MAINTENANCE PRACTICES

Revision Log	iii
Measurement Standards	iv
Basic Knowledge Requirements	v
Part 66 Basic Knowledge Requirements	vi
Table of Contents	ix

7.1 - SAFETY PRECAUTIONS — AIRCRAFT AND WORKSHOP 1.1

Safety Around Electricity	1.1
Fire Safety Around Electricity	1.1
Safety Around Compressed Gases	1.2
Oxygen Safety Considerations	1.2
Safety Around Hazardous Materials	1.2
Safety Around Machine Tools	1.3
Fuel Tank Entry Procedures and Precautions	1.4
Fuel Tank Entry Procedures and Precautions	1.4
Chemical Hazards	1.4
Physical Hazards	1.4
Preparation for Entry	1.5
Ensuring Adequate Ventilation	1.5
Ventilation Techniques	1.5
Monitoring Air in Fuel Tanks	1.5
Conditions Required for Entry	1.5
Communication	1.5
Respiratory Protection	1.5
Electrically Powered Equipment	1.5
Airplane Damage Considerations	1.6
Ballistic Recovery Systems	1.6
Awareness and Precautions Regarding Ballistic	
Recovery Systems	1.6
Basic Understanding	1.6
Primary Components	1.6
Safety Around Ballistic Recovery Systems	1.6
Inspection and Maintenance	1.6
Installation and Removal	1.7
Fire Safety	1.7
Requirements for a Fire to Occur	1.7
Classification of Fires	1.7
Ordinary Combustibles	1.7
Flammable Liquid and Gas	1.8
Electrical	1.8
Metal	1.8
Cooking Oils	1.8
European Standards	1.8
Fire Extinguishers	1.9
Identifying Fire Extinguishers	1.11
Inspection of Fire Extinguishers	1.11
Using Fire Extinguishers	1.12
Flight Line Safety	1.12
Hearing Protection	1.12
Foreign Object Damage (FOD)	1.12
Safety Around Airplanes	1.12
Safety Around Helicopters	1.12
Submodule 1 Practice Questions	1.13
Submodule 1 Practice Answers	1.14

7.2 - WORKSHOP PRACTICES.....2.1

Care and Control of Tools; Use of Workshop Materials.	2.1
Care of Tools	2.1
Benches	2.1
Vices	2.1
Drilling Machines	2.1
Grinder	2.1
Motor Drives	2.2
Measuring Instruments	2.2
Drills and Reamers	2.2
Control of Tools	2.2
Tool Control Procedures	2.2
Workshop Materials	2.3
Dimensions, Allowances and Tolerances; Workmanship	
Standards	2.3
Dimensions, Allowances, and Tolerances	2.3
Standards of Workmanship	2.4
Tool Calibration	2.4
Submodule 2 Practice Questions	2.7
Submodule 2 Practice Answers	2.8

7.3 - TOOLS.....3.1

Common Hand Tools	3.1
Screwdrivers	3.1
Pliers and Plier-Type Cutting Tools	3.2
Clamps and Vises	3.3
C-Clamps	3.3
Vises	3.3
Hammers and Mallets	3.3
Punches	3.4
Wrenches	3.4
Open-End Wrenches	3.5
Box-End Wrenches	3.5
Socket Wrenches	3.5
Adjustable Wrenches	3.5
Special Wrenches	3.5
Strap Wrenches	3.6
Impact Wrenches	3.7
Torque Wrenches	3.7
Torque Tables	3.8
Cutting Tools	3.8
Hand Snips	3.9
Metal Shears	3.10
Hacksaws	3.10
Chisels	3.10
Files	3.11
File Types and Use	3.12
Commonly Used Files	3.12
Care of Files	3.13
Burring Tools	3.13
Reamers	3.13
Taps and Dies	3.14
Common Power Tools	3.16
Saws	3.16
Circular Cutting Saws	3.16
Kett Saw	3.16

