

Contents

	Volume 8	
	Preface V	
	List of Contributors XI	
15	Polymerization Reactions 3733	
15.1	Review of the Phillips Chromium Catalyst for Ethylene Polymerization 3733 <i>Max P. McDaniel</i>	
15.1.1	Historical and Commercial Background 3733	
15.1.2	Catalyst Formation 3734	
15.1.3	Polymerization Mechanism 3737	
15.1.3.1	Active Valence 3737	
15.1.3.2	Polymerization Mechanism 3739	
15.1.4	Active Site Population 3743	
15.1.4.1	Site Heterogeneity 3743	
15.1.4.2	Activation Temperature 3744	
15.1.4.3	Active Site Density 3745	
15.1.5	Branching 3747	
15.1.5.1	Short Chain Branching 3747	
15.1.5.2	Long Chain Branching 3749	
15.1.6	The Porosity of the Support 3750	
15.1.6.1	Porosity and Activity 3750	
15.1.6.2	Porosity and Molecular Weight 3754	
15.1.6.3	Porosity and Branching 3755	
15.1.7	Modifications of Cr/Silica 3757	
15.1.7.1	Promotion by Titania 3757	
15.1.7.2	“Two-Step” Activation of Cr/Silica–Titania 3761	
15.1.7.3	Dehydration by Chemical Means 3762	
15.1.7.4	Activation by Reduction/Reoxidation 3763	
15.1.7.5	Fluoride 3765	
15.1.7.6	Treatment with Alkali Metals 3766	
15.1.7.7	CO Reduction 3768	
15.1.7.8	Magnesia 3768	
15.1.8	Chromium Oxide on Alumina and Aluminophosphates 3768	
15.1.8.1	Cr/Alumina 3768	
15.1.8.2	Cr/Aluminophosphate 3770	
15.1.9	Metal Alkyl Co-Catalysts 3774	
15.1.9.1	Action of Co-Catalysts 3774	
15.1.9.2	Kinetic Profile 3775	
15.1.9.3	MW Distribution 3776	
15.1.9.4	<i>In Situ</i> Olefin Generation 3777	
15.1.10	Conclusion 3781	
15.1.11	Glossary 3782	
	References 3783	
15.2	Polymerization on Molecular Catalysts 3792 <i>Gerhard Fink</i>	
15.2.1	Introduction 3792	
15.2.2	History and Evolution of (Heterogeneous) Ziegler–Natta Catalysts 3793	
15.2.2.1	First-Generation Catalysts 3793	
15.2.2.2	Second-Generation Catalyst 3793	
15.2.2.3	Third-Generation MgCl ₂ -Supported Catalysts 3794	
15.2.2.4	Fourth- and Fifth-Generation Catalysts 3795	
15.2.2.5	Metallocenes – Sixth-Generation Catalysts 3797	
15.2.3	Polymer Reaction Engineering 3797	
15.2.3.1	Production of Polyethylene 3797	
15.2.3.1.1	Suspension Polymerization Process 3797	
15.2.3.1.2	Phillips Particle Form Process 3798	
15.2.3.1.3	Gas-Phase Fluidized-Bed Process 3798	
15.2.3.2	Propylene Polymerization 3799	
15.2.3.2.1	Basell Spheripol Process 3799	
15.2.3.2.2	BASF Novolen Process 3799	
15.2.3.2.3	Unipol–Shell Fluid Bed Process 3800	
15.2.3.2.4	Multizone Circulating Reactor (MZCR) 3801	
15.2.4	Mechanisms of Ziegler–Natta Catalysis and Polymerization 3801	
15.2.4.1	Fundamental Considerations 3801	

15.2.4.2	Early Soluble Unbridged Metallocene Catalysts in Connection with Alkylaluminum Chlorides	3803	16.3	Reactors for Immobilized Biocatalysts	3838
15.2.4.2.1	Unbridged Metallocene Catalysts in Connection with Methylaluminoxane	3805	16.4	Application of Immobilized Biocatalysts	3840
15.2.4.3	Stereorigid Bridged Chiral Metallocene Catalysts in Connection with MAO or Other Activators	3806	16.4.1	Industrial Application of Immobilized Biocatalysts	3840
15.2.4.4	Mechanism of Stereochemical Control	3812	16.4.1.1	Production of 7-Aminocephalosporanic Acid and 6-Aminopenicillanic Acid	3840
15.2.5	Supported Metallocene/MAO Catalysts and Other Heterogenized Catalysts	3815	16.4.1.2	Production of L-Amino Acids Using Aminoacylase	3845
15.2.5.1	Silica Gel as Supporting Material	3816	16.4.1.3	Several Selected Processes that Use Lipase in Manufacturing Fine Chemicals	3846
15.2.5.2	Supporting Methods and Procedures	3817	16.4.1.4	Production of Acrylamide by Means of Nitrile Hydratase	3850
15.2.5.3	Further Supporting Materials and Procedures	3818	16.4.1.5	Production of High-Fructose Corn Syrup Using Xylose Isomerase	3852
15.2.5.3.1	Polystyrene	3818	16.4.1.6	Production of Lactose-Free Milk Using β -Galactosidase	3854
15.2.5.3.2	Hybrid Multicomponent Catalyst Systems	3818	16.4.1.7	Production of L-Malic Acid Using Fumarase	3854
15.2.5.3.3	Self-Immobilization	3819	16.4.1.8	Production of Glycerol-3-Phosphate Using Glycerol Kinase	3856
15.2.5.4	Polymerization Kinetics and Polymer Particle Growth	3820	16.4.1.9	Miscellaneous Industrial Processes Using Immobilized Enzymes	3857
15.2.5.5	Mathematical Modeling and Fragmentation Processes	3822	16.4.2	Analytical and Medical Applications	3857
15.2.5.6	Video Microscopy	3824	16.4.3	Waste Treatment	3858
15.2.6	Outlook – Future Trends	3825	16.4.4	Application of Whole Cells (Not Immobilized) in Industrial Biotransformation Process	3859
	References	3827	16.4.4.1	Production of Epoxides Using Monooxygenase	3859
16	Reactions on Immobilized Biocatalysts	3831	16.4.4.2	Production of Malic Acid Using Fumarase	3859
	<i>Annett Horn, Shefali Kumar, Andreas Liese, and Udo Kragl</i>		16.5	Conclusion and Outlook	3860
16.1	Introduction	3831		References	3862
16.1.1	A Short History of Biotransformations	3831		Index	3867
16.1.2	Need for Immobilization	3833			
16.2	Characterization of Immobilized Biocatalysts	3833
