Part I Layered silicates

1	Polyamide/clay nanocomposites	3
	M KATO and A USUKI, Toyota Central R&D Labs Inc., Japan	
1.1	Introduction	3
1.2	Nylon 6-clay hybrid (NCH)	4
1.3	Synthesis of nylon 6-clay hybrid (NCH)	4
1.4	Characterization of NCH	6
1.5	Crystal structure of NCH (Kojima, 1995)	12
1.6	Properties of NCH (Kojima, 1993a)	19
1.7	Synthesizing NCH using different types of clay (Usuki, 1995)	21
1.8	Improving the synthesis method of NCH	23
1.9	Other types of nylon	24
1.10	Conclusions	26
1.11	Future trends	27
1.12	References	27
2	Epoxy nanocomposites based on layered silicates and other nanostructured fillers	29
	O BECKER and G P SIMON, Monash University, Australia	
2.1	Introduction	29
2.2	Epoxy-layered silicate nanocomposites	31
2.3	Epoxy-nanocomposites based on other nanofillers	47
2.4	Ternary epoxy nanocomposite systems	48
2.5	Future trends	53
2.6	References	54

3	Biodegradable polymer/layered silicate nanocomposites	57
	S SINHA RAY and M BOUSMINA, Laval University, Canada	
3.1	Introduction	57
3.2	Definition and categories of biodegradable polymers	58
3.3	Properties and drawbacks of biodegradable polymers	59
3.4	Polymer/layered silicate nanocomposite technology	59
3.5	Structure and properties of layered silicates	62
3.6	Techniques used for the characterization of nanocomposites	63
3.7	Biodegradable polymers and their nanocomposites	64
3.8	Properties	86
3.9	Biodegradability	101
3.10	Melt rheology and structure-property relationship	106
3.11	Foam processing of biodegradable nanocomposites	115
3.12	Conclusions	117
3.13	Acknowledgements	119
3.14	References	119
4	Polypropylene layered silicate nanocomposites	130
	K JAYARAMAN and S KUMAR, Michigan State University, USA	
4.1	Introduction	130
4.2	Chemical compatibilization and compounding	131
4.3	Nanostructure	134
4.4	Performance	142
4.5	Conclusions	147
4.6	Acknowledgments	147
4.7	References	147
5	Polystyrene/clay nanocomposites	151
	D-R YEI, H-K FU and F-C CHANG, National Chiao-Tung University, Taiwan	
5.1	Introduction	151
5.2	Organically modified clay	152
5.3	Surface-initiated polymerization (SIP)	155
5.4	Syndiotactic polystyrene (s-PS)/clay nanocomposite	160
5.5	Properties of nanocomposites	163
5.6	Conclusions	169
5.7	References	169

6	Poly(ethyl acrylate)/bentonite nanocomposites	172
	T TANG, X TONG, Z FENG and B HUANG, Chinese Academy of Sciences, People's Republic of China	
6.1	Introduction	172
6.2	Materials and characterization	174
6.3	Synthesis of PEA/bentonite nanocomposites through <i>in situ</i> emulsion polymerization	175
6.4	Preparation and microstructure of casting-film of PEA/bentonite nanocomposites from emulsion	176
6.5	Performance of PEA/bentonite nanocomposites	179
6.6	Conclusions and future trends	184
6.7	Acknowledgments	185
6.8	References	186
7	Clay-acrylate nanocomposite photopolymers	188
	C DECKER, Université de Haute-Alsace, France	
7.1	Introduction	188
7.2	Synthesis of clay-acrylate nanocomposites	190
7.3	Properties of clay-acrylic nanocomposites	195
7.4	Conclusions	202
7.5	References	203
8	Nanocomposites based on water soluble polymers and unmodified smectite clays	206
	K E STRAWHECKER, Veeco Instruments Inc, USA and E MANIAS, The Pennsylvania State University, USA	
8.1	Introduction	206
8.2	Dispersion of Na ⁺ montmorillonite in water soluble polymers	207
8.3	Crystallization behavior	211
8.4	Overview of nanocomposite structure and crystallization behavior	221
8.5	Materials properties of poly(vinyl alcohol)/Na ⁺ montmorillonite nanocomposites	222
8.6	Conclusions	231
8.7	References	231
9	Poly(butylene terephthlate) (PBT) based nanocomposites	234
	C-S HA, Pusan National University, Korea	
9.1	Introduction	234
9.2	Impact modification of PBT by blending	235

