

Contents

1 Introduction	7
1.1 Why This Report Has Been Written	7
1.2 Geographical Focus	7
1.3 Period under Review	7
1.4 Definitions and Scope	7
1.5 Structure of the Report	8
1.6 The Author	8
1.7 Sources of Information	8
2 Executive Summary and Conclusions	10
3 Background to the Fillers and Modifiers Businesses	14
4 Important Characteristics of Fillers	19
4.1 Cost	19
4.2 Chemical Composition	20
4.3 Specific Gravity	21
4.4 Powder Handling Properties	22
4.4.1 Bulk Density	22
4.4.2 Flowability	23
4.5 Hardness	23
4.6 Thermal Properties	24
4.6.1 Thermal Conductivity	24
4.6.2 Coefficient of Thermal Expansion	24
4.6.3 Thermal Stability	24
4.7 Optical Properties	25
4.8 Morphology (Particle Size and Shape)	26
4.8.1 Particle Size	27
4.8.2 Specific Surface Area (SSA)	29
4.8.3 Particle Shape	29
4.8.4 Oil Absorption (OA) and Particle Packing	30
5 Filler Surface Chemistry and Modification	33
5.1 Introduction	33
5.2 Non-Coupling Modifiers	34
5.2.1 Fatty Acids	34
5.2.2 Other Non-Coupling Modifiers	35
5.3 Coupling Agents	35
5.3.1 Organo-Silanes	36
5.3.2 Functionalised Polymers	37
5.3.3 Other Coupling Agents	39
5.4 Methods of Using Surface Modifiers	39
5.5 Use of Modifiers and the Monolayer Concept	40
5.5.1 Determination of the Actual Requirement	42
5.5.1.1 Viscosity Reduction of a Suspension	43
5.5.1.2 Settling Volume of a Suspension	43
5.5.1.3 Adsorption Isotherms	44
5.5.1.4 Dye Adsorption	45
5.6 Cost of Using Surface Modifiers	45
5.6.1 Modifier Costs	45
5.6.2 Benefits of Surface Modification	46

6 Principal Filler Types	47
6.1 Mineral Fillers Produced Directly from Natural Sources	47
6.1.1 Natural Carbonates	47
6.1.1.1 Calcium Carbonate (CaCO_3)	47
6.1.1.2 Dolomite ($\text{CaCO}_3 \cdot \text{MgCO}_3$)	48
6.1.1.3 Magnesite MgCO_3	48
6.1.2 Natural Crystalline Silicas, Quartz Etc.	48
6.1.3 Diatomaceous Earths	49
6.1.4 Talcs	50
6.1.5 Clays	51
6.1.5.1 Nanoclays	53
6.1.6 Mica	53
6.1.7 Wollastonite	53
6.1.8 Natural Fibres	54
6.1.8.1 Wood flours	55
6.1.8.2 Natural Fibres	55
6.2 Synthetic Fillers	55
6.2.1 Carbon Black	55
6.2.2 Synthetic Silicas	59
6.2.2.1 Fumed Silica	59
6.2.2.2 Precipitated Silica	60
6.2.3 Precipitated Calcium Carbonate (PCC)	62
6.2.4 Alumina Trihydrate (ATH)	63
6.2.5 Magnesium Hydroxide	64
6.2.6 Nanofillers	64
7 Principal Modifiers	67
7.1 Fatty Acids	67
7.2 Organo-silanes	68
7.3 Functionalised Polymers	69
7.4 Other Modifiers (Titanates, Solplus etc)	69
8 Markets	70
8.1 Compounders	70
8.2 End User Markets by Filler	71
8.2.1 Carbon Black	71
8.2.2 Precipitated Silica	72
8.2.3 Fumed Silica	73
8.2.4 Precipitated Calcium Carbonate (PCC)	74
8.2.5 Aluminium Hydroxide (Alumina trihydrate, ATH)	75
8.2.6 Magnesium Hydroxide	76
8.2.7 Natural Calcium Carbonates	76
8.2.8 Talcs	77
8.2.9 Kaolins (Clays)	77
8.2.10 Nanoclays	78
8.2.11 Crystalline Silicas (Quartz and cristobalite)	78
8.2.12 Wollastonite	79
8.2.13 Barium Sulphate	79
8.2.14 Natural Fibres	79
8.3. Markets by Application	81
8.3.1 Automotive	81
8.3.1.1 Non-Tyre Applications	81
8.3.1.2 Tyres	82
8.3.2 Fire Retardancy	85
8.3.3 Electric Cables	87
8.3.4 Footwear	89
8.3.5 Flooring	89
8.3.6 Solid Surfaces	90
8.3.7 Household Appliances or White Goods	90

8.3.8 Breathable or Microporous Film	90
8.3.9 Packaging	91
8.3.9.1 Flexible Packaging	91
8.3.9.2 Polymer Foam	91
8.3.9.3 Rigid Packaging.....	92
8.3.10 Sealants.....	92
8.3.11 Masterbatch Production.....	92
8.3.12 Anti-Block Additives.....	93
8.3.13 Wood Polymer Composites	93
8.4 Markets by Polymer	94
8.4.1 Thermoplastics	94
8.4.2 Thermosets.....	95
8.4.3 Elastomers.....	97
8.5 Markets for Surface Modifiers.....	98
8.5.1 Fatty Acids.....	99
8.5.2 Organo-silanes	99
8.5.3 Functionalised Polymers	100
9 Supply and Demand Issues, Threats and Opportunities.....	102
10 Filler and Modifier Companies.....	106
10.1 Natural Product Fillers	106
10.2 Synthetic Product Fillers	106
10.2.1 Nanoclays	107
10.3 Organo-silane Coupling agents	107
10.4 Functionalised polymeric modifiers	107
10.5 Fatty Acids	107
10.6 Other Modifiers	107
11 Abbreviations and Acronyms	108
12 Useful Further Reading	110
