

Contents

	Contents of the Spectral Part	IX	3.3	IR Spectroscopy of Inorganic Fillers and Pigments	53
	List of Abbreviations	XI	3.4	X-Ray Diffraction Analysis of Inorganic Fillers and Pigments	59
	Alphabetical List of the Manufacturers or Suppliers of Materials Mentioned in this Book	XIII			
1	Methods for the Analysis of Additives and Processing Aids for Plastics	1	4	Organic Pigments	60
1.1	Introduction	1	4.1	Survey and Classification	60
1.2	Separation of Additives	1	4.2	Separation of Organic Pigments	60
1.2.1	Extraction and Reprecipitation	1	4.3	Thermal and Optical Methods for the Investigation of Organic Pigments	61
1.2.2	Separation by Distillation and Sublimation	3	4.4	Solubility and Chemical Behavior of Organic Pigments	62
1.3	Thin Layer Chromatography (TLC)	4	4.5	Thin Layer Chromatography of Organic Pigments	64
1.3.1	Applications	4	4.6	IR Spectroscopy of Organic Pigments	70
1.3.2	Documentation of TLC Data	4			
1.3.3	Transfer Methods	5	5	UV Stabilizers and Fluorescent Whitening Agents	84
1.3.4	High Performance Thin Layer Chromatography	5	5.1	Survey and Classification of UV Stabilizers	84
1.4	Liquid Column Chromatography (LC)	6	5.2	Chemical Detection of UV Stabilizers	85
1.4.1	High Performance Liquid Chromatography (HPLC)	6	5.3	Thin Layer Chromatography of UV Stabilizers	85
1.4.2	Gel Permeation Chromatography (GPC)	6	5.4	IR Spectroscopy of UV Stabilizers	85
1.5	Gas Chromatography (GC)	7	5.5	UV Spectroscopy of UV Stabilizers	87
1.5.1	Applications	7	5.6	Fluorescent Whitening Agents	88
1.5.2	Direct Introduction of Volatilizable Components into Gas Chromatographs	8	5.7	Thin Layer Chromatography of Fluorescent Whitening Agents	89
1.6	IR Spectroscopy	8	6	Antioxidants	92
1.6.1	Applications, Collections of Spectra	8	6.1	Survey and Classification	92
1.6.2	IR Spectroscopy of Small Quantities of Substances	9	6.2	Chemical Detection of Antioxidants	94
1.6.3	IR Spectra of Vapors	10	6.3	Thin Layer Chromatography of Antioxidants	96
1.6.4	Computer Aided IR Spectroscopy	10	6.4	Gas Chromatography of Antioxidants	97
1.7	UV Spectroscopy	12	6.5	IR Spectroscopy of Antioxidants	106
1.7.1	Applications	12	6.6	UV Spectroscopy of Antioxidants	107
1.7.2	UV Spectra of Additives	13	6.7	Mass Spectroscopy of Antioxidants	108
1.8	Mass Spectroscopy	13	6.8	Other Methods for the Analysis of Antioxidants	108
1.8.1	Applications	13			
1.8.2	Collections of Spectra	14	7	PVC Stabilizers	108
1.9	Emission Spectral Analysis	14	7.1	Survey and Classification	108
1.10	X-Ray Fluorescence Analysis	14	7.2	Chemical Detection of PVC Stabilizers	113
1.11	X-Ray Diffraction Analysis	14	7.3	Thin Layer Chromatography of PVC Stabilizers	113
1.11.1	Applications	14	7.4	Gas Chromatography of PVC Stabilizers	114
1.11.2	Diffraction Diagrams	15	7.5	IR Spectroscopy of Stabilizers	115
1.12	Other Instrumental Methods	15	7.6	Other Methods for the Analysis of PVC Stabilizers	117
1.13	Surface Analysis Methods	15			
2	Plasticizers	16	8	Antistatics, Biostabilizers, Flame Retardants	117
2.1	Survey and Classification	16	8.1	Survey and Classification of Antistatics	117
2.2	Physical Data and Chemical Detection of Plasticizers	17	8.2	Chemical Detection of Antistatics	118
2.3	Thin Layer, Column, and Gel Chromatography of Plasticizers	26	8.3	Thin Layer Chromatography of Antistatics	120
2.4	Gas Chromatographic Analysis of Plasticizers	31	8.4	IR Spectroscopy of Antistatics	121
2.5	Thin Layer and Gas Chromatography of Plasticizer Degradation Products	35	8.5	Analysis of Biostabilizers	122
2.6	IR Spectroscopy of Plasticizers	38	8.6	Analysis of Flame Retardants	123
2.7	UV Spectroscopy of Plasticizers	50			
2.8	Mass Spectroscopy of Plasticizers	51	9	Accelerators, Curing Agents and Activators	124
3	Inorganic Fillers and Pigments	51	9.1	Survey and Classification of Vulcanization Accelerators	124
3.1	Survey and Classification	51			
3.2	Chemical Analysis of Inorganic Fillers and Pigments	51			

Contents

9.2	Chemical Detection of Accelerators	125	11	Solvents	145
9.3	Thin Layer Chromatography of Accelerators .	126	11.1	Survey and Classification	145
9.4	IR Spectroscopy of Accelerators	128	11.2	Chemical Detection of Solvents	151
9.5	Curing Agents and Activators for Epoxy Resins and Polyurethanes	130	11.3	Gas Chromatography of Solvents	152
10	Processing Aids	139	11.4	IR Spectroscopy of Solvents	154
10.1	Survey and Classification	139	11.5	UV and Mass Spectroscopy of Solvents	164
10.2	Analysis of Lubricants	139	Bibliography		167
10.3	Analysis of Blowing Agents	140	Spectral Part		185
10.4	Analysis of Adhesion Promoters	142	Index of Spectra		675
10.5	Analysis of Peptizers	144	Subject Index.		685
10.6	Analysis of Antiskinning Agents	145
