

TABLE OF CONTENTS

ELECTRICAL FUNDAMENTALS

Revision Log	iii
Measurement Standards	iv
Basic Knowledge Requirements	v
Part 66 Basic Knowledge Requirements	vi
Table of Contents	ix

3.1 ELECTRON THEORY1.1

Structure and Distribution of Electrical Charges Within	
Atoms Molecules, Ions and Compounds	1.1
Matter	1.1
Atoms	1.1
Electrons, Protons, and Neutrons	1.1
Elements	1.1
Compounds	1.2
Molecules	1.2
Molecular Structure of Conductors, Semiconductors	
and Insulators	1.2
Electron Shells and Energy Levels	1.2
Valence Electrons	1.3
Ionization	1.3
Free Electrons	1.3
Electron Movement	1.3
Conductors	1.3
Insulators	1.3
Semiconductors	1.3
Submodule 1 Practice Questions	1.5
Submodule 1 Practice Answers	1.6

3.2 STATIC ELECTRICITY AND CONDUCTION.....2.1

Static Electricity and Electrostatic Charges	2.1
Triboelectric Effect	2.1
Electrostatic Laws of Attraction and Repulsion	2.1
Contact Induced Separation	2.2
Charge Induced Separation	2.2
Electrostatic Fields	2.2
Electrostatic Discharge (ESD)	2.3
Static Buildup with Flammable Materials	2.3
Units of Charge; Coulomb's Law	2.3
Conduction of Electricity in Solids, Liquids, Gases, and in a	
Vacuum	2.4
Submodule 2 Practice Questions	2.5
Submodule 2 Practice Answers	2.6

3.3 ELECTRICAL TERMINOLOGY3.1

Electrical Terms, Their Units, and the Factors Affecting Them	3.1
SI Prefixes Used For Electrical Calculations	3.1
Potential Difference	3.1
Electromotive Force (Voltage)	3.2
The Unit of Volt	3.2
Current	3.2
Resistance	3.3
Conductance	3.3
Charge	3.3
Conventional Flow And Electron Flow	3.3
Conventional Flow	3.4

Electron Flow	3.4
Submodule 3 Practice Questions	3.5
Submodule 3 Practice Answers	3.6

3.4 GENERATION OF ELECTRICITY4.1

Light	4.1
Heat	4.1
Friction	4.1
Pressure	4.1
Chemical Action	4.2
Magnetism and Motion	4.2
Submodule 4 Practice Questions	4.3
Submodule 4 Practice Answers	4.4

3.5 SOURCES OF DC ELECTRICITY5.1

Primary Cells	5.1
Alkaline Batteries	5.1
Secondary Cells	5.1
Lead Acid Cells	5.2
Battery Ratings	5.3
Life Cycle of a Battery	5.3
Lead Acid Battery Testing Methods	5.3
Lead Acid Battery Charging Methods	5.4
Nickel Cadmium (NiCad) Cells	5.5
Chemistry and Construction	5.5
Operation of NiCad Cells	5.5
NiCad Maintenance and Safety	5.5
Sealed Lead Acid Batteries	5.5
Nickel Cells	5.6
Lithium Ion Batteries	5.6
Cells Connected in Series and Parallel	5.6
Internal Resistance and its Effect on a Battery	5.7
Construction, Materials, and Operation of Thermocouples	5.7
Operation of Photocells	5.7
Submodule 5 Practice Questions	5.9
Submodule 5 Practice Answers	5.10

3.6 - DC CIRCUITS6.1

Ohm's Law, Kirchhoff's Voltage and Current Laws	
and Related Calculations	6.1
Simple DC Circuits and Ohm's Law	6.1
Voltage Drops and Application of Ohm's Law	6.2
Voltage Sources in Series	6.2
Kirchhoff's Voltage Law	6.3
Voltage Dividers	6.4
Determining the Voltage Divider Formula	6.5
Parallel DC Circuits	6.6
Voltage Drops	6.6
Total Parallel Resistance	6.6
Resistors in Parallel	6.6
Two Resistors in Parallel	6.7
Current Source	6.7
Kirchhoff's Current Law	6.7
Current Dividers	6.8
Series Parallel DC Circuits	6.8
Determining the Total Resistance	6.8

