

TABLE OF CONTENTS:

CHAPTER 1

1.1.	Introduction	1
1.2.	Some Definitions and Classification of Pollutants	4
1.3.	Environmental Media and Pollutant Transport	8
1.3.1.	Air	8
1.3.2.	Water	10
1.3.3.	Soil	13
1.3.4.	Biota	16
1.4.	Environmental Chemistry and Toxicology of Common Pollutants - A Primer	18
1.4.1.	Organics	19
1.4.2.	Inorganics	23
1.4.3.	Microorganisms	29
1.5.	Current Methods for Pollutant Analyses	30
1.5.1.	Analysis of Organic and Inorganic Pollutants	30
1.5.2.	Assay of Microorganisms	35
1.6.	Current Methods for Pollutant Treatment	36
1.6.1.	Incineration and Pyrolysis	37
1.6.2.	Air Stripping	38
1.6.3.	Microbial Treatment	39
1.6.4.	Precipitation and Coagulation	41
1.6.5.	Chemical Treatment	42
1.6.6.	Adsorption	44
1.6.7.	Membrane Processes	44
1.6.8.	Distillation	45
1.6.9.	Advanced Oxidation Processes	46
1.6.10.	Treatment of Polluted Sites	47
1.7.	Electrochemical Technology and the Environment	49
1.8.	Summary	50
	References	50
	Supplementary Reading	54

CHAPTER 2

2.1.	Introduction	57
2.2.	Current, Charge, and Potential	58
2.3.	Charge and Mass Transport	62
2.4.	Electrode/Electrolyte Interfaces and Electrochemical Cells	64

2.5.	Thermodynamics and Kinetics in Electrochemical Systems	69
2.5.1.	<i>Use of Standard Reduction Potentials</i>	69
2.5.2.	<i>Redox Potentials and the Nernst Equation</i>	70
2.5.3.	<i>Electrode Reaction Kinetics</i>	72
2.5.4.	<i>Ohmic, Activation, and Concentration Polarization</i>	73
2.5.5.	<i>Pourbaix Diagrams</i>	78
2.5.6.	<i>Mixed Potentials</i>	81
2.6.	Electroanalytical Chemistry	83
2.6.1.	<i>Potentiometric Methods</i>	84
2.6.2.	<i>Dynamic Methods</i>	88
2.7.	Electrolysis and Electrodeposition	97
2.8.	Mass Transport Under Forced Convection in an Electrochemical Cell	100
2.9.	Electrochemical Reactor Design	104
2.9.1.	<i>Performance Figures of Merit of an Electrochemical Reactor</i>	111
2.9.2.	<i>Economic Criteria</i>	112
2.10.	Electrokinetic Phenomena	112
2.11.	Semiconductor Electrochemistry	116
2.11.1.	<i>Band Structure of a Semiconductor and Band Bending at a Semiconductor/Liquid Junction</i>	117
2.12.	Photoemission at Metal Electrodes	120
2.13.	Instrumentation	122
2.14.	Summary	123
	References	123
	Supplementary Reading	124

CHAPTER 3

3.1.	Introduction	127
3.2.	Electrochemistry of Organic Pollutants	129
3.2.1.	<i>General Considerations</i>	129
3.2.2.	<i>Survey of the Electrochemistry of Environmentally Important Organics</i>	136
3.3.	Electrochemistry of Inorganic Pollutants	155
3.3.1.	<i>Metals</i>	155
3.3.2.	<i>Nonmetals (Metalloids)</i>	167
3.3.3.	<i>Inorganic Anions and Gaseous Species</i>	175
3.3.4.	<i>Organometallic Compounds</i>	180
3.3.5.	<i>Organo Derivatives of Arsenic, Phosphorus, and Sulfur</i>	181
3.4.	Summary	189
	References	189
	Supplementary Reading	198

