1. Overview	1
-------------	---

## Part I

### Extractive Metallurgy of Nickel and Cobalt

2. Nickel Production, Price, and Extraction Costs	21
3. Upgrading of Laterite Ores	39
4. Overview of the Smelting of Nickel Laterite to Ferronickel	49
5. Dewatering and Calcination of Laterite Ores	55
6. Smelting of Laterite Ores to Ferronickel	67
7. Refining Molten Ferronickel	85
8. Smelting Laterite Concentrates to Sulfide Matte	95
9. Roasting Matte to Nickel Oxide and Metal	109
10. Overview of the Hydrometallurgical Processing of Laterite Ores	117
11. High-Temperature Sulfuric Acid Leaching of Laterite Ores	123
12. Precipitation Of Nickel–Cobalt Sulfide	135
13. Extraction of Nickel and Cobalt from Sulfide Ores	147
14. Production of Nickel Concentrates from Sulfide Ores	159
15. Production of Nickel Concentrate from Ground Sulfide Ore	171
16. Separation of Chalcopyrite from Pentlandite by Flotation	191
17. Smelting of Nickel Sulfide Concentrates by Roasting and Electric Furnace Smelting	199
18. Flash Smelting of Nickel Sulfide Concentrates	215
19. Converting – Final Oxidation of Iron From Molten Matte	233

20. Sulfur Dioxide Capture in Sulfuric Acid and Other Products	247
21. Slow Cooling and Solidification of Converter Matte	259
22. Carbonyl Refining of Impure Nickel Metal	269
23. Hydrometallurgical Production of High-Purity Nickel and Cobalt	281
24. Leaching of Nickel Sulfide Mattes and Precipitates	301
25. Separation of Nickel and Cobalt by Solvent Extraction	315
26. Electrowinning of Nickel from Purified Nickel Solutions	327
27. Hydrogen Reduction of Nickel from Ammoniacal Sulfate Solutions	347

## Part II

### Extractive Metallurgy of Cobalt

28. Cobalt – Occurrence, Production, Use and Price	357
29. Extraction of Cobalt from Nickel Laterite and Sulfide Ores	365
30. Production of Cobalt from the Copper–Cobalt Ores of the Central African Copperbelt	377

## Part III

### Extractive Metallurgy of the Platinum-Group Metals

31. Platinum-Group Metals, Production, Use and Extraction Costs	395
32. Overview of the Extraction of Platinum-Group Metals	411
33. Production of Flotation Concentrates Containing Platinum-Group Metals	415
34. Extraction of Platinum-Group Metals from Russian Ores	429
35. Smelting and Converting of Sulfide Concentrates Containing Platinum-Group Metals	437
36. Separation of the Platinum-Group Metals from Base Metal Sulfides, and the Refining of Nickel, Copper and Cobalt	457
37. Refining of the Platinum-Group Metals	489

**Part IV****Recycling Nickel, Cobalt and Platinum-Group Metals**

<b>38. Recycling of Nickel, Cobalt and Platinum-Group Metals</b>	<b>537</b>
Appendix A: Ferronickel Smelting of Non-Tropical Laterite Ores	551
Appendix B: Caron Process for Processing Nickel Laterites	553
Appendix C: Flash Cooling of Autoclaves	559
Appendix D: Counter-Current Decantation of Leaching Slurries	563
Appendix E: Recovering Nickel-, Copper-, Cobalt- and Platinum-Group Elements from Slags	567
Appendix F: Electrorefining of High-Purity Nickel from Cast Impure Ni Alloy and Ni Matte Anodes	575
Appendix G: Top Blown Rotary Converter	579
Appendix H: Nickel Carbonylation Free Energies and Equilibrium Constants	583
Index	587
