

Contents

<i>Preface</i>	<i>iii</i>
1. Introduction	1
2. Nominal Data	31
3. Ionic Radii	43
4. Ionization Potential and Electron Affinity	63
5. Magnetic Susceptibility	77
6. Polarizability and Molar Refractivity	87
7. Thermodynamic Quantities of Isolated Ions	97
8. Thermodynamic Data for Hydrated Ions	117
9. Ionic Volumes and Their Derivatives	137
10. Electrode Potentials	151
11. Ion Transport	159

12. Hydration Numbers	177
13. Coordination Properties	187
14. Effects on the Structure of Water	199
15. Ion–Solvent Preferences	209
16. Enthalpy and Entropy of Transfer	227
17. Partial Molar Quantities in Nonaqueous Solvents	237
18. Ion Transport in Nonaqueous Solvents	243
Symbols and Values of Physical Constants	251
<i>Author Index</i>	255
<i>Subject Index</i>	257
