Preface..... xi

Editors xiii

Contributors xv

Chapter 1 New Materials, New Devices, New Solutions: How to Prepare a Membrane 1

A. Gordano and M. G. Buonomenna

Chapter 2 Asymmetric Polyethersulfone Membranes: Preparation and Application 17

Ani Idris, Iqbal Ahmed, and Nurdiana Mohd Noor

Chapter 3 Preparations and Applications of Inorganic–Organic Charged Hybrid Membranes: A Recent Development and Perspective..... 39

Junsheng Liu, Tongwen Xu, and Guoquan Shao

Chapter 4 Preparation and Applications of Zeolite Membranes: A Review..... 57

Somen Jana, Mihir Kumar Purkait, and Kaustubha Mohanty

Chapter 5 Technological Applications of Composite Membranes..... 77

Maria Popescu and Larisa Melita

Chapter 6 Treatment of Kraft Black Liquor Using Membrane-Based Separation Process 107

Chiranjib Bhattacharjee and Dwaipayan Sen

Chapter 7 Treatment of Refinery Wastewater Using Membrane Processes 121

Muhammad H. Al-Malack and Muhammad Muhitir Rahman

Chapter 8 Advanced Oxidation Process and Nanofiltration for Treatment of Textile Plant Effluent: A Brief Review..... 133

Phalguni Banerjee and Sirshendu De

Chapter 9 Micellar-Enhanced Ultrafiltration and Its Applications..... 147

Chandan Das and Mihir Kumar Purkait

Chapter 10 Membrane Hybrid Systems in Wastewater Treatment 165

Saravanamuthu Vigneswaran, Hok-Yong Shon, and Jaya Kandasamy

Chapter 11	Membrane Emulsification: Current State of Affairs and Future Challenges.....	185
	<i>Karin (C.G.P.H.) Schroën, Cees J. M. van Rijn, and Remko M. Boom</i>	
Chapter 12	Emerging Membrane Technologies and Applications for Added-Value Dairy Ingredients	201
	<i>Laurent Bazinet, David P. Lachkar, and Yves Pouliot</i>	
Chapter 13	Membrane-Based Separation Process for Juice Processing.....	213
	<i>P. Rai and Sirshendu De</i>	
Chapter 14	Fouling in Membrane Processes Used for Water and Wastewater Treatment	231
	<i>Matthias Kraume and Fangang Meng</i>	
Chapter 15	Fundamentals of Liquid Membrane.....	255
	<i>Aloke Kumar Ghoshal</i>	
Chapter 16	Applications and Advances with Supported Liquid Membranes.....	279
	<i>Michael E. Vilt and W. S. Winston Ho</i>	
Chapter 17	Ionic Liquid-Based Supported Liquid Membranes.....	305
	<i>Michiaki Matsumoto</i>	
Chapter 18	Solving Challenging Industrial Separation Problems through Electrodialysis.....	317
	<i>S. Sridhar, R. Surya Murali, and A. A. Khan</i>	
Chapter 19	Hemodialysis Membranes: History, Properties, and Future Development	341
	<i>William H. Van Geertruyden, Zhongping Huang, and William R. Clark</i>	
Chapter 20	Separation of Homogeneous Liquid Mixtures by Pervaporation.....	353
	<i>S. Sridhar and K. Sunitha</i>	
Chapter 21	Carbon Dioxide–Selective Membranes.....	381
	<i>Bishnupada Mandal and W. S. Winston Ho</i>	
Chapter 22	Gas Absorption of CO ₂ and H ₂ S Using Membrane Contactors	397
	<i>Meng-Hui Li, Alvin R. Caparanga, and Allan N. Soriano</i>	
Chapter 23	Membrane Reactor: Concept, Applications, and Prospects.....	419
	<i>Kaushik Nath and Mathur S. Bhakhar</i>	

Chapter 24	Enzymatic Membrane Reactors in Applications of Membrane Separations Technology: Recent Advances	445
	<i>Gilbert M. Rios, M. P. Belleville, and D. Paolucci</i>	
Chapter 25	Membranes for Fuel Cell Application: Hybrid Organic and Inorganic Membranes	461
	<i>Sumedha Sharma and Kaustubha Mohanty</i>	
Index		485
