Preface iii

Contributors xi

Part I Historical Perspective

1. Microemulsions—A Historical Overview 1
Björn Lindman and Stig E. Friberg

Part II Structural Aspects and Characterization of Microemulsions

2. Thermodynamics of Microemulsions I 13
Willem K. Kegel, J. Theo G. Overbeek, and Henk N.W. Lekkerkerker
3. Thermodynamics of Microemulsions II 45
Eli Ruckenstein
4. Microscopic Models of Microemulsions 59
Gerhard Gompper and Michael Schick
5. Lattice Monte Carlo Simulations of Micellar and Microemulsion Systems 105
Raj Rajagopalan, L. A. Rodriguez-Guadarrama, and Sameer K. Talsania
6. Effects of Alcohol Chain Length and Salt on Phase Behavior and Critical Phenomena in SDS Microemulsions 139
A. M. Bellocq
7. Aggregation Behavior in One-Phase (Winsor IV) Microemulsion Systems 185
Shmaryahu Ezrahi, Abraham Aserin, and Nissim Garti
8. Ionic Microemulsions 247
Jean-Louis Salager and Raquel E. Antón
9. Supercritical Microemulsions 281
Gregory J. McFann and Keith P. Johnston
10. Characterization of Microemulsions by NMR 309
Björn Lindman, Ulf Olsson, and Olle Söderman

11. Rheological Properties of Microemulsions 357
Michael Gradzielski and Heinz Hoffmann
12. Light Scattering Studies of Microemulsion Systems 387
D. Langevin and J. Rouch
13. Characterization of Microemulsions Using Fast Freeze-Fracture and Cryo-Electron Microscopy 411
Jayesh R. Bellare, Manoj M. Haridas, and Xiangbing Jason Li
14. Characterization of Microemulsions by Electrical Birefringence 437
Zoltan A. Schelly

Part III Reactions in Microemulsions

15. Organic Reactivity in Microemulsions 457
Clifford A. Bunton and Laurence S. Romsted
16. Application of Microemulsions in Enhancing Sensitivity of Reactions in Spectroscopic Analysis 483
Rong Guo and Xiashi Zhu
17. Preparation of Ultrafine Particles of Metals and Metal Borides in Microemulsions 499
Janos B. Nagy
18. Microemulsion-Mediated Synthesis of Nanosize Oxide Materials 549
K. Osseo-Asare
19. Time-Resolved Luminescence Quenching in Microemulsions 605
Mats Almgren and Holger Mays
20. Structure and Reactions in Microemulsions Formed in Near-Critical and Supercritical Fluids 629
John L. Fulton
21. Electrochemical Studies in Microemulsions 651
Syed Qutubuddin
22. Polymerization in Microemulsions 679
Françoise Candau
23. Enzymatic Reactions in Microemulsions 713
Krister Holmberg

Part IV Applications of Microemulsions

24. Applications of Microemulsions in Enhanced Oil Recovery 743
Vinod Pillai, James R. Kanicky, and Dinesh O. Shah
25. Microemulsions in Pharmaceuticals 755
Martin Malmsten
26. Microemulsions in Cosmetics 773
Patricia A. Aikens and Stig E. Friberg

27. Microemulsions in Foods 789
Sven Engström and Kåre Larsson
28. Application of Microemulsions as Liquid Membranes 797
John M. Wiencek
29. Application of Microemulsions in Textile Cleaning Using Model Detergency Tests 811
Hans-Dieter Dörfler

Part V Future Prospects

30. The Future of Microemulsions 833
Johan Sjöblom and Stig E. Friberg

Index 843