TABLE OF CONTENTS

Internal Resistance of a Supply (Battery)	6.9
Submodule 6 Practice Questions	6.11
Submodule 6 Practice Answers	6.12
3.7 - RESISTANCE/RESISTOR.....	7.1
Section A	7.1
Resistance and Factors That Affect It	7.1
Ohm's Law (Resistance)	7.1
Resistance of a Conductor	7.2
Factors Affecting Resistance	7.3
Resistance and Wire Sizing	7.3
Rectangular Conductors	7.4
Specific Resistance	7.4
Calculation of Resistance in Series and Parallel	7.5
Resistors in Series	7.5
Resistors in Parallel	7.5
Resistors in Series/Parallel	7.5
Operation and use Variable Resistors	7.5
Rheostats	7.5
Potentiometer	7.6
Linear Potentiometers	7.6
Tapered Potentiometers	7.6
Operation and Construction of a Wheatstone Bridge	7.6
Section B	7.7
Temperature Coefficient Conductance	7.7
Positive Temperature Coefficient	7.7
Negative Temperature Coefficient	7.7
Resistor Color Code, Values, Tolerances, Preferred Values,	
Wattage Ratings	7.7
Fixed Resistors	7.7
Carbon Composition Resistors	7.7
Wire Wound Resistors	7.8
Resistor Color Codes	7.8
Resistor Values and Tolerance	7.9
Wattage Ratings	7.9
Resistors in Series and Parallel	7.9
Fixed Resistors	7.9
Stability	7.9
Tolerance	7.9
Limitations	7.9
Methods of Construction	7.10
Variable Resistors	7.10
Thermistors	7.10
Photoconductive Cells	7.10
Voltage Dependent Resistors	7.10
Construction of Potentiometers and Rheostats	7.10
Potentiometers	7.10
Rheostats	7.11
Construction of a Wheatstone Bridge	7.11
Submodule 7 Practice Questions	7.13
Submodule 7 Practice Answers	7.14
3.8 POWER.....	8.1
Power, Work and Energy	8.1
Power in an Electrical Circuit	8.1
Electrical Work	8.1
Electrical Energy	8.1
Dissipation of Power by a Resistor	8.2
Power Formulas and Calculations	8.2
Power in a Series and Parallel Circuit	8.3
Submodule 8 Practice Questions	8.5
Submodule 8 Practice Answers	8.6
3.9 - CAPACITANCE/CAPACITOR	9.1
Operation and Function of a Capacitor	9.1
Capacitors in Direct Current	9.1
The Resistor/Capacitor (RC) Time Constant	9.1
Units of Capacitance	9.2
Factors Affecting Capacitance	9.2
Area of Plates	9.2
Distance Between Plates	9.2
Number of Plates	9.2
Dielectric Constant	9.2
Voltage Rating and Working Voltage	9.3
Capacitor Types, Construction and Function	9.3
Fixed Capacitors	9.3
Mica Capacitors	9.3
Ceramic Capacitors	9.4
Electrolytic Capacitors	9.4
Tantalum Capacitors	9.4
Polyester Film Capacitors	9.4
Oil Capacitors	9.4
Variable Capacitors	9.5
Trimmers	9.5
Varactors	9.5
Capacitor Color Coding	9.5
Calculations of Capacitance	9.5
Capacitors in Series	9.5
Capacitors in Parallel	9.6
Capacitors in Alternating Current	9.6
Capacitive Reactance X_C	9.6
Capacitive Reactances in Series and in Parallel	9.7
Phase of Current and Voltage in Reactive Circuits	9.7
Exponential Charge/Discharge	9.7
The RC Time Constant	9.8
Testing Capacitors	9.8
Submodule 9 Practice Questions	9.9
Submodule 9 Practice Answers	9.10
3.10 - MAGNETISM.....	10.1
Section A	10.1
Theory and Properties of Magnetism	10.1
Action of a Magnet Suspended in the Earth's Magnetic Field	10.4
Magnetism and Demagnetization	10.4
Magnetization by Hammering	10.4
Magnetization by Stroking	10.4
Magnetization by Cooling	10.4
Magnetization With Electricity	10.5
Magnetic Shielding	10.5
Types of Magnetic Material	10.5
Electromagnetic Construction and Principles	10.6

