

CONTENTS

A Comparison of Creep and Load Relaxation Data of a Modified 316 Stainless Steel <i>R. D. Black, P. D. Ferro, R. W. Swindeman, and C. -Y. Li</i>	1
Analytical Study on Correlationship Between Stress Relaxation and Creep Deformation Behavior of Ferritic Steels <i>K. Aoto, H. Kawasaki, Y. Wada, and I. Nihei</i>	9
The Stress Relaxation Behavior of SUS 304 Stainless Steel <i>M. Yamashita and Y. Wada</i>	15
Relaxation Response of A533B Steel From 25 to 600°C <i>R. W. Swindeman and E. Bolling</i>	21
Phenomenological Study on Stress Relaxation Behavior of Cyclic Softening Material by Real-Time Data <i>H. Kawasaki, H. Kagawa, K. Aoto, Y. Wada, and I. Nihei</i>	29
Cyclic Stress-Strain Behavior of Modified 9Cr-1Mo Steel Under Creep-Fatigue Interaction <i>S. Kitade, K. Setoguchi, M. Yamauchi, and T. Igari</i>	35
The Use of Stress Relaxation Data for Creep-Fatigue Damage Analysis <i>S. Y. Zamrik and D. C. Davis</i>	43
Cyclic Relaxation Behavior and Creep Damage of Type 304 Stainless Steel <i>T. Sakon, H. Wada, and Y. Asada</i>	53
Rate-Sensitivity and Short Term Relaxation Behavior of AISI Type 304 Stainless Steel at Room Temperature and at 650°C; Influence of Prior Aging <i>M. B. Ruggles and E. Krempl</i>	59
Relaxation Behavior of 304 Steel Under Tension-Torsion Biaxial Loading <i>T. Nakamura, T. Ishikawa, and Y. Asada</i>	69
On the Creep Isochronous Curves Approach for the Assessment of Component Life in a 2 1/4 Cr-1Mo Steel <i>R. Srikanth and D. L. Marriott</i>	75
Thermal Stress and Relaxation Simulation of Tubular Connection in Steam Injection Well <i>E. Tsuru, F. Kohyama, M. Ogasawara, and K. Maruyama</i>	81
Development of Database of High-Temperature Component Materials for Life and Residual Life Predictions <i>M. Matsubara, A. Nitta, and K. Kuwabara</i>	87
