

Contents

Part I Biomaterials of Vertebrates Origin. An Overview

1	Introduction.....	3
1.1	Species Richness and Diversity of Marine Vertebrates.....	3
1.2	Part I: Biomaterials of Vertebrate Origin. An Overview	4
1.2.1	Supraclass Agnatha (Jawless Fishes)	4
1.2.2	Gnathostomes.....	8
1.2.3	Tetrapoda.....	26
1.3	Conclusion.....	49
	References.....	50

Part II Biomineralization in Marine Vertebrates

2	Cartilage of Marine Vertebrates.....	69
2.1	From Non-mineralized to Mineralized Cartilage.....	69
2.1.1	Marine Cartilage: Biomechanics and Material Properties.....	76
2.1.2	Marine Cartilage: Tissue Engineering.....	79
2.1.3	Shark Cartilage: Medical Aspect.....	82
2.2	Conclusion.....	84
	References.....	84
3	Biocomposites and Mineralized Tissues.....	91
3.1	Bone	91
3.1.1	Whale Bone: Size, Chemistry and Material Properties.....	97
3.1.2	Whale Bone Hause.....	102
3.1.3	Conclusion.....	103
3.2	Teeth.....	104
3.2.1	Tooth-Like Structures.....	106
3.2.2	Keratinized Teeth	108

3.2.3	Rostral Teeth	109
3.2.4	Pharyngeal Denticles and Teeth	110
3.2.5	Extra-oral and Extra-mandibular Teeth	113
3.2.6	Vertebrate Oral Teeth	114
3.2.7	Conclusion.....	132
3.3	Otoconia and Otoliths	133
3.3.1	Chemistry and Biochemistry of Otoconia and Otoliths	137
3.3.2	Practical Applications of the Fish Otoliths.....	141
3.3.3	Conclusion.....	142
3.4	Egg Shells of Marine Vertebrates.....	143
3.4.1	Eggshells of Marine Reptilia.....	146
3.4.2	Egg Shells of Sea Birds.....	152
3.4.3	Conclusion.....	153
3.5	Biomagnetite in Marine Vertebrates.....	153
3.5.1	Magnetite in Marine Fish.....	159
3.5.2	Magnetite in Marine Reptiles.....	160
3.5.3	Magnetite in Sea Birds.....	161
3.5.4	Magnetite in Cetaceans	163
3.5.5	Conclusion.....	164
3.6	Biohalite	164
3.6.1	Diversity and Origin of Salt Glands in Marine Vertebrates	165
3.6.2	Salt Glands: From Anatomy to Cellular Level.....	169
3.6.3	Conclusion.....	171
3.7	Pathological Biomineralization in Marine Vertebrates	172
3.7.1	Conclusion.....	178
3.8	Silica-Based Minerals in Marine Vertebrates.....	179
3.8.1	Conclusion.....	181
	References.....	182

Part III Marine Fishes as Source of Unique Biocomposites

4	Fish Scales as Mineral-Based Composites	213
4.1	Enamel and Enameloid	215
4.2	Dentine and Dentine-Based Composite	218
4.3	Fish Scales, Scutes and Denticles: Diversity and Structure.....	222
4.4	Conclusion.....	231
	References.....	231
5	Materials Design Principles of Fish Scales and Armor	237
5.1	Biomechanics of Fish Scales.....	244
5.2	Fish Swimming and the Surface Shape of Fish Scale.....	252
5.2.1	Superoleophobicity of Fish Scale Surfaces.....	256
5.2.2	Selfcleaning of Fish Scales and Biomimetic Applications.....	257

5.3	Conclusion.....	259
	References.....	259
6	Fish Skin: From Clothing to Tissue Engineering.....	263
6.1	Fish Skin Clothing and Leather.....	264
6.2	Shagreen.....	269
6.3	Fish Scales and Skin as Scaffolds for Tissue Engineering.....	271
6.4	Conclusion.....	274
	References.....	274
7	Fish Fins and Rays as Inspiration for Materials Engineering and Robotics	277
7.1	Fish Fins and Rays: Diversity, Structure and Function.....	278
7.1.1	Fish Wings: Fins of Flying Fish.....	289
7.2	Fish Fin Spines and Rays	291
7.3	Chemistry of Fish Fin: Elastoidin	295
7.4	Fin Regeneration and Fin Cell Culture	298
7.5	Robotic Fish-Like Devices.....	300
7.5.1	Fish and Designing of Smart Materials.....	301
7.5.2	Fish Biorobotics	302
7.6	Conclusion.....	308
	References.....	309
 Part IV Marine Biopolymers of Vertebrate Origin		
8	Marine Collagens	321
8.1	Isolation and Properties of Fish Collagens.....	322
8.2	Fish Collagen as a Biomaterial	328
8.3	Conclusion.....	335
	References.....	336
9	Marine Gelatins.....	343
9.1	Fish Gelatin-Based Films.....	349
9.2	Shark Skin and Cartilage Gelatin.....	352
9.3	Conclusion.....	354
	References.....	355
10	Marine Elastin.....	361
10.1	Elastin-Like Proteins in Lamprey	364
10.2	Fish Elastin.....	366
10.3	Cetacean Elastin.....	368
10.4	Conclusion.....	371
	References.....	371

11	Marine Keratins	377
11.1	Intermediate Filaments.....	383
11.2	Hagfish Slime.....	386
11.3	Whale Baleen.....	390
11.4	Conclusion.....	394
	References.....	394
12	Egg-Capsule Proteins of Selachians	403
12.1	Collagen	405
12.2	Polyphenol-Containing Egg Capsule Proteins	409
12.3	Conclusion.....	411
	References.....	412
13	Marine Structural Proteins in Biomedicine and Tissue Engineering	415
13.1	Conclusion.....	418
	References.....	420
14	Epilogue	423
	References.....	431
	Index	433