TABLE OF CONTENTS

Determine Magnetic Field Around Current Carrying Conductor	10.7	Drum-Type Armature	12.5
Section B	10.9	Commutators	12.5
Magneto-Electrical Phenomena	10.9	Types of DC Generators	12.6
Magnetomotive Force	10.9	Series Wound DC Generators	12.6
Field Strength	10.9	Shunt Wound DC Generators	12.6
Magnetic Flux Density	10.10	Compound Wound DC Generators	12.7
Permeability	10.10	Operation and Factors affecting the Output of DC Generators	12.8
The Hysteresis Loop	10.10	Armature Reaction	12.8
Retentivity	10.11	Compensating Windings	12.8
Coercive Force	10.11	Interpoles	12.9
Reluctance	10.11	Generator Ratings	12.9
Saturation Point	10.11	Generator Terminals	12.9
Eddy Currents	10.11	DC Motors	12.9
Precautions for Care and Storage of Magnets	10.11	Force between Parallel Conductors	12.10
Submodule 10 Practice Questions	10.13	Developing Torque	12.10
Submodule 10 Practice Answers	10.14	Basic DC Motor	12.11
3.11 - INDUCTANCE/INDUCTOR	11.1	Position A	12.11
Faraday's Law	11.1	Position B	12.11
Inducing Voltage in a Conductor	11.2	Position C	12.11
Induction Principles	11.2	Position D	12.11
Physical Parameters	11.2	DC Motor Construction	12.12
The Resistance/Inductance (RL) Time Constant	11.2	Armature Assembly	12.12
Units of Inductance	11.2	Field Assembly	12.12
Effects on the Magnitude of Induced Voltage	11.2	Brush Assembly	12.12
Magnetic Field	11.2	End Frame	12.13
Rate of Change of Flux	11.3	Types of DC Motors	12.13
Number Of Conductor Turns	11.3	Series DC Motor	12.13
Inductive Reactance	11.3	Shunt DC Motor	12.14
Mutual Inductance	11.3	Compound DC Motor	12.14
Effect of Current and Mutual Inductance on Voltage	11.3	Operational Factors of DC Motors	12.15
Factors Affecting Mutual Inductance	11.4	Counter Electromotive Force (EMF)	12.15
Number of Turns in the Primary	11.4	Reversing Motor Direction	12.15
Physical Size of Coil Area	11.4	Motor Speed	12.16
Permeability of the Coil Material	11.4	Energy Losses in DC Motors	12.16
Position of Coils with Respect to Each Other	11.4	Inspection And Maintenance Of DC Motors	12.17
Lenz's Law And Polarity Rules	11.4	Starter Generator Construction	12.18
Back Emf (Eddy Currents)	11.5	Troubleshooting a Starter Generator	12.19
Saturation Point	11.5	Submodule 12 Practice Questions	12.21
Principle Uses of Inductors	11.5	Submodule 12 Practice Answers	12.22
Submodule 11 Practice Questions	11.7	3.13 - AC THEORY	13.1
Submodule 11 Practice Answers	11.8	Alternating Current and Voltage	13.1
3.12 - DC MOTOR/GENERATOR THEORY	12.1	AC and DC Compared	13.1
Basic DC Generator Theory	12.1	Sinusoidal Waveform	13.1
Generation of DC Voltage	12.1	Cycle	13.1
Position A	12.2	Frequency	13.2
Position B	12.2	Period	13.2
Position C	12.2	Wavelength	13.2
Position D	12.3	Phase	13.2
The Neutral Plane	12.3	In Phase Condition	13.2
Construction Features of DC Generators	12.3	Out of Phase Condition	13.3
Field Frame	12.4	Values of Alternating Current	13.3
Armature	12.5	Instantaneous Value	13.3
Gramme-Ring Armature	12.5	Peak Value	13.3
		Average Value	13.3
		Effective Value (Root Mean Square)	13.3

TABLE OF CONTENTS

PeakToPeak Value	13.4
Current and Power.	13.4
Opposition to AC Current Flow	13.4
Triangular/Square Waves	13.4
Triangular Waves.	13.4
Square Wave	13.5
Single And Three Phase Principles	13.5
Single Phase Principle	13.5
Three Phase Principles.	13.5
Submodule 13 Practice Questions	13.7
Submodule 13 Practice Answers	13.8