TABLE OF CONTENTS

Pneumatic Circular-Cutting Saw	3.16	Twist Drill Bits	3.29
Reciprocating Saw	3.16	Cobalt Alloy Drill Bits	3.29
Die Grinders	3.17	Step Drill Bits	3.29
Cut-Off Wheels	3.17	Twist Drill Construction and Sizes	3.29
Nibblers	3.17	Drill Bit Sizes	3.30
Table Top, and Bench Tools	3.17	Hole Drilling Techniques	3.31
Notchers	3.17	Drilling Large Holes	3.34
Band Saws	3.17	Drill Lubrication	3.34
Metal Shears	3.18	Drill Accessories	3.34
Throatless Shears	3.18	Drill Stops	3.34
Scroll Shears	3.18	Drill Bushings	3.34
Rotary Punch Press	3.18	Drill Bushing Holder	3.34
Foot Operated Shears	3.18	Precision Measuring Tools	3.35
Squaring Shears	3.18	Rules	3.35
Sanders	3.19	Combination Sets	3.35
Disk Sander	3.19	Scriber	3.35
Belt Sander	3.19	Dividers and Pencil Compasses	3.35
Grinders	3.19	Calipers	3.36
Grinding Wheels	3.20	Micrometer Calipers	3.37
Bending Tools	3.20	Micrometer Parts	3.37
Bar Folding Machine	3.21	Reading a Micrometer	3.37
Cornice Brake	3.21	Vernier Scale	3.38
Box and Pan Brake	3.21	Using a Micrometer	3.38
Press Brake	3.22	Dial Indicator	3.39
Slip Roll Former	3.22	Slide Calipers	3.39
Rotary Machine	3.23	Lubrication Equipment	3.39
Shrinking, Stretching Tools and Procedures	3.23	Electrical Test Equipment	3.40
Shrinking Tools	3.23	DC Measuring Equipment	3.40
Stretching Tools	3.24	D'arsonval Meter Movement	3.40
Forming Tools and Procedures	3.24	Current Sensitivity and Resistance	3.41
Stretch Forming	3.24	Dampening	3.41
Drop Hammer	3.24	Electrical Dampening	3.41
Hydropress Forming	3.24	Mechanical Dampening	3.41
Spin Forming	3.24	Multirange Ammeter	3.42
Forming with an English Wheel	3.25	Precautions	3.42
Piccolo Former	3.25	Voltmeters	3.42
Manual Sheet Metal Shrinker	3.25	Voltmeter Sensitivity	3.42
Hand-Operated Shrinker/Stretchers	3.26	MultiRange Voltmeters	3.42
Forming Blocks	3.26	Voltmeter Circuit Connections	3.43
Dollies and Stakes	3.26	Influence of the Voltmeter in the Circuit	3.43
Hardwood Form Blocks	3.26	Ohmmeter	3.43
V-Blocks	3.26	Zero Adjustment	3.43
Shrinking Blocks	3.26	Ohmmeter Scale	3.43
Sandbags	3.26	Multirange Ohmmeter	3.44
Hammers and Mallets	3.26	Megger (Megohmmeter)	3.44
Drilling	3.26	AC Measuring Equipment	3.45
Portable Power Drills	3.27	Electrodynamometer Meter Movement	3.46
Pneumatic Drill Motors	3.27	Moving Iron Vane Meter	3.46
Angled Drill Motors	3.27	Inclined Coil Iron Vane Meter	3.47
Two Hole Drill Motors	3.27	Varmeters	3.47
Drill Extension and Adapters	3.27	Wattmeter	3.47
Extension Drill Bits	3.27	Oscilloscope	3.47
Angle Adapters	3.28	Horizontal Deflection	3.48
Snake Attachment	3.28	Vertical Deflection	3.49
Drill Press	3.28	Tracing a Sine Wave	3.49
Types of Drill Bits	3.28	Control Features on an Oscilloscope	3.49

