

Contents

1. Introduction	1
<i>Janet S. Splitter</i>	
1.1. Overview	2
1.2. Conformational Equilibrium in Neutral Molecules	4
1.3. Intramolecular Hydrogen Bonding in Neutral Molecules	5
1.4. Nomenclature	12
2. Mass Spectrometric Techniques	17
<i>Arnold M. Falick</i>	
2.1. Methods of Ion Production	17
2.2. Methods of Ion Analysis	26
2.3. Conclusion	36
3. Mass-Spectral Intermediate-Ion Structures	39
<i>Janet S. Splitter</i>	
3.1. Distonic Ions	39

3.2. Ion-Neutral Complexes	51
3.3. Ionized Carbenes	70
3.4. Conclusions	72
4. Stereochemical Effects in the Fragmentation Processes of Saturated and Unsaturated Acyclic Molecular Ions	83
<i>Janet S. Splitter</i>	
4.1. Saturated Acyclic Molecular Ions	83
4.2. Unsaturated Acyclic Molecular Ions	89
4.3. Conclusions	99
5. Hidden Stereochemistry in the Fragmentation Processes of Saturated Cyclic Molecular Ions with One or Two Atoms Between the Functional Group and the Ring	103
<i>George A. Eadon and Herman Valente</i>	
5.1. Cis-4- <i>tert</i> -butylcyclohexyl Derivatives	104
5.2. Trans-4- <i>tert</i> -butylcyclohexyl Derivatives	106
5.3. Cyclohexyl Derivatives with Two Stable Chair Conformations	110
5.4. Regiospecificity and Stereospecificity	114
5.5. Conclusions	118
6. Stereochemical Effects in the Fragmentation Processes of Saturated Monocyclic Molecular Ions with One Functional Group ($X = \text{OH}, \text{OCH}_3, \text{Cl}, \text{NHR}$)	121
<i>Frantisek Turecek</i>	
6.1. Loss of Water from Cyclic Alcohols and Ethers	123
6.2. Loss of HCl from Chlorocyclohexane	129
6.3. Alkyl and Aryl-Substituted Cyclohexanols, Cycloheptanols, and Methoxycyclohexanes	130
6.4. Other Functional Groups	137
6.5. Concluding Remarks	138

7. Stereochemical Effects in Fragmentation Processes Involving the *tert*-Butyl Substituent 143

Janet S. Splitter

- 7.1. Loss of the *tert*-Butyl Group 144
- 7.2. Interaction with the *tert*-Butyl Group 147
- 7.3. The Mass Spectra of *tert*-Butylcyclohexanediols 150
- 7.4. Conclusions 150

8. Stereochemical Effects in the Fragmentation Processes of Epimeric Saturated Cyclic Molecular Ions with a Flexible Ring and Two or More Substituents 153

Hans-Friedrich Grützmacher

- 8.1. General Considerations 153
- 8.2. EI, MIKE, and FIK Studies of Stereoisomeric Alkyl and Phenyl Cycloalkanes with One Polar Substituent 154
- 8.3. Stereoisomeric Halogenocycloalkanes 163
- 8.4. Stereoisomeric Cycloalkanepolyols 166
- 8.5. Ethers of Stereoisomeric Cycloalkanepolyols 179
- 8.6. Stereoisomeric Cycloalkanediamines and Related Compounds 190
- 8.7. Stereoisomeric Cycloalkane Dicarboxylic Acids, Esters, and Anhydrides 193
- 8.8. Conclusions 198

9. Stereochemical Effects in the Fragmentation Processes of Epimeric Saturated Cyclic Molecular Ions with Fixed Conformations: Cyclopropyl Systems 203

Károly Vékey

- 9.1. Stability of the Cyclopropyl Ring 204
- 9.2. Ring Opening with Concerted Substituent Elimination 206
- 9.3. Neighboring Group Interactions—Stereoselective Stabilization of Fragment Ions 210
- 9.4. Intramolecular Proton Bridging 215

9.5. Miscellaneous Examples	216
9.6. Conclusions	216
10. Stereochemical Effects in the Fragmentation Processes of Epimeric Cyclic Molecular Ions with Fixed Conformations: Norbornyl and Norbornenyl Systems	221
<i>Janet S. Splitter</i>	
10.1. Bicyclo[2.2.1]heptanes	221
10.2. Bicyclo[2.2.1]hept-2-enes	229
10.3. Conclusions	231
11. Stereochemical Effects in the Fragmentations of Other Epimeric Bi- and Polycyclic Molecular Ions	233
<i>Frantisek Turecek</i>	
11.1. Hydrocarbons	233
11.2. Alcohols and Ethers	236
11.3. Ketones	248
11.4. Aldehydes, Carboxylic Acids, and Esters	252
11.5. Concluding Remarks	260
12. Stereochemical Effects in the Fragmentation Processes of Heterocyclic Ions	265
<i>Frantisek Turecek</i>	
12.1. α -Cleavage Dissociations: Thermochemical and Stereoelectronic Effects	265
12.2. Stereodifferentiation Due to Stability of Molecular Ions	276
12.3. Stereochemical Effects Due to Intramolecular Interaction of Remote Functional Groups	279
12.4. Miscellaneous Effects	289