CHAPTER 4

4.1. Introduction	201
4.2. Flow Injection Analysis	204
4.3. Potentiometric Sensors	208
4.3.1. Speciation Studies	212
4.3.2. Solid State and Gas Sensors	213
4.3.3. Flow Systems	215
4.3.4. Examples of Environmental Applications of Potentiometric Sensors	216
4.4. Amperometric–Coulometric and Voltammetric–Polarographic Detection in Flow Systems	220
4.4.1. Cell design: General Considerations	220
4.4.2. Specific Cell Designs and Electrode Geometries	223
4.4.3. Dual-Electrode and Array Detectors	226
4.4.4. Electrode Materials and Electrode Surface Modification	231
4.4.5. Dioxxygen Removal, Derivatization, and Other Practical Considerations	247
4.5. Amperometric Sensors for Environmental Pollutants: Some Examples	250
4.6. Amperometric Gas Sensors	271
4.7. Stripping Analyses: Specialized Aspects	276
4.7.1. Adsorptive Stripping Voltammetry	276
4.7.2. Anodic Stripping with Collection	280
4.7.3. Subtractive Stripping Voltammetry	280
4.7.4. Potentiometric Stripping Analysis	282
4.7.5. Miscellaneous Aspects of Stripping Analyses	287
4.7.6. Trace Element Speciation in Water by Stripping Analyses	290
4.7.7. Electrochemical Speciation Data on Environmentally Important Elements	299
4.7.8. Other Studies on Environmental Pollutants by Stripping Analyses	304
4.8. Direct Voltammetric (or Polarographic) Determination of Pollutants	304
4.9. Electrochemistry as an Auxiliary Tool to Atomic Spectroscopies	307
4.10. Conductivity Detectors	310
4.11. Photoassisted Detection of Pollutants	312
4.11.1. Photoelectrochemical Detection	314
4.11.2. Photogalvanic and Luminescent Detection	315
4.11.3. Spectroelectrochemical Detection	317
4.12. Summary	318
References	319
Supplementary Reading	358

CHAPTER 5

5.1.	Introduction	361
5.2.	Positive Features of Electrochemical Remediation	362
5.3.	Direct Electrolysis of Pollutants	363
5.3.1.	Anodic Oxidation of Sample Organic Pollutants	363
5.3.2.	Anodic Oxidation of Sample Inorganic Pollutants	374
5.3.3.	Cathodic Reduction of Pollutants: Electrode Materials	376
5.3.4.	Cathodic Reduction of Sample Organics	377
5.3.5.	Cathodic Reduction of Sample Inorganics	378
5.3.6.	Cathodic Reduction of Metal Ions	380
5.4.	Indirect Electrolysis of Pollutants	398
5.4.1.	Reversible Processes	399
5.4.2.	Irreversible Processes	405
5.4.3.	Fenton Reaction Chemistry	408
5.4.4.	Approaches Relying on pH Manipulation	409
5.5.	Electroflotation, Electrocoagulation, and Electroflocculation	410
5.6.	Electrochemical Remediation of Gaseous Pollutants	417
5.6.1.	CO ₂ Reduction	419
5.6.2.	H ₂ S Treatment	423
5.6.3.	SO ₂ Removal	426
5.6.4.	NO _x Removal	429
5.6.5.	Chlorine Removal and Concentration	431
5.7.	Membrane-Assisted Processes	432
5.7.1.	Ion Exchange Membranes: General Considerations	433
5.7.2.	Applications of Ion Exchange Membranes: Electrodialysis	436
5.7.3.	Membrane Cell Electrolysis	440
5.7.4.	Bipolar Membrane-Based Processes	442
5.7.5.	Electrochemical Ion Exchange	444
5.7.6.	Other Membranes and Adsorbents	447
5.8.	Electrokinetic Processing of Soil	449
5.9.	Emerging Materials for Electrochemical Treatment of Pollutants ..	453
5.9.1.	Electrode Materials	454
5.9.2.	Membranes and Electrode Surface Modification Agents	465
5.9.3.	Electrolytes	466
	Summary	470
	References	470
	Supplementary Reading	496

