

CONTENTS

<i>Introduction to the Series</i>	xi
<i>Preface</i>	xiii
<i>Contributors to Volume 1</i>	xv

1. INTRODUCTION	1
-----------------	---

M. J. Schick

I. ORGANIC CHEMISTRY OF NONIONIC SURFACTANTS

2. MECHANISM OF ETHYLENE OXIDE CONDENSATION	8
---	---

N. Shachat and H. L. Greenwald

2.1. Introduction	8
2.2. Chemistry of Ethylene Oxide	9
2.3. Ethylene Oxide Chain-Length Distribution	28
References	42

3. POLYOXYETHYLENE ALKYLPHENOLS	44
---------------------------------	----

C. R. Enyeart

3.1. Introduction	44
3.2. Hydrophilic Intermediates	45
3.3. Hydrophobic Intermediates	47
3.4. Polyoxyethylene Alkylphenols	54
3.5. Properties of Polyoxyethylene Alkylphenols	72
3.6. Applications	80
References	83

4. POLYOXYETHYLENE ALCOHOLS	86
<i>W. B. Satkowski, S. K. Huang, and R. L. Liss</i>	
4.1. Introduction	86
4.2. Synthesis of the Hydrophobic Intermediates	87
4.3. Preparation of Polyoxyethylene Alcohols	92
4.4. Properties of Polyoxyethylene Alcohols	102
4.5. Applications	133
References	138
5. POLYOXYETHYLENE ESTERS OF FATTY ACIDS	142
<i>W. B. Satkowski, S. K. Huang, and R. L. Liss</i>	
5.1. Introduction	142
5.2. Sources of Hydrophobic Intermediates	143
5.3. Preparation of Polyoxyethylene Esters of Fatty Acids	149
5.4. Properties of Polyoxyethylene Esters of Fatty Acids	153
5.5. Applications	165
References	170
6. POLYOXYETHYLENE MERCAPTANS	175
<i>H. Lemaire</i>	
6.1. Introduction	175
6.2. Synthesis of the Thiol Intermediates	176
6.3. Preparation of Polyoxyethylene Mercaptans	177
6.4. Physical Properties	179
6.5. Applications	185
References	185
POLYOXYETHYLENE ALKYLAMINES	187
<i>R. A. Reck</i>	
7.1. Introduction	187
7.2. Preparation and Chemistry	188
7.3. Physical Properties	197
7.4. Applications	204
References	204

8. POLYOXYETHYLENE ALKYLAMIDES 208

E. Jungermann and D. Taber

8.1. Introduction	209
8.2. Raw Materials	211
8.3. Alkanolamide Synthesis	213
8.4. The Synthesis of Polyoxyethylene Amides	220
8.5. Miscellaneous Polyoxyethylene Amides	222
8.6. Alkanolamide Analysis	225
8.7. Reactions of Alkanolamides and Polyoxyethylene Amides	226
8.8. Properties of Alkanolamides	231
8.9. Properties of Polyoxyalkylene Alkylamides	233
8.10. Alkanolamide Applications	234
8.11. Polyoxyethylene Alkylamide Applications	237
References	239

9. POLYOL SURFACTANTS 247

F. R. Benson

9.1. Introduction	247
9.2. Chemistry of Polyol Surfactants	248
9.3. Physical Properties of Polyol Surfactants	272
9.4. Applications of Polyol Surfactants	281
References	292

10. POLYALKYLENE OXIDE BLOCK COPOLYMERS 300

I. R. Schmolka

10.1. Introduction	300
10.2. Monofunctional Initiators	301
10.3. Bifunctional Initiators	309
10.4. Trifunctional Initiators	346
10.5. Tetrafunctional Initiators	352
10.6. Pentafunctional Initiators	361
10.7. Hexafunctional Initiators	362
10.8. Octafunctional Initiators	362
References	363

11. NONIONICS AS IONIC SURFACTANT INTERMEDIATES 372

L. W. Burnette

11.1. Introduction	372
11.2. Sulfates	373
11.3. Phosphates	384
11.4. Carboxylates	388
11.5. Quaternary Ammonium Compounds	389
References	392

