| Revision Log .....                 | iii |
| Measurement Standards .....        | iv  |
| Basic Knowledge Requirements ..... | v   |
| Knowledge Level Descriptions ..... | vi  |
| Table of Contents .....            | vii |

### 8.1 PHYSICS OF THE ATMOSPHERE ..... 1.1

|                                               |     |
|-----------------------------------------------|-----|
| Basic Aerodynamics .....                      | 1.1 |
| Physics of the Atmosphere .....               | 1.1 |
| Pressure .....                                | 1.1 |
| Density .....                                 | 1.3 |
| Temperature and Altitude .....                | 1.3 |
| Water Content .....                           | 1.4 |
| Absolute Humidity .....                       | 1.4 |
| Relative Humidity .....                       | 1.4 |
| Dew Point .....                               | 1.5 |
| Vapor Pressure .....                          | 1.5 |
| International Standard Atmosphere (ISA) ..... | 1.5 |
| Submodule 1 Practice Questions .....          | 1.7 |
| Submodule 1 Practice Questions .....          | 1.8 |

### 8.2 AERODYNAMICS ..... 2.1

|                                                |      |
|------------------------------------------------|------|
| Physics Concepts .....                         | 2.1  |
| Velocity and Acceleration .....                | 2.1  |
| Newton's Laws of Motion .....                  | 2.1  |
| Airflow Around a Body .....                    | 2.2  |
| Bernoulli's Principle and Subsonic Flow .....  | 2.2  |
| Stagnation .....                               | 2.2  |
| Boundary Layer Airflow .....                   | 2.3  |
| Boundary Layer Control .....                   | 2.3  |
| Laminar and Turbulent Flow .....               | 2.3  |
| Relative Wind / Free Stream Flow .....         | 2.4  |
| Upwash and Downwash .....                      | 2.4  |
| Planform and Vortices .....                    | 2.5  |
| Aerodynamic Terms .....                        | 2.6  |
| Airfoils .....                                 | 2.6  |
| Chord and Chamber .....                        | 2.6  |
| Shape of the Airfoil .....                     | 2.7  |
| Fineness Ratio .....                           | 2.7  |
| Aspect Ratio .....                             | 2.7  |
| Wash-out / Wash-in .....                       | 2.8  |
| Other Terms .....                              | 2.8  |
| Thrust and Weight, Aerodynamic Resultant ..... | 2.8  |
| Forces in Flight .....                         | 2.8  |
| Aerodynamic Resultant .....                    | 2.8  |
| Generation of Lift and Drag .....              | 2.9  |
| Lift and Drag Coefficients .....               | 2.9  |
| Lift / Drag Ratio .....                        | 2.9  |
| Center of Pressure .....                       | 2.10 |
| Generation of Drag .....                       | 2.11 |
| Parasitic Drag .....                           | 2.11 |
| Form Drag .....                                | 2.11 |
| Friction Drag .....                            | 2.11 |
| Interference Drag .....                        | 2.11 |
| Induced Drag .....                             | 2.12 |

|                                      |      |
|--------------------------------------|------|
| Wave Drag .....                      | 2.13 |
| Drag and Airspeed .....              | 2.13 |
| Aerodynamic Contamination .....      | 2.13 |
| Submodule 2 Practice Questions ..... | 2.15 |
| Submodule 2 Practice Questions ..... | 2.16 |

### 8.3 THEORY OF FLIGHT ..... 3.1

|                                                                                 |      |
|---------------------------------------------------------------------------------|------|
| Relationship Between Lift, Weight, Thrust and Drag .....                        | 3.1  |
| Weight .....                                                                    | 3.1  |
| Lift .....                                                                      | 3.1  |
| Thrust and Drag .....                                                           | 3.2  |
| Glide Ratio .....                                                               | 3.2  |
| Polar Curve .....                                                               | 3.3  |
| Steady State Flight; Performance .....                                          | 3.4  |
| Steady State Flight .....                                                       | 3.4  |
| Aircraft Performance .....                                                      | 3.4  |
| Theory of the Turn .....                                                        | 3.4  |
| Influence of Load Factor on Stall, Flight Envelope, and Structural Limits ..... | 3.6  |
| Stalls .....                                                                    | 3.6  |
| Flight Envelope .....                                                           | 3.7  |
| Structural Limitations .....                                                    | 3.7  |
| Load Factors .....                                                              | 3.7  |
| Load Factors in Aircraft Design .....                                           | 3.7  |
| Lift Augmentation .....                                                         | 3.8  |
| Flaps .....                                                                     | 3.8  |
| Leading Edge Devices .....                                                      | 3.9  |
| Helicopter Aerodynamics .....                                                   | 3.10 |
| Important Note .....                                                            | 3.10 |
| Helicopter Structures and Airfoils .....                                        | 3.10 |
| Main Rotor Systems .....                                                        | 3.10 |
| Anti-Torque Systems .....                                                       | 3.11 |
| Helicopter Axes of Flight .....                                                 | 3.13 |
| Control Around the Vertical Axis .....                                          | 3.13 |
| Control Around the Longitudinal and Lateral Axis .....                          | 3.13 |
| Helicopters in Flight .....                                                     | 3.14 |
| Hovering .....                                                                  | 3.14 |
| Forward Flight .....                                                            | 3.14 |
| Blade Flapping .....                                                            | 3.15 |
| Advancing Blade and Retreating Blade Problems .....                             | 3.15 |
| Autorotation .....                                                              | 3.15 |
| Submodule 3 Practice Questions .....                                            | 3.17 |
| Submodule 3 Practice Questions .....                                            | 3.18 |

### 8.4 HIGH-SPEED FLIGHT ..... 4.1

|                                   |     |
|-----------------------------------|-----|
| Speed of Sound .....              | 4.1 |
| Subsonic vs Supersonic Flow ..... | 4.1 |
| Speed Ranges .....                | 4.2 |
| Critical Mach Number .....        | 4.2 |
| Mach Number vs Airspeed .....     | 4.2 |
| Compressibility Buffet .....      | 4.3 |
| Shock Waves .....                 | 4.3 |
| Normal Shock Wave .....           | 4.4 |
| Oblique Shock Wave .....          | 4.4 |
| Expansion Wave .....              | 4.4 |
| Aerodynamic Heating .....         | 4.5 |