TABLE OF CONTENTS

Flat Panel Color Displays for Oscilloscopes	3.50	Applied Geometry	5.7
Digital Multimeters	3.50	Orthographic Projection	5.7
Basic Circuit Analysis and Troubleshooting	3.51	Detail View	5.9
Voltage Measurement	3.51	Pictorial Drawings	5.9
Current Measurement	3.51	Perspective Drawings	5.10
Checking Resistance	3.52	Isometric Drawings	5.10
Continuity Checks	3.52	Oblique Drawings	5.10
Capacitance Measurement	3.52	Exploded View Drawings	5.10
Inductance Measurement	3.53	Lines and Their Meanings	5.11
Troubleshooting the Open Faults in Series Circuits	3.53	Centerlines	5.12
Tracing Opens with the Voltmeter	3.54	Dimension Lines	5.12
Tracing Opens with the Ohmmeter	3.54	Extension Lines	5.12
Troubleshooting the Shorting Faults in Series Circuits	3.54	Sectioning Lines	5.12
Tracing Shorts with the Ohmmeter	3.55	Phantom Lines	5.13
Tracing Shorts with the Voltmeter	3.55	Break Lines	5.13
Troubleshooting the Open Faults in Parallel Circuits	3.55	Leader Lines	5.13
Tracing an Open with an Ammeter	3.56	Hidden Lines	5.13
Tracing an Open with an Ohmmeter	3.56	Outline or Visible Lines	5.13
Troubleshooting the Shorting Faults in Parallel Circuits	3.56	Stitch Lines	5.13
Troubleshooting the Shorting Faults in		Cutting Plane and Viewing Plane Lines	5.13
Series-Parallel Circuits	3.56	Drawing Symbols	5.13
Tracing Opens with the Voltmeter	3.57	Material Symbols	5.13
Submodule 3 Practice Questions	3.59	Shape Symbols	5.14
Submodule 3 Practice Answers	3.60	Electrical Symbols	5.14
Submodule 3 Practice Questions	3.61	Reading and Interpreting Drawings	5.14
Submodule 3 Practice Answers	3.62	Drawing Sketches	5.16
		Sketching Techniques	5.16
7.4 - RESERVED	4.1	Basic Shapes	5.16
This submodule is reserved by EASA for future use.	4.1	Repair Sketches	5.16
		Care of Drafting Tools	5.16
7.5 - ENGINEERING DRAWINGS, DIAGRAMS, AND STANDARDS 5.1		Title Blocks	5.16
Purpose and Function of Aircraft Drawings	5.1	Drawing or Print Numbers	5.17
Drawings and Diagrams; Symbols, Dimensions, Tolerances, and		Reference and Dash Numbers	5.17
Projections	5.1	Computerized Presentations	5.17
Drawing Types	5.1	Microfilm and Microfiche	5.17
Detail Drawings	5.1	Digital Images	5.18
Assembly Drawings	5.2	Specification 100 of the Air Transport Association (ATA)	5.18
Installation Drawings	5.2	ATA 100 and iSpec 2200	5.18
Sectional View Drawings	5.2	Aeronautical Standards	5.19
Full Section	5.2	ISO	5.19
Half Section	5.2	AN (Army/Navy)	5.20
Revolved Section	5.2	MS (Military Standard)	5.20
Removed Section	5.2	NAS (National Aerospace Standard)	5.20
Universal Numbering System	5.2	BS (British Standards)	5.20
Drawing Standards	5.2	Wiring and Schematic Diagrams	5.20
Bill of Material	5.2	Diagrams	5.20
Other Drawing Data	5.2	Installation Diagrams	5.20
Revision Block	5.2	Schematic Diagrams	5.20
Notes	5.6	Block Diagrams	5.20
Zone Numbers	5.7	Wiring Diagrams (Schematics)	5.20
Station Numbers and Location Identification on Aircraft	5.7	Flowcharts	5.20
Allowances and Tolerances	5.7	Troubleshooting Flowchart	5.20
Finish Marks	5.7	Logic Flowchart	5.20
Scale	5.7	Graphs and Charts	5.21
Application	5.7	Reading and Interpreting Graphs and Charts	5.21
Methods of Illustration	5.7	Nomograms	5.21

TABLE OF CONTENTS

Submodule 5 Practice Questions	5.27
Submodule 5 Practice Answers	5.28

7.6 - FITS AND CLEARANCES6.1

Drill Sizes for Bolt Holes; Classes of Fits	6.1
Accuracy of Drilled Holes	6.1
Classes of Fit	6.1
Common System of Fits and Clearances.	6.2
Newall System	6.2
British Standards BS 4500 System	6.2
BS 4500 Definitions:	6.2
BS 4500 Basic Hole System.	6.4
BS 4500 Basic Shaft System	6.4
Basic Hole Method - Metric	6.4
Dimensions, Allowances and Tolerances	6.4
Dimensions	6.4
Allowances.	6.5
Tolerances	6.5
Unilateral and Bilateral Tolerances	6.5
Baseline and Continued Tolerances.	6.5
Schedule of Fits and Clearances	6.5
Limits for Bow, Twist and Wear	6.6
Limits for Bow.	6.6
Limits for Twist	6.6
Limits for Wear	6.6
Limits for Ovality	6.6
Standard Methods for Checking Shafts, Bearings, and Other Parts	6.6
Checking for Bow	6.6
Clearance Measured By Feeler Gauges	6.6
Checking for Twist	6.6
Piston Engine Connecting Rod Twist.	6.7
Checking for Ovality	6.7
Submodule 6 Practice Questions.	6.9
Submodule 6 Practice Answers	6.10

