

Contents

Chapter 1 Thermodynamics of Adsorption from Solution.....	1
<i>H.-H. Kohler</i>	
Chapter 2 Surface Charge and Surface Potential.....	43
<i>H.-H. Kohler and S. Woelki</i>	
Chapter 3 Coagulation Kinetics.....	71
<i>H. Stechemesser and H. Sonntag</i>	
Chapter 4 Structure Formation in Dispersed Systems.....	135
<i>Jonas Addai-Mensah and Clive A. Prestidge</i>	
Chapter 5 Ion Adsorption on Homogeneous and Heterogeneous Surfaces	217
<i>Luuk K. Koopal</i>	
Chapter 6 Fundamentals of Homopolymers at Interfaces and their Effect on Colloidal Stability.....	349
<i>G.J. Fler and F.A.M. Leermakers</i>	
Chapter 7 Flotation as a Heterocoagulation Process: Possibilities of Calculating the Probability of the Microprocesses, Rupture of the Intervening Thin Liquid Film, and Progress in Modeling of the Overall Process	455
<i>Hans Joachim Schulze and Werner Stöckelhuber</i>	

Chapter 8 From Clay Mineral Crystals to Colloidal Clay Mineral Dispersions	519
<i>Gerhard Lagaly</i>	
Chapter 9 Stabilization of Aqueous Powder Suspensions in the Processing of Ceramic Materials	601
<i>Christian Simon</i>	
Chapter 10 Surfactant Adsorption and Dispersion Stability in Mineral Flotation	663
<i>Bohuslav Dobiáš</i>	
Chapter 11 Flocculation and Dispersion of Colloidal Suspensions by Polymers and Surfactants: Experimental and Modeling Studies.....	767
<i>P. Somasundaran, Venkataramana Runkana, and P.C. Kapur</i>	
Chapter 12 Flocculation and Dewatering of Fine-Particle Suspensions	805
<i>R. Hogg</i>	
Index	851