12. MISCELLANEOUS NONIONIC SURFACTANTS 395

L. W. Burnette

12.1. Introduction	395
12.2. Fatty Alkanolamides	396
12.3. Amine Oxides	403
12.4. Sulfoxides and Phosphine Oxides	410
12.5. Modifications by Reaction of Hydroxyl Groups	411
12.6. Polycyclic Hydrophobes	412
12.7. Acetylenic Glycols and Polyoxyethylene Derivatives	413
12.8. Nonionic Surfactants as Iodophors	414
12.9. Oxyethylated Fats and Oils	416
12.10. Polyoxyethylene Derivatives of Phosphorus Compounds	417
12.11. Fluorinated Hydrophobes	418
References	418

13. SYNTHESIS OF HOMOGENEOUS NONIONIC SURFACTANTS 421

B. A. Mulley

13.1. Introduction	421
13.2. Synthesis and Isolation	422
13.3. Characterization and Evidence of Purity	432
References	439

II. PHYSICAL CHEMISTRY OF NONIONIC SURFACTANTS

14. SURFACE FILMS 443

H. Lange

14.1. Introduction	443
14.2. Spread Films	447

14.3. Adsorbed Films	456
14.4. Correlations between Spread and Adsorbed Films	473
References	476

15. MICELLE FORMATION IN AQUEOUS AND NONAQUEOUS SOLUTIONS 478

P. Becher

15.1. Introduction	478
15.2. Micelle Formation in Aqueous Solution	479
15.3. Micelle Formation in Nonaqueous Solution	511
References	513

16. THERMODYNAMICS OF MICELLE FORMATION 516

D. G. Hall and B. A. Pethica

16.1. Introduction	516
16.2. Models of Micelle Formation	517
16.3. Application of Small-System Thermodynamics to Micelle Formation	522
16.4. Experimental Data and Its Significance	543
Appendix. An Alternative Derivation of the Thermodynamic Functions of Micelle Formation	552
References	555

17. SOLUBILIZATION 558

T. Nakagawa

17.1. Qualitative Interpretation of the Solubilization Mechanism	558
17.2. Determination of the CMC by Solubilization Measurements	561
17.3. A Quantitative Theory of Solubilization	565
17.4. Change of Micelle Composition Caused by Solubilization	567
17.5. Dependence of Solubilization on Temperature and Cloud Point	571
17.6. Empirical Rules for Saturation Amount of Solubilization	582
17.7. Solubilization by Mixed Surfactants	588
17.8. Solubilization in Concentrated Solution	589
17.9. Less Familiar Types of Solubilization	593
17.10. Time Dependence of Solubilization	598
17.11. Collection of Solubilization Data	598
References	600

18. EMULSIFICATION	604
<i>P. Becher</i>	
18.1. Introduction	604
18.2. Preparation of Emulsions	606
18.3. Testing of Emulsions	613
18.4. Applications of Nonionic Emulsifiers	614
18.5. Interfacial Properties of Nonionic Surfactants	614
References	625
19. EFFECT OF NONIONIC SURFACTANTS ON THE STABILITY OF DISPERSIONS	627
<i>R. H. Ottewill</i>	
19.1. Introduction	627
19.2. Interfacial Adsorption of Nonionic Surfactants	629
19.3. Particle-Particle Interactions	642
19.4. Experimental Studies on the Effect of Nonionic Surfactants on Electrokinetic Properties of Dispersions	658
19.5. Experimental Studies of Effects of Nonionic Surfactants on the Stability of Dispersions	663
References	680
20. DETERGENCY	683
<i>J. C. Harris</i>	
20.1. Detergency Values of Nonionic Surfactants	683
20.2. Correlation between Detergency and Other Factors	704
20.3. Some Other Pertinent Detergency Factors	715
References	730
21. FOAMING	733
<i>G. M. Gantz</i>	
21.1. Introduction	733
21.2. Theory of Foaming	734
21.3. Foaming Properties of Nonionic Surfactants	738
21.4. Foam Stabilizers	743
21.5. Foam Inhibitors	745
21.6. Low Foamers	747
21.7. Industrial Applications	747
References	751