7.7 - ELECTRICAL WIRING INTERCONNECT SYSTEM (EWIS).....7.1

Continuity, Insulation, Bonding, and Testing	7.1
Continuity	7.1
Insulation	7.1
Bonding and Grounding	7.2
Grounding	7.2
Bonding	7.3
Testing of Bonds and Grounds	7.3
Bonding Jumper Installation	7.3
Stripping and Crimping Tools; Hand and Hydraulic	7.4
Stripping Wire	7.4
Terminal Strips	7.5
Terminal Lugs	7.5
Copper Wire Terminals.	7.6
Aluminum Wire Terminals	7.6
Pre-Insulated Splices	7.6
Emergency Splicing Repairs	7.6
Crimping Tools	7.6
Inspection and Testing of Crimped Joints.	7.7
Connector Pin Removal and Insertion	7.7

Insertion.	7.7
Removal	7.7
Adjacent Locations	7.8
Sealing	7.8
Drainage	7.8
Wire Support	7.8
Coaxial Cables; Testing and Installation	7.8
Testing Coaxial Cable	7.10
Identification of Wire Types, Inspection and Damage Tolerance	7.10
Identification of Wire Types	7.10
Placement of Identification Markings.	7.10
Types of Wire Markings	7.10
Wire Inspection	7.11
Wire Protection: Cable Looms and Support, Clamps, Heat Shrink Wrap and Shielding.	7.11
Wire Bundles and Routing	7.11
Slack in Wire Bundles	7.12
Twisting Wires.	7.12
Spliced Connections In Wire Bundles	7.12
Lacing and Tying Wire Bundles	7.13
Bend Radii.	7.13
Wire Protection	7.14
Protection Against Chafing.	7.14
Protection Against High Temperature	7.14
Protection Against Solvents and Fluids	7.14
Protection of Wires in Wheel Well Areas.	7.15
Clamp Installation.	7.15
Wire and Cable Clamp Inspection	7.17
Movable Controls Wiring Precautions	7.17
Conduit	7.17
Rigid Conduit	7.18
Flexible Conduit	7.18
Heat Shrink Wrapping	7.18
Wire Shielding	7.19
Junction Boxes	7.19
High-Intensity Radiated Fields (HIRF) Protection Principles	7.20
HIRF Protection	7.20
Soldering Electrical Wires.	7.21
Soldering and Spacing of Wires	7.21
Soldering Wires to a Circuit Board	7.22
Soldering Wires to a Connector	7.22
EWIS Installation, Repair, Maintenance and Cleanliness.	7.22
EWIS Standards	7.22
EWIS Inspection, Repair and Maintenance.	7.23
EWIS Cleaning Requirements and Methods.	7.24
Submodule 7 Practice Questions.	7.25
Submodule 7 Practice Answers	7.26

7.8 - RIVETS.....8.1

Riveted Joints, Rivet Spacing, and Pitch.	8.1
Solid Shank Rivets.	8.1
Rivet Head Shape	8.1
Rivet Construction	8.1
Solid Rivet Types.	8.1
Rivet Strength	8.2