3.14 - RESISTIVE (R), CAPACITIVE (C) AND

INDUCTIVE (L) CIRCUITS.....14.1

Phase Relationships of Voltage and Current in Parallel Series, and Series Parallel Circuits	14.1
Ohm's Law for AC Circuits.	14.1
Series AC Circuits	14.1
Parallel AC Circuits.	14.3
Power Dissipation in (L), (C), and (R) Circuits	14.4
Power in a Inductive Circuit	14.4
Power in a Capacitive Circuit	14.4
Power in a Resistive Circuit	14.4
Impedance, Phase Angle, Power Factor, and Current Calculations	14.5
Ohm's Law for AC Circuits.	14.5
Inductive Reactance.	14.5
Impedance	14.5
Resonance	14.5
Phase Angle	14.6
Power Factor	14.6
True Power, Apparent Power, and Reactive Power Calculations	14.6
Power in AC Circuits.	14.6
True Power Defined.	14.6
Apparent Power Defined	14.6
Reactive Power.	14.7
Submodule 14 Practice Questions	14.9
Submodule 14 Practice Answers	14.10

3.15 - TRANSFORMERS.....15.1

Transformer Construction and Operation	15.1
Current Transformers	15.3
Transformer Losses and Methods to Overcome Them	15.3
Core Losses	15.3
Copper Losses	15.3
Transformer Action	15.3
Transformer Action Under Load and No-load Conditions	15.3
Transformer No-load Condition	15.3
Transformer On-load Condition	15.4
Transformer Polarity	15.4
Polarity Markings	15.4
Calculation of Line and Phase Voltage, and Current	15.4
Power in Transformers.	15.5
Power Calculations in a Three Phase System	15.6
AutoTransformers	15.6

Operation of AutoTransformers	15.6
Submodule 15 Practice Questions	15.7
Submodule 15 Practice Answers	15.8

3.16 - FILTERS.....16.1

Operation, Application, and Uses of Filters	16.1
Filtering Characteristics of Capacitors	16.1
Filtering Characteristics of Inductors	16.1
Common Filter Configurations.	16.2
Basic LC Filters	16.2
Low-Pass Filter	16.3
High-Pass Filter.	16.3
Band-Pass Filter.	16.3
Band-Stop Filter	16.3
Submodule 16 Practice Questions	16.5
Submodule 16 Practice Answers	16.6

3.17 - AC GENERATORS.....17.1

Rotation of Loop in a Magnetic Field and Waveform Produced	17.1
Operation/Construction of Revolving Armatures and Field	
AC Generators.	17.1
Alternators and Classification	17.1
Method of Classification	17.1
Number of Phases	17.1
Armature and Field Rotation	17.1
Alternator Ratings	17.2
Alternator Frequency	17.2
Phases Categories And Other Alternator Types	17.2
Single Phase Alternator	17.2
Two Phase Alternator	17.3
Three Phase Alternator	17.3
Alternator Rectifier Unit	17.3
Starter Generator	17.3
Three Phase Star and Delta Connection Advantages and Uses	17.3
Wye Connection (Three Phase)	17.3
Delta Connection (Three Phase)	17.4
Permanent Magnet Generators and Brushless Alternators. ...	17.4
Alternator Maintenance	17.5
Submodule 17 Practice Questions	17.7
Submodule 17 Practice Answers	17.8

3.18 - AC MOTORS.....18.1

Construction and Principles of Induction and Synchronous AC Motors	18.1
Induction Motors.	18.1
Construction of Induction Motor	18.1
Three Phase Induction Motor	18.2
Induction Motor Slip	18.2
Single Phase Induction Motor	18.3
Synchronous Motor	18.3
Speed Control and Direction of Rotation	18.4
Motor Speed Control	18.4
Direction of Rotation.	18.5
Producing a Rotating Field; Capacitor, Inductor, Shaded or Split Pole Designs.	18.5
Rotating Magnetic Field	18.5

TABLE OF CONTENTS

Shaded Pole Induction Motors	18.5
Split Phase Motors.....	18.6
Capacitor Start Motors	18.6
AC Series Motor	18.6
Maintenance of AC Motors.....	18.7
Submodule 18 Practice Questions.....	18.9
Submodule 18 Practice Answers	18.10
Acronym Definitions.....	A.1
