

Contents

1	Introduction	15
2	Physical, chemical and toxicological properties.....	17
2.1	Physical properties of titanium dioxide	17
2.2	Chemical properties of titanium dioxide	28
2.3	Toxicological properties of titanium dioxide	29
2.3.1	Oral intake.....	34
2.3.2	Parenteral uptake	34
2.3.3	Percutaneous uptake.....	35
2.3.4	Hypodermic (through the skin) injection	35
2.3.5	Inhalation	35
3	Production.....	39
3.1	Raw materials.....	39
3.2	Sulfate process	42
3.3	Chloride process.....	44
3.4	Inorganic and organic surface treatments.....	46
4	Optical properties	51
4.1	Fundamentals of color measurement	51
4.1.1	CIELAB-values of titanium dioxide pigments	55
4.2	Electromagnetic waves (“radiation”)	56
4.3	Light absorption, light scattering, reflection and diffraction	56
4.3.1	Particle size dependency of light absorption.....	59
4.3.2	Particle size dependency of light scattering	61
4.4	Mie theory.....	62
4.4.1	PVC – dependency of light scattering.....	67

4.5	Kubelka-Munk theory – relative scattering power	68
4.6	Determination of the spectral scattering coefficient.....	71
4.7	Hiding power.....	71
4.7.1	Standardized methods for determining hiding power	71
4.7.2	Hiding power of sulfate and chloride grade pigments	74
4.8	Lightening power	75
4.9	Color tint	76
4.10	Gloss and haze	78
4.11	Substitute materials for titanium dioxide pigments	79
5	Photo catalytic properties.....	83
5.1	Chalking cycle.....	83
5.2	Photo activity of anatase and rutile.....	86
5.3	Accelerated and natural weathering.....	88
5.4	Accelerated tests for monitoring photo activity	91
6	Dispersing	93
6.1	Steps taking place during dispersion	93
6.2	Wetting	95
6.3	Mechanical de-agglomeration.....	97
6.3.1	Mill base formulation.....	97
6.3.2	Agglomerate strength.....	97
6.3.3	Relationship between time length of dispersion, mechanical power input and dispersion success	99
6.4	Stabilization against flocculation	101
6.4.1	Electrostatic stabilization	102
6.4.2	Zeta potential	102
6.4.3	Stabilization by adsorption of polyelectrolytes.....	107
6.4.4	Adsorption of ions.....	108
6.4.5	Steric (entropic) stabilization	110
6.5	Rub out effect and Benard cells	112
6.6	Final remarks	114
7	Nano-titanium dioxide	117
7.1	Production of nano-titanium dioxides.....	117

7.2	Properties of titanium dioxide nano-particles.....	118
7.3	Nano-titanium dioxides as UV absorbers	120
7.4	Nano-titanium dioxides as effect pigments.....	122
8	Titanium dioxide in catalysis	125
8.1	DeNOx catalysts.....	128
8.2	Diesel catalysts.....	129
8.3	Titanium dioxide in photo catalysis	130
8.4	Titanium dioxide as a catalyst for the production of biodiesel	133
9	Titanium dioxide in photovoltaic cells and chromatography	137
	Author.....	143
	Index	145