TABLE OF CONTENTS

Stresses Applied to Rivets	8.3	Double Flaring	9.4
Rivet Length	8.3	Beading	9.4
Repair Layout	8.3	Flexible Hoses	9.6
Rivet Spacing	8.3	Flexible hose Size Designations	9.6
Edge Distance	8.4	Fabrication and Replacement of Flexible Hoses	9.6
Rivet Pitch	8.4	Inspection and Testing of Pipes and Hoses	9.6
Transverse Pitch	8.4	Rigid Tubing Inspection	9.6
Rivet Layout Example	8.5	Flexible Hose Inspection	9.6
Tools Used for Riveting and Dimpling	8.5	Flexible Hose Testing	9.6
Hand Tools	8.5	Installation of Pipes and Hoses	9.6
Rivet Cutter	8.5	Rigid Tube Installation and Inspection	9.6
Bucking Bar	8.5	Connection and Torque	9.8
Hand Rivet Set	8.6	Flareless Tube Installation	9.8
Dimple Dies	8.6	Hose Clamps	9.9
Chip Chasers	8.6	Installation of Flexible Hose Assemblies	9.10
Powered Tools	8.6	Submodule 9 Practice Questions	9.13
Pneumatic Rivet Gun	8.6	Submodule 9 Practice Answers	9.14
Rivet Sets and Headers	8.7		
Microshavers	8.8	7.10 - SPRINGS	10.1
Compression Riveting	8.8	Inspection and Testing of Springs	10.1
Reusable Sheet Metal Fasteners	8.8	Visual Inspection	10.1
Cleco Fasteners	8.9	Static Measurement	10.1
Hex Nut and Wing Nut Fasteners	8.9	Corrosion	10.1
Riveting Procedures	8.9	Overheating	10.1
Universal Head Rivets	8.9	Fatigue	10.1
Hole Transfer	8.9	Load Deflection	10.2
Hole Preparation	8.9	Squareness Inspection of Valve Springs	10.2
Drilling	8.9	Submodule 10 Practice Questions	10.3
Driving the Rivet	8.10	Submodule 10 Practice Answers	10.4
Countersunk Rivets	8.10		
Countersink Tools	8.10	7.11 - BEARINGS	11.1
Dimpling	8.11	Testing, Cleaning, and Inspection of Bearings	11.1
Coin Dimpling	8.11	Testing Bearings	11.1
Radius Dimpling	8.12	Cleaning the Wheel Bearings	11.1
Hot Dimpling	8.12	Wheel Bearing Inspection	11.1
Dimpling Inspection	8.12	Lubrication Requirements of Bearings	11.3
Blind Rivets	8.13	Bearing Handling and Lubrication	11.3
Friction-Locked Blind Rivets	8.13	Lubricants	11.3
Mechanical-Lock Blind Rivets	8.13	Types of Lubricants	11.3
Removal of Mechanically-Locked Blind Rivets	8.14	Hydrodynamic Lubrication	11.3
Inspection of Riveted Joints	8.15	Boundary Lubrication	11.4
Removal of Rivets	8.15	Hydrostatic Lubrication	11.4
Replacing Rivets	8.16	Solid Film	11.4
Double Flush Riveting	8.16	Storage	11.4
Submodule 8 Practice Questions	8.19	Defects in Bearings and Their Causes	11.4
Submodule 8 Practice Answers	8.20	Contamination and Corrosion	11.4
		Electric Current Damage	11.4
7.9 - PIPES AND HOSES	9.1	Submodule 11 Practice Questions	11.5
Metal Tubes and Pipes	9.1	Submodule 11 Practice Answers	11.6
Bending and Belling/Flaring Aircraft Pipes	9.1		
Tubing Sizes	9.1	7.12 - TRANSMISSIONS	12.1
Tube Cutting	9.1	Inspection of Gears, Backlash	12.1
Tube Bending	9.2	Gears	12.1
Alternative Bending Methods	9.2	Lash and Pattern	12.1
Tube Flaring	9.3	Inspection of Belts and Pulleys, Chains and Sprockets	12.2
Rolling Type Flaring Tools	9.4	Belts and Pulleys	12.2

TABLE OF CONTENTS

Chains and Sprockets	12.2	Layout Method	14.15
Inspection of Screw Jacks, Lever Devices, and Push-Pull Rod Systems	12.3	Open and Closed Bends	14.15
Jack Screws	12.3	Open End Bend (Less Than 90°)	14.15
Levers	12.3	Closed End Bend (More Than 90°)	14.16
Push-pull Rod Systems	12.3	Hand Forming	14.16
Submodule 12 Practice Questions	12.5	Straight Line Bends	14.16
Submodule 12 Practice Answers	12.6	Formed or Extruded Angles	14.16
7.13 - CONTROL CABLES	13.1	Stretching with V-Blocks	14.16
Swaging of End Fittings	13.1	Shrinking with the V-Blocks and Shrinking Blocks	14.17
Splicing	13.2	Flanged Angles	14.17
Swaged Ball Terminals	13.2	Shrinking	14.17
Cable Slippage In Terminal	13.2	Stretching	14.18
Nicopress® Swaged End Fittings	13.2	Curved Flanged Parts	14.18
Inspection and Testing of Cables	13.4	Concave Surfaces	14.19
Manufacturer Wire Splices	13.7	Convex Surfaces	14.20
Testing Cable Tension	13.7	Forming By Bumping	14.20
Tension Regulators	13.7	Form Blocks or Dies	14.20
Spring-Back	13.7	Sandbag Bumping	14.21
Aircraft Flexible Control Systems	13.7	Juggling	14.22
Cable System Installation	13.7	Lightening Holes	14.23
Cable Guides	13.7	Flanging Lightening Holes	14.23
Travel Adjustments	13.8	Working Stainless Steel	14.23
Bowden Cable Systems	13.8	Inconel® Alloys 625 and 718	14.23
Teleflex Cable Systems	13.9	Working Magnesium	14.23
Adjustment of Teleflex End Fittings	13.9	Working Titanium	14.25
Submodule 13 Practice Questions	13.11	Description of Titanium	14.25
Submodule 13 Practice Answers	13.12	Inspection of Sheet Metal Work	14.26
7.14 - MATERIAL HANDLING	14.1	Inspection of Riveted Joints	14.26
7.14.1 - Sheet Metal	14.1	Inspection for Corrosion	14.27
Marking out and Calculations of Bend Allowances	14.1	Composite and Non-Metallic	14.27
Terminologies	14.1	Bonding Practices	14.27
Layout or Flat Pattern Development	14.2	Bonding Methods	14.27
Making Straight Line Bends	14.2	Thermoplastic Adhesives	14.27
Bending a U-Channel	14.3	Thermosetting Adhesives	14.27
Using a Formula To Calculate the Setback	14.4	Environmental Conditions	14.28
Using a Setback Chart To Find the Setback	14.4	Inspection Methods	14.28
Formula 1: Bend Allowance for a 90° Bend	14.6	Visual Inspection	14.28
Formula 2: Bend Allowance for a 90° Bend	14.6	Tap Testing	14.28
Using a Bend Allowance Chart for a 90° Bend	14.6	Ultrasonic Inspection	14.28
Using a Chart for Other Than a 90° Bend	14.7	Electrical Conductivity	14.28
Using a J-Chart To Calculate Total Developed Width	14.8	7.14.3 - Additive Manufacturing	14.29
How To Find the Total Developed Width Using a J-Chart	14.9	Common Additive Manufacturing Techniques	14.29
Sheet Metal Working (Bending and Forming)	14.10	Additive Manufacturing Techniques	14.29
Sheet Metal Forming Process	14.10	Methods of Additive Manufacturing	14.29
Forming Operations and Terms	14.11	Vat Photopolymerization	14.29
Stretching	14.11	Material Jetting	14.29
Shrinking	14.11	Binder Jetting	14.29
Bumping	14.11	Material Extrusion	14.29
Crimping	14.11	Ultrasonic Additive Manufacturing	14.29
Folding Sheet Metal	14.12	Powder Bed Fusion	14.29
Using a Sheet Metal Brake To Fold Metal	14.12	Directed Energy Deposition	14.29
Folding a Box	14.13	Finishing Parts after Printing	14.29
Relief Hole Location	14.14	Mechanical Properties of Finished Parts	14.30
		Inspection of Additive Manufactured Parts and Common Production Failures	14.30
		Common Production Failures	14.30