9.3	PBT/organoclay nanocomposite	239
9.4	EVA/organoclay nanocomposite	242
9.5	PBT/EVA-g-MAH/organoclay ternary nanocomposite	247
9.6	Conclusions	251
9.7	Acknowledgments	254
9.8	References	254
10	Flammability and thermal stability of polymer/ layered silicate nanocomposites	256
	M ZANETTI, University of Turin, Italy	
10.1	Introduction	256
10.2	Nanocomposites and fire	257
10.3	Flame retardant mechanism	257
10.4	Nanocomposites and conventional flame retardants	265
10.5	Conclusion and future trends	267
10.6	References	268
11	Barrier properties of polymer/clay nanocomposites	273
	A SORRENTINO, G GORRASI, M TORTORA and V VITTORIA, University of Salerno, Italy	
11.1	Introduction	273
11.2	Background on polymer barrier properties	273
11.3	Experimental methods	277
11.4	Permeation and diffusion models relevant to polymer nanocomposites	279
11.5	Polymer nanocomposites diffusivity	282
11.6	Polymer nanocomposites sorption	286
11.7	Polymer nanocomposites permeability	287
11.8	Conclusions and future trends	291
11.9	References	292
12	Rubber-clay nanocomposites	297
	A MOHAMMAD and G P SIMON, Monash University, Australia	
12.1	Introduction	297
12.2	Overview of rubbers (elastomers)	297
12.3	Fillers predominantly used in the rubber industry	302
12.4	Rubber crosslinking systems	304
12.5	Types of rubber-clay nanocomposite structure	305
12.6	Comparison of properties achieved in rubber-clay nanocomposites	317
12.7	Conclusions	321
12.8	References	322

Part II Nanotubes, nanoparticles and inorganic-organic hybrid systems

13	Single-walled carbon nanotubes in epoxy composites	329
	K LIAO and Y REN, Nanyang Technological University, Singapore and T XIAO, Shantou University, People's Republic of China	
13.1	Introduction	329
13.2	Mechanical properties: elastic properties and strength	331
13.3	Carbon nanotube – polymer interface	337
13.4	Long-term performance of unidirectional CNT/epoxy composites	346
13.5	Conclusions	353
13.6	References	354
14	Fullerene/carbon nanotube (CNT) composites	359
	T KUZUMAKI, The University of Tokyo, Japan	
14.1	Introduction	359
14.2	Fabrication of the composite by the drawing process	362
14.3	Fabrication of the composite by ultra high-pressure sintering	372
14.4	Application potential	378
14.5	Conclusions	386
14.6	References	386
15	Filled polymer nanocomposites containing functionalized nanoparticles	389
	O OK PARK, J H PARK and T-H KIM, Korea Advanced Institute of Science and Technology, Korea and Y T LIM, Korea Research Institute of Bioscience and Biotechnology, Korea	
15.1	Introduction	389
15.2	Organic and polymer materials for light-emitting diodes	389
15.3	Luminescent polymer for device applications	391
15.4	Photo-oxidation of emitting polymers	393
15.5	Nanoparticles approaches to enhance the lifetime of emitting polymers	396
15.6	Conclusions and future trends	409
15.7	References	409

16	Polymer/calcium carbonate nanocomposites	412
	X LU, Nanyang Technological University, Republic of Singapore and T LIU, Institute of Advanced Materials, People's Republic of China	
16.1	Introduction	412
16.2	Preparation and surface modification of nano-CaCO ₃	413
16.3	Fabrication of polymer/CaCO ₃ nanocomposites	417
16.4	Characterization	420
16.5	Applications	433
16.6	Conclusion and future trends	434
16.7	References	435
17	Magnetic polymer nanocomposites	440
	A MILLAN and F PALACIO, University of Zaragoza, Spain and E SNOECK, V SERIN and P LECANTE, CEMES-CNRS, France	
17.1	Introduction	440
17.2	Classification of magnetic polymer nanocomposites	442
17.3	Synthesis	447
17.4	Characterization	455
17.5	Magnetic properties	466
17.6	Future trends	470
17.7	References	471
18	Phenolic resin/SiO₂ organic-inorganic hybrid nanocomposites	485
	C-L CHIANG, Hung-Kuang University, Taiwan and C-C M MA, National Tsing-Hua University, Taiwan	
18.1	Introduction	485
18.2	Experimental	487
18.3	Results when IPTS was used as a coupling agent	493
18.4	Results when GPTS was used as a coupling agent	500
18.5	Conclusions	506
18.6	References	507
19	Polymer/graphite nanocomposites	510
	Y MENG, Sun Yat-Sen University, People's Republic of China	
19.1	Introduction	510
19.2	Features of graphite	511
19.3	Structures of polymer/graphite nanocomposites	519
19.4	Preparations of polymer/graphite nanocomposites	520

19.5	Properties	529
19.6	Conclusions	532
19.7	Acknowledgments	533
19.8	References	533
20	Wear resisting polymer nanocomposites: preparation and properties	540
	M Q ZHANG and M Z RONG, Zhongshan University, People's Republic of China and K FRIEDRICH, Institute for Composite Materials (IVW), Germany	
20.1	Introduction	540
20.2	Surface treatment	542
20.3	Composites manufacturing	548
20.4	Wear performance and mechanisms	558
20.5	Conclusions and future trends	568
20.6	Acknowledgements	570
20.7	References	570