- 13. Stereochemical Effects in the Retro-Diels–Alder Fragmentation 299**
Asher Mandelbaum
- 13.1. Introduction 299
 - 13.2. RDA Fragmentation of Stereoisomers 300
 - 13.3. Suggested Explanations for the Inconsistent Stereochemistry 305
 - 13.4. RDA Fragmentation Accompanied by Hydrogen Transfer 313
 - 13.5. RDA Fragmentation under Chemical Ionization 319
 - 13.6. RDA Fragmentation of Negative Ions 321
 - 13.7. Concluding Remarks 322
- 14. Stereochemical Effects in the Fragmentation Processes of Cyclobutenes, Tetralins, and Indans 325**
Gary S. Groenewold and Michael L. Gross
- 14.1. Cyclobutene Derivatives 326
 - 14.2. Tetralin Derivatives 329
 - 14.3. Indan Derivatives 335
 - 14.4. Derivatives of Indan- and Tetralin-Related Molecules 335
 - 14.5. Conclusion 339
- 15. Stereochemical Effects in Mass Spectra and Thermochemistry 343**
Janet S. Splitter
- 15.1. Attempted Correlation of Relative Thermochemical Stabilities of Stereoisomers with Intensities and Appearance Energies of Ions 343
 - 15.2. Stereoselectivity of Ion Formation in Conformationally Mobile Systems 345
 - 15.3. Influence of Temperature on the Conformation of Ions 347
 - 15.4. Stereoselective Similarity in a Thermal-Induced and an Ionization-Induced Rearrangement 348

15.5. Effect of Internal Energy on the Stereochemistry of the Product Ion	349
15.6. Conclusions	349
16. Stereochemical Effects in the Positive- and Negative-Ion Chemical-Ionization Mass Spectra of Stereoisomeric Molecules	353
<i>Fritz Johann Winkler and Janet S. Splitter</i>	
16.1. Introduction	353
16.2. Open-Chain Systems	361
16.3. Rigid Cyclic Systems	392
16.4. Flexible Cyclic Systems	418
16.5. Conclusions	470
17. Stereochemical Effects in Ion-Molecule Reactions Studied by Ion-Cyclotron-Resonance Spectroscopy	483
<i>Raymond Houriet and Frantisek Turecek</i>	
17.1. Electrophilic Reactions	485
17.2. Nucleophilic Substitution Reactions	487
17.3. Proton-Transfer Reactions	491
17.4. Radiolytic Methods	503
17.5. Concluding Remarks	503
18. Stereochemical Effects in the Mass Spectra of Terpenes and Terpenoids	509
<i>C. R. Enzell, O. Dahlman, and J. Bielawski</i>	
18.1. Monoterpenoids	509
18.2. Sesquiterpenoids	518
18.3. Diterpenoids	522
18.4. Triterpenoids	533
18.5. Degraded Carotenoids	533
18.6. Conclusions	539

19. Stereochemical Effects Observed for Steroid Compounds 543

Jean-Claude Tabet

- 19.1. Stereochemical Effects Observed under EI Conditions 543
- 19.2. Stereochemical Effects Controlled by Energetic Factors due to the Strain in the *cis-A/B* and *-C/D* Ring Junctions 545
- 19.3. Kinetic Control Involving Molecular Stereochemistry 547
- 19.4. Stereospecific Hydrogen Transfer 550
- 19.5. Processes Involving Electrocyclic Reactions 565
- 19.6. Stereochemical Effects Observed under Chemical Ionization 566
- 19.7. Positive-Ion Chemical Ionization 567
- 19.8. Stereochemical Effects due to the Configuration of a Functional Group without Interaction with a Second Group 568
- 19.9. Negative-Ion Chemical Ionization 580
- 19.10. Stereochemical Effects Detected Using MS-MS Methods 583
- 19.11. Stereospecific Dissociations of Metastable Odd-Electron Molecular Ions Generated by EI 584
- 19.12. Mass-Analyzed Ion Kinetic Energy Spectra of Odd-Electron Molecular Ions 591

20. Stereochemical Effects in the Mass Spectra of Quinolizidine and Indole Alkaloids 625

József Tamás

- 20.1. Quinolizidine Alkaloids 626
- 20.2. Indole Alkaloids and Related Compounds 631
- 20.3. Final Remarks 643

21. Stereochemical Effects in the Mass Spectra of Rotenoids 649

I. N. Kostova and N. N. Mollova

- 21.1. Introduction 649
- 21.2. Compounds with a Carbonyl Function at C12 649

21.3. Compounds with a Hydroxyl Group at C12	651
21.4. Spiro-Rotenoid Compounds	653
21.5. Conclusions	655
22. Stereochemical Effects in the Mass Spectra of Organometallic Compounds	657
<i>Yurii S. Nekrasov and Dmitrii V. Zagorevskii</i>	
22.1. Simple Bond-Cleavage Reactions	658
22.2. Rearrangements Involving Migration of the Substituent Moiety to the Central Metal Atom	661
22.3. Dehydration Processes	662
22.4. Hydrogen Rearrangements	664
22.5. Skeletal Rearrangements	666
22.6. Conclusions	668
Appendix A. The Use of Labeled Compounds	673
<i>Frantisek Turecek</i>	
A.1. Isotope Exchange in the Ion Source and Inlet Systems	673
A.2. Corrections of the Deuterium Content in Labeled Compounds; Corrections for Incomplete Labeling and Natural Isotopes	674
A.3. Corrections for Fragment Ions at Nearby m/z Values	677
A.4. Isotope Effects	678
Appendix B. Estimation of Heats of Formation	681
<i>Janet S. Splitter</i>	
Index	689