TABLE OF CONTENTS

Inspection of Additive Manufactured Parts	14.31	Section B	16.18
Ultrasonic Testing	14.31	Preparation of Aircraft for Weighing	16.18
Radiographic Testing	14.31	Weight and Balance Equipment	16.18
CT Scans	14.31	Scales	16.18
Eddy Current Testing	14.31	Spirit Level.	16.19
Submodule 14 Practice Questions	14.33	Plumb Bob	16.19
Submodule 14 Practice Answers	14.34	Hydrometer	16.19
7.15 - RESERVED.....	15.1	Preparing an Aircraft for Weighing	16.20
This submodule is reserved by EASA for future use.	15.1	Fuel System	16.20
7.16 - AIRCRAFT WEIGHT AND BALANCE.....	16.1	Oil System	16.20
Section A	16.1	Miscellaneous Fluids	16.20
Calculation of Center of Gravity Limit / Balance Limits: Use.	16.1	Flight Controls.	16.20
of Relevant Documents	16.1	Other Considerations	16.20
Aircraft Weight and Balance.	16.1	Weighing Points	16.21
Need and Requirements for Aircraft Weighing	16.1	Weight and Balance for Large Airplanes	16.21
Weight and Balance Terminology	16.2	Weighing an Aircraft.	16.21
Datum	16.2	Jacking the Aircraft	16.21
Arm	16.2	Leveling the Aircraft.	16.21
Moment	16.2	Safety Considerations	16.21
Center of Gravity.	16.3	Built-In Electronic Weighing	16.22
Maximum Weight	16.3	Helicopter Weighing	16.22
Empty Weight	16.3	Submodule 16 Practice Questions	16.25
Empty Weight Center of Gravity	16.4	Submodule 16 Practice Answers	16.26
Useful Load	16.4	7.17 - AIRCRAFT HANDLING AND STORAGE.....	17.1
Minimum Fuel.	16.4	Aircraft Taxiing/Towing and Associated Safety Precautions.	17.1
Tare Weight.	16.4	Engine Starting and Operations	17.1
Standard Weights for Aircraft Weight and Balance	16.4	Reciprocating Engines.	17.1
Procedures for Determining Weight and Balance.	16.4	Hand Cranking Engines	17.2
Weight and Balance Data	16.6	Turboprop Engines	17.3
Center of Gravity Range	16.6	Turboprop Starting Procedures	17.3
Empty Weight Center of Gravity Range.	16.8	Turbofan Engines	17.4
Operating Center of Gravity Range	16.9	Starting a Turbofan Engine.	17.4
Example Weight and Balance Computations	16.9	Auxiliary Power Units (APUs)	17.6
EWCG Formulas.	16.9	Unsatisfactory Turbine Engine Starts	17.6
Datum Forward of the Airplane – Nosewheel		Hot Start	17.6
Landing Gear.	16.10	False or Hung Starts	17.6
Datum Aft of the Main Wheels – Nosewheel		Engine Will Not Start.	17.6
Landing Gear.	16.10	Extinguishing Engine Fires	17.6
Location of Datum	16.10	Taxiing Aircraft.	17.6
Datum Forward of the Main Wheels – Tail Wheel Landing		Taxi Signals	17.7
Gear	16.10	Towing Aircraft.	17.7
Datum Aft of the Main Wheels – Tail Wheel		Aircraft Jacking, Chocking, Securing, and Associated	
Landing Gear.	16.10	Safety Precautions	17.10
Loading an Airplane for Flight.	16.11	Aircraft Jacking	17.10
Example Loading of an Airplane for Flight	16.11	Tiedown, Chocking and Securing.	17.11
Adverse-Loaded CG Checks.	16.12	Securing Light Aircraft	17.11
Weight and Balance Extreme Conditions.	16.12	Securing Heavy Aircraft	17.11
Equipment Change and Aircraft Alteration	16.12	Tiedown Procedures for Seaplanes	17.12
Example Calculations After an Equipment Change.	16.13	Tiedown Procedures for Skiplanes	17.12
The Use of Ballast	16.13	Tiedown Procedures for Helicopters.	17.13

