

CONTENTS

Preface.	IX
Chapter 1. Fundamental Relationships of Chromatography.	1
1.1 Introduction	1
1.2 Retention.	2
1.3 Flow in Porous Media	6
1.4 Band Broadening Mechanisms	7
1.5 Parameters Affecting Resolution.	20
1.6 Peak Shape Models.	21
1.7 Retention Index Systems.	23
1.8 References	26
Chapter 2. The Column in Gas Chromatography	29
2.1 Introduction	30
2.2 Gas-Liquid Chromatography.	31
2.3 Preparation of Packed Columns.	60
2.4 Performance Evaluation of Packed Columns	62
2.5 Contribution of Interfacial Adsorption to Retention in Gas-Liquid Chromatography	63
2.6 Bonded Liquid Phases	65
2.7 Porous Polymer Beads	68
2.8 Gas-Solid Chromatography	72
2.9 Micropacked Columns.	78
2.10 Open Tubular Columns	79
2.11 Evaluation of the Quality of Open Tubular Columns.	109
2.12 The Mobile Phase in Gas Chromatography	121
2.13 Supercritical Fluid Chromatography	124
2.14 References	132
Chapter 3. Instrumental Requirements for Gas Chromatography	145
3.1 Introduction	145
3.2 Syringe Injection Techniques	148
3.3 Injection Devices for Open Tubular Capillary Columns	150
3.4 Detection Devices for Gas Chromatography	160
3.5 Column Effluent Splitters for Parallel Detection	194

3.6	Multidimensional Gas Chromatography.	195
3.7	Temperature and Flow Programming	202
3.8	References	205
Chapter 4. The Column in Liquid Chromatography.		213
4.1	Introduction	214
4.2	Selection of the Separation Method	215
4.3	Column Packing Materials for HPLC.	216
4.4	Column Preparation	232
4.5	Column Testing and Evaluation.	241
4.6	Radial Compression Columns	253
4.7	Guard Columns.	254
4.8	Mobile Phase Selection in HPLC	255
4.9	Gradient Elution in Liquid Chromatography.	265
4.10	Liquid-Solid Chromatography.	271
4.11	Polar Bonded Phases.	282
4.12	Reversed-Phase Chromatography.	284
4.13	Size-Exclusion Chromatography.	290
4.14	Ion-Exchange Chromatography.	304
4.15	Ion Chromatography	313
4.16	Microcolumns in Liquid Chromatography.	317
4.17	High Speed Liquid Chromatography	332
4.18	Multidimensional Liquid Chromatography	334
4.19	Temperature and Flow Programming in Liquid Chromatography.	342
4.20	References	345
Chapter 5. Instrumental Requirements for High Performance Liquid Chromatography		353
5.1	Introduction	353
5.2	Equipment Specifications	354
5.3	Solvent Reservoirs and Solvent Degassing	356
5.4	High Pressure Pumps.	358
5.5	Gradient Devices	364
5.6	Injection Devices.	368
5.7	Detectors for Liquid Chromatography.	370
5.8	Data Acquisition and Signal Processing	389
5.9	Quantitative Analysis.	393
5.10	References	395
Chapter 6. Preparative-Scale Chromatography		399
6.1	Introduction	399

6.2	Gas Chromatography	399
6.3	Low- and Medium-Pressure Liquid Chromatography	408
6.4	High-Pressure Liquid Chromatography.	414
6.5	Countercurrent Chromatography.	424
6.6	References	426

Chapter 7. Sample Preparation for Chromatographic Analysis. 429

7.1	Introduction	430
7.2	Isolation and Concentration Techniques using Physical Methods.	432
7.3	Isolation and Concentration Techniques using Solvent Extraction.	438
7.4	Sample Cleanup using Liquid-Solid Chromatography	448
7.5	The Use of Internal Standards.	452
7.6	Sorption Techniques for Trace Enrichment of Dilute Solutions	453
7.7	On-Line Trace Enrichment by HPLC	461
7.8	Static Headspace Analysis.	463
7.9	Dynamic Headspace and Gas Phase Stripping Analysis	469
7.10	Sampling Methods for Volatile Organic Compounds in Air	473
7.11	Personal Sampling and Occupational Hygiene	480
7.12	Methods for Preparing Standard Mixtures of Volatile Organic Compounds in Air	482
7.13	Derivatization Techniques for Gas Chromatography	485
7.14	Derivatization Techniques for High Performance Liquid Chromatography	511
7.15	Derivatives for the Separation of Inorganic Cations and Anions	537
7.16	Visualization Techniques for Thin-Layer Chromatography	541
7.17	Separation of Stereoisomers and Diastereomers.	544
7.18	Complexation Chromatography.	553
7.19	Ligand-Exchange Chromatography	556
7.20	Qualitative Identification and Microreaction Techniques for Gas Chromatography	557
7.21	Pyrolysis Gas Chromatography	562
7.22	References	565

Chapter 8. Hyphenated Methods for Identification After Chromatographic Separation 583

8.1	Introduction	583
8.2	Instrumentation for Mass Spectrometry.	584
8.3	Interfacing a Gas Chromatograph to a Mass Spectrometer	591
8.4	Interfacing a Liquid Chromatograph to a Mass Spectrometer.	599
8.5	Computer Acquisition of Mass Spectral Data	603
8.6	Quantitative Selected Ion Monitoring	607

VIII

8.7	On-Line Coupling of a Gas or Liquid Chromatograph with a Fourier Transform Infrared Spectrometer.	608
8.8	Interfacing a Liquid Chromatograph to a Nuclear Magnetic Resonance Spectrometer	613
8.9	Gas Chromatography-Optical Emission Spectroscopy	614
8.10	References	615
Chapter 9. High Performance Thin-Layer Chromatography		619
9.1	Introduction	619
9.2	Comparison of Conventional and High Performance Thin-Layer Chromatography	620
9.3	Comparison of High Performance Liquid and Thin-Layer Chromatography.	621
9.4	Simplified Theory of High Performance Thin-Layer Chromatography.	625
9.5	High Performance Thin-Layer Chromatographic Plates	634
9.6	Sample Application in High Performance Thin-Layer Chromatography	640
9.7	Linear and Radial Development.	643
9.8	Continuous and Multiple Development.	644
9.9	Development Chambers for HPTLC	652
9.10	Quantitative Evaluation of Thin-Layer Chromatograms.	656
9.11	Operating Requirements for Scanning Densitometers.	659
9.12	Application Highlights from the HPTLC Literature	665
9.13	Thin-Layer Chromatography on Polyamide Layers.	686
9.14	Thin-Layer Gel Chromatography.	687
9.15	Sintered Thin-Layer Chromatography	688
9.16	Radiochromatography on Thin-Layer Plates	689
9.17	Preparative Thin-Layer Chromatography.	691
9.18	Paper Chromatography	693
9.19	References	696
Subject Index.		701