CHAPTER 6

6.1.	Introduction	499
6.2.	Photolysis of H_2O_2 and O_3 and Generation of e^-_{aq}	500
6.3.	Destruction of Organics as Mediated by $\cdot\text{OH}$ and e^-_{aq}	504
6.4.	Direct Photodissociation of the Pollutant	506
6.5.	Reaction Kinetics, Mechanisms and Examples of Application of the UV- H_2O_2 System	509
6.6.	Reaction Kinetics, Mechanisms and Examples of Application of the UV- O_3 System	520
6.7.	The UV- H_2O_2 - O_3 Process	527
6.8.	UV- H_2O_2 and UV- O_3 Systems: Practical Considerations	527
6.9.	Heterogeneous Photocatalysis	531
6.9.1.	Operating Principle and Scope of the Photocatalysis Method	532
6.9.2.	Thermodynamic Aspects	541
6.9.3.	Choice of Semiconductor Photocatalyst, Photocatalyst Configuration and Other Materials-Related Aspects	541
6.9.4.	Absorption of Light by the Photocatalyst and Quantum Yield	545
6.9.5.	Carrier Dynamics in Irradiated TiO_2 Particles	553
6.9.6.	Photocharging of the TiO_2 Particles	559
6.9.7.	Dynamics of Interfacial Electron and Hole Transfer at Irradiated TiO_2 (and Other Semiconductor) Suspensions	563
6.9.8.	Kinetics and Mechanistic Aspects of Photocatalytic Reactions at TiO_2	575
6.9.9.	Reaction Intermediates	584
6.9.10.	Comparison of the Direct Photolysis, UV- H_2O_2 , Fenton Reaction, and Heterogeneous Photocatalysis Approaches for the Destruction of Organic Pollutants	591
6.9.11.	Photocatalytic Oxidation of Organic Pollutants: Miscellaneous Aspects	592
6.9.12.	Photocatalytic Treatment of Inorganic Pollutants	595
6.9.13.	Gas-Phase Photocatalysis and the Treatment of Air-Borne Pollutants	595
6.9.14.	Photocatalytic Reactor Design Considerations	597
6.9.15.	The Photocatalytic Pollutant Treatment Approach: Prospects and Problems	599
6.10.	Summary	600
	References	600

CHAPTER 7

7.1. Introduction	625
7.2. Water Disinfection: Background and Principles	627
7.2.1. General Considerations	627
7.2.2. Chemical Disinfection	628
7.2.3. Disinfection By-Products	635
7.2.4. Taste and Odor Removal	636
7.2.5. Indicator Organisms	637
7.3. Electrochemical Disinfection of Water	638
7.3.1. Introductory Remarks	638
7.3.2. Electrosorption of Microorganisms and Direct Electron Transfer	638
7.3.3. In situ Electrogeneration of Disinfection Agents	640
7.4. Disinfection by High-Energy Radiation	643
7.5. UV Disinfection of Water	644
7.5.1. General Considerations	644
7.5.2. UV Dose and Disinfection Kinetics	647
7.5.3. The Role of Suspended Particles and Chemicals in UV Disinfection	652
7.5.4. UV Dose Sensitivity of Various Microorganisms and Comparison with Chlorine and other Disinfection Methods	658
7.5.5. Photoreactivation and Sublethal UV Damage Repair	659
7.5.6. Flow Systems for UV Disinfection of Water	660
7.5.7. Photolysis of Aqueous Chlorine	663
7.5.8. UV-O ₃ and Other Advanced Oxidation Processes for DBP Control and Water Treatment	664
7.6. Photoelectrochemical Disinfection of Air and Water	666
7.7. Electrochemical Detection and Enumeration of Microorganisms	668
7.8. Summary	673
References	673
Supplementary Reading	673

CHAPTER 8

8.1. Introduction	687
8.2. Commercial Vendors of Electrochemical Equipment and Accessories	690
8.3. Electrochemical Sensors of Environmental Pollutants: Commercialization Efforts	690
8.4. Electrochemical Reactors for Pollutant Treatment and Chemical Recycling	691
8.4.1. Water Treatment Systems	691

8.4.2.	<i>Commercial Processes for Water Treatment and Chemical Recycling</i>	695
8.4.3.	<i>Gas and Air Treatment Systems and Processes</i>	705
8.5.	Advanced Oxidation Processes: Pilot and Field Tests and Commercialization Efforts	708
8.5.1.	<i>Supplies of Ozonators, UV Lamps, and Catalysts for UV-H₂O₂, UV-O₃, and UV-TiO₂ Technologies</i>	708
8.5.2.	<i>Companies Marketing AOP Technologies</i>	710
8.5.3.	<i>Companies Marketing Direct Photolysis Technology</i>	716
8.5.4.	<i>Pilot, Field, and Demonstration Tests of the AOPs</i>	717
8.5.5.	<i>Economic Considerations</i>	726
8.6.	Water Disinfection Technology	730
8.6.1.	<i>Case Studies</i>	730
8.6.2.	<i>Economic Aspects</i>	732
8.7.	Summary	733
	References	734

Appendix A

Abbreviations, Acronyms, Symbols, and Notation	739
--	-----

Appendix B

Physical Constants, Units and Unit Conversions, and Reference Electrode Potentials	753
---	-----

Appendix C

Selected Standard Reduction Potentials in Aqueous Media at 25°C	757
---	-----

Appendix D

Companies Marketing Electrochemical Technologies and Accessories for Pollution Sensors and Pollution Abatement	759
---	-----
