 4
- 1.3 Polymer Composites 6
- 1.3.1 Types and Components of Polymer Composites 6
- 1.3.2 Effects of Fillers/Reinforcements – Functions 8
- 1.3.3 Rules of Mixtures for Composites 11
- 1.3.4 Functional Fillers 12
- References 16

#### **2**      **Modification of Polymer Mechanical and Rheological Properties with Functional Fillers** 17

*M. Xanthos*

- 2.1 Introduction 17
- 2.2 The Importance of the Interface 18
- 2.3 Modification of Mechanical Properties 19
- 2.3.1 General 19
- 2.3.2 Modulus of Fiber and Lamellar Composites 22
- 2.3.3 Modulus of Composites Incorporating Particulates 25
- 2.3.4 Strength of Composites with Fiber and Lamellar Fillers 27
- 2.3.5 Strength of Composites Incorporating Particulates 30
- 2.3.6 Toughness Considerations 30
- 2.3.7 Temperature and Time Effects 31
- 2.4 Effects of Fillers on Processing Characteristics of Polymers 32
- 2.4.1 General 32

|                |                                                |           |
|----------------|------------------------------------------------|-----------|
| 2.4.2          | Melt Rheology of Filled Polymers               | 32        |
| 2.4.3          | Processing/Structure/Property Relationships    | 35        |
|                | Symbols                                        | 37        |
|                | Subscripts                                     | 37        |
|                | References                                     | 38        |
| <b>3</b>       | <b>Mixing of Fillers with Plastics</b>         | <b>39</b> |
|                | <i>D. B. Todd</i>                              |           |
| 3.1            | Introduction                                   | 39        |
| 3.2            | Pretreatment of Fillers                        | 42        |
| 3.3            | Feeding                                        | 42        |
| 3.4            | Melting                                        | 46        |
| 3.5            | Introduction of Solids and Mixing              | 47        |
| 3.6            | Venting                                        | 52        |
| 3.7            | Pressure Generation                            | 52        |
| 3.8            | Process Examples                               | 53        |
| 3.9            | Further Information                            | 55        |
|                | References                                     | 55        |
| <b>Part II</b> | <b>Surface Modifiers and Coupling Agents</b>   | <b>57</b> |
| <b>4</b>       | <b>Silane Coupling Agents</b>                  | <b>59</b> |
|                | <i>K. Weissenbach, H. Mack</i>                 |           |
| 4.1            | Introduction                                   | 59        |
| 4.2            | Production and Structures of Monomeric Silanes | 60        |
| 4.3            | Silane Chemistry                               | 61        |
| 4.4            | Types of Silanes                               | 62        |
| 4.4.1          | Waterborne Silane Systems                      | 62        |
| 4.4.2          | Oligomeric Silanes                             | 62        |
| 4.5            | Silane Hydrolysis                              | 63        |
| 4.6            | Reactivity of Silanes Towards the Filler       | 65        |
| 4.7            | Combining Silanes and Mineral Fillers          | 66        |
| 4.7.1          | Method I                                       | 66        |
| 4.7.2          | Method II                                      | 67        |
| 4.7.3          | Method III                                     | 67        |
| 4.7.4          | Method IV                                      | 68        |
| 4.8            | Insights into the Silylated Filler Surfaces    | 68        |
| 4.8.1          | Spectroscopy                                   | 68        |
| 4.8.2          | Pyrolysis-Gas Chromatography                   | 72        |
| 4.8.3          | Carbon Analysis                                | 72        |
| 4.8.4          | Colorimetric Tests                             | 73        |
| 4.8.5          | Acid-Base Titration                            | 73        |
| 4.8.6          | Empirical Tests for Hydrophobicity             | 73        |
| 4.8.7          | Combined Silane/Colorant Surface Modification  | 74        |
| 4.9            | Selection of Silanes                           | 74        |

|                 |                                                        |            |
|-----------------|--------------------------------------------------------|------------|
| 4.10            | Applications of Specific Silanes                       | 76         |
| 4.10.1          | Vinylsilanes                                           | 76         |
| 4.10.2          | Aminosilanes                                           | 78         |
| 4.10.3          | Methacryloxysilanes                                    | 80         |
| 4.10.4          | Epoxysilanes                                           | 81         |
| 4.10.5          | Sulfur-Containing Silanes                              | 81         |
| 4.11            | Trends and Developments                                | 82         |
|                 | References                                             | 83         |
| <b>5</b>        | <b>Titanate Coupling Agents</b>                        | <b>85</b>  |
|                 | <i>S. J. Monte</i>                                     |            |
| 5.1             | Introduction                                           | 85         |
| 5.2             | The Six Functions of the Titanate Molecule             | 88         |
| 5.2.1           | Effects of Function (1)                                | 88         |
| 5.2.2           | Effects of Function (2)                                | 93         |
| 5.2.3           | Effects of Function (3)                                | 95         |
| 5.2.4           | Effects of Function (4)                                | 97         |
| 5.2.5           | Effects of Function (5)                                | 99         |
| 5.2.6           | Effects of Function (6)                                | 101        |
| 5.3             | Summary and Conclusions                                | 101        |
|                 | References                                             | 102        |