7.18 - DISASSEMBLY, INSPECTION, REPAIR, AND

ASSEMBLY TECHNIQUES 18.1

Introduction	18.1
Section A	18.1
Types of Defects and Visual Inspection	18.1
Basic Inspection Techniques and Practices	18.1
Preparation	18.1
Aircraft Logs	18.2
Checklists	18.2
Publications	18.3
Manufacturers' Service Bulletins and Instructions	18.3
Maintenance Manuals	18.3
Overhaul Manual	18.3
Structural Repair Manual	18.3
Illustrated Parts Catalog	18.3
Visual Inspection Techniques	18.3
Types of Defects	18.3
External Damage	18.4
Inlets and Exhausts	18.4
Liquid Systems	18.4
Gaseous Systems	18.4
Landing Gear	18.5
System Indicators and Gauges	18.5
Probes	18.5

Handles, Latches, Panels and Doors	18.5
Other Inspection Items	18.5
Life Limited Items	18.6
Corrosion Removal, Assessment and Reprotection	18.6
Preventive Maintenance	18.6
Corrosion Removal	18.6
Surface Cleaning and Paint Removal	18.6
Corrosion of Ferrous Metals	18.7
Mechanical Removal of Iron Rust	18.7
Chemical Removal of Rust	18.8
Chemical Surface Treatment of Steel	18.8
Removal of Corrosion from Highly Stressed Steel Parts	18.8
Corrosion of Aluminum and Aluminum Alloys	18.8
Treatment of Unpainted Aluminum Surfaces	18.8
Treatment of Anodized Surfaces	18.9
Treatment of Intergranular Corrosion In Heat-Treated Aluminum Alloy Surfaces	18.9
Corrosion of Magnesium Alloys	18.9
Treatment of Wrought Magnesium Sheet and Forgings	18.10
Treatment of Installed Magnesium Castings	18.10
Corrosion of Titanium and Titanium Alloys	18.10
Protection of Dissimilar Metal Contacts	18.10
Contacts Not Involving Magnesium	18.10
Contacts Involving Magnesium	18.11
Corrosion Limits	18.11
Processes and Materials used in Corrosion Control Metal Finishing	18.11
Surface Preparation	18.11
Chemical Treatments	18.11
Anodizing	18.11
Alodizing	18.12
Chemical Surface Treatment and Inhibitors	18.12
Chromic Acid Inhibitor	18.12
Sodium Dichromate Solution	18.12
Protective Paint Finishes	18.12
Section B	18.12
General Repair Methods, Structural Repair Manual; Aging; Fatigue and Corrosion Control Programs	18.12
General Repair Methods	18.12
Inspection	18.13
Classification of Damage	18.13
Negligible Damage	18.13
Damage Repairable by Patching	18.14
Damage Repairable by Insertion	18.14
Damage Necessitating Replacement of Parts	18.14
Repairability of Sheet Metal Structure	18.14
Structural Support During Repair	18.14
Assessment of Damage	18.15
Maintaining Original Strength	18.15
Shear Strength and Bearing Strength	18.15
Maintaining Original Contour	18.15
Keeping Weight to a Minimum	18.15
Flutter and Vibration Precautions	18.15
Damage Removal	18.17
Repair Material Selection	18.17
Repair Parts Layout	18.17

