

Contents

| | | |
|-----|---------------------------------------------------|----|
| I | Fundamentals: what is catalysis? | 1 |
| 1 | The reactive interface | 2 |
| 2 | The effect of surface structure on reactivity | 12 |
| 3 | Changing the reactivity of catalytic surfaces | 23 |
| II | Practicalities: what is a catalyst? | 31 |
| 4 | Catalytic materials and their preparation | 32 |
| 5 | Catalytic activity and selectivity | 42 |
| 6 | Measurement of catalytic properties | 53 |
| III | Applications: catalysis for the benefit of humans | 63 |
| 7 | Raw materials and their conversion | 64 |
| 8 | Catalysis for environmental protection | 72 |
| 9 | Catalysis in everyday life | 80 |
| 10 | Catalysis for the future | 87 |
| | Further reading | 91 |
| | Index | 92 |