22. CONFIGURATION OF THE POLYOXYETHYLENE CHAIN
IN BULK 753

M. Rösch

22.1. Introduction	753
22.2. X-Ray Investigations of Organic-Chain Molecules	754
22.3. X-Ray Investigations of Ionic Surfactants	756
22.4. X-Ray Investigations of Nonionic Surfactants	758
22.5. Speculative Considerations of the Fine-Structure of the Polyoxyethylene Chain and Macromolecular Lattice of Nonionic Surfactants	774
22.6. Investigation of Fine-Structure of Polyoxyethylene Chain by Alternate Methods	782
22.7. Conclusions	791
References	792

23. CONFIGURATION AND HYDRODYNAMIC PROPERTIES
OF THE POLYOXYETHYLENE CHAIN IN SOLUTION 794

F. E. Bailey, Jr., and J. V. Koleske

23.1. Introduction	794
23.2. Solution Properties	795
23.3. Configuration of the Polyoxyethylene Molecule in Solution	811
23.4. Dielectric Behavior	817
23.5. Association Complexes	818
23.6. Polypropylene Oxide	820
References	821

III. ANALYTICAL CHEMISTRY OF NONIONIC SURFACTANTS

24. INTRODUCTION TO ANALYTICAL CHEMISTRY
OF NONIONIC SURFACTANTS 825

H. G. Nadeau and S. Siggia

24.1. General Considerations	825
24.2. Analytical Considerations	826
24.3. Conclusion	836
References	836

25. NONINSTRUMENTAL METHODS OF ANALYSIS	838
<i>H. G. Nadeau and S. Siggia</i>	
25.1. Introduction	838
25.2. Gravimetric Methods	839
25.3. Volumetric Methods	841
25.4. Spectrophotometric Methods	845
25.5. Physical Methods	849
25.6. Structural Characterization	852
25.7. Trace Analysis	855
References	858
26. INSTRUMENTAL METHODS OF ANALYSIS	860
<i>H. G. Nadeau and S. Siggia</i>	
26.1. Introduction	860
26.2. Determination of Nonionic Surfactants by Molecular Absorption Spectroscopy	861
26.3. Characterization of Nonionic Surfactants by NMR	888
26.4. Characterization of Nonionic Surfactants by X-Ray Dif- fraction	891
References	891
27. SEPARATIONAL METHODS	893
<i>H. G. Nadeau and P. H. Waszeczak</i>	
27.1. Introduction	893
27.2. Ion Exchange Methods	894
27.3. Chromatographic Methods	900
References	919

IV. BIOLOGY OF NONIONIC SURFACTANTS

28. PHYSIOLOGICAL ACTIVITY OF NONIONIC SURFACTANTS	923
<i>P. H. Elworthy and J. F. Treon</i>	
28.1. Introduction	924
28.2. Acute Toxicity	925

28.3. Subacute and Chronic Toxicity	934
28.4. Metabolic Fate	944
28.5. Effects on the Gastrointestinal Tract	947
28.6. Effects on the Cardiovascular System	947
28.7. Effects on Blood	948
28.8. Miscellaneous Pharmacological Effects	951
28.9. Effects on Isolated Tissues	951
28.10. Some Effects with Enzymes	952
28.11. Effects on the Eye	953
28.12. Effects on the Skin	954
28.13. Effects on Microorganisms	958
28.14. Phytotoxicity	960
Appendix A. Toxicity of Ethylene Oxide	960
Appendix B. Toxicity of Propylene Oxide	961
References	961
 29. BIODEGRADATION	 971
<i>M. J. Schick</i>	
29.1. Introduction	971
29.2. Biochemical Oxidation	972
29.3. Test Methods	974
29.4. Biodegradation of Nonionic Surfactants	977
29.5. Concluding Remarks	991
References	995
 <i>Author Index</i>	 997
<i>Subject Index</i>	1041