TABLE OF CONTENTS

Rivet Selection	18.17	Acoustic Emission Inspection	18.44
Rivet Spacing and Edge Distance	18.17	Magnetic Particle Inspection.	18.44
Corrosion Treatment	18.17	Magnetic Particle Inspection Procedures	18.44
Sheet Metal Repair Methods	18.17	Development of Indications.	18.44
Repair of Stressed Skin Structure	18.17	Types of Discontinuities Disclosed	18.44
Patches	18.18	Preparation of Parts for Testing.	18.45
Lap or Scab Patch	18.18	Effects of Flux Direction	18.45
Flush Patch	18.18	Effects of Flux Density	18.46
Open and Closed Skin Area Repair	18.18	Magnetizing Methods	18.46
Design of a Patch for a Non-Pressurized Area	18.18	Identification of Indications.	18.46
Typical Repairs for Aircraft Structures.	18.19	Magnaglo Inspection	18.46
Floats	18.19	Magnetizing Equipment	18.47
Corrugated Skin Repair.	18.19	Fixed Nonportable Unit.	18.47
Replacement of a Panel	18.21	Portable Unit	18.47
Outside the Member	18.21	Indicating Mediums	18.48
Inside the Member.	18.21	Demagnetizing	18.48
Edges of the Panel	18.21	Demagnetizing Practice.	18.49
Repair of Lightening Holes.	18.22	Radiographic	18.49
Repairs to a Pressurized Area	18.22	Radiographic Inspection	18.49
Stringer Repair.	18.22	Preparation and Exposure	18.49
Former or Bulkhead Repair.	18.23	Radiation Hazards.	18.49
Longeron Repair	18.25	inspection of Composites.	18.50
Spar Repair	18.25	Tap Testing	18.50
Rib and Web Repair	18.26	Electrical Conductivity	18.50
Leading Edge Repairs.	18.26	Thermography	18.50
Trailing Edge Repairs	18.28	Section D	18.50
Specialized Repairs	18.29	Disassembly and ReAssembly Techniques	18.50
Inspection Openings	18.29	Replacement of Major Components and Modules	18.51
Structural Repair Manuals	18.29	Disassembly and Reassembly of Major Components	18.51
Aging, Fatigue and Corrosion Control Programs.	18.30	Disassembly and Reassembly of Minor Components	18.51
Section C	18.31	Basic Disassembly and Reassembly Techniques	18.52
Non-destructive Inspection Techniques	18.31	Discarding of Parts	18.52
Visual Inspection	18.31	Freeing Seized Components	18.52
Surface Cracks	18.34	Assembly	18.52
Borescopes	18.35	Section E	18.52
Liquid Penetrant	18.35	Trouble Shooting Techniques	18.52
Surface Drying.	18.35	Submodule 18 Practice Questions.	18.55
Interpretation of Penetrant Results	18.35	Submodule 18 Practice Answers	18.56
Color Contrast Penetrant Inspection	18.36	Submodule 18 Practice Questions.	18.57
Brightness Contrast.	18.36	Submodule 18 Practice Answers	18.58
Color Contrast.	18.36	7.19 - ABNORMAL EVENTS	19.1
False Indications	18.36	Special Inspections	19.1
Penetrant Precautions	18.37	Inspection following Lightning Strikes and HIRF	
Eddy Current Inspection.	18.37	Penetration.	19.1
Basic Principles	18.37	Lightning Strikes.	19.1
Principles of Operations	18.37	High Intensity Radiated Fields (HIRF) Penetration	19.2
Eddy Current Instruments	18.38	Specific Testing - HIRF	19.2
Ultrasonic Inspection.	18.39	HIRF Test Equipment	19.3
Pulse Echo	18.39	Signal Pulse Generators.	19.3
Through Transmission.	18.41	Pulse Amplifiers.	19.3
Resonance	18.41	RF Power Meters.	19.3
Ultrasonic Instruments	18.42	EMC Antennas	19.3
Reference Standards.	18.43	Inspection Following Heavy Landings or Flight Through	
Couplants.	18.43	Turbulence	19.3
Inspection of Bonded Structures.	18.44	Hard or Overweight Landings	19.3
Types of Defects.	18.44		

TABLE OF CONTENTS

Post Heavy Landing Inspection	19.3
Severe Turbulence Inspection	19.4
