

Content

1	History of effect pigments	13
2	Optical principles, manufacture, properties and types of special effect pigments	16
2.1	Optical principles.....	20
2.1.1	Reflection and refraction at one and at several interfaces	20
2.1.2	Pearl luster and interference effects.....	26
2.2	Natural pearl luster pigments.....	32
2.3	Basic lead carbonate	34
2.4	Bismuth oxychloride	36
2.5	Micaceous iron oxide	38
2.6	Titanium dioxide flakes	39
2.7	Flaked organic effect pigments.....	40
2.8	Metal oxide mica pigments	40
2.8.1	Titanium dioxide mica pigments	46
2.8.2	Iron(III) oxide mica pigments	54
2.8.3	Combination pigments.....	57
2.8.4	Mica pigments with multilayers	59
2.8.5	Pigments for outdoor applications.....	60
2.8.6	Mica pigments for new optical effects	61
2.8.6.1	Silver-gray and black pigments	61
2.8.6.2	Mica pigments without pearl luster: "Transparent Colors" ...	64
2.8.6.3	Mica pigments with low pearl luster: "Low Luster Pigments"	66
2.8.7	Functional metal oxide mica pigments.....	66
2.8.7.1	Light colored, electrically conductive pigments	67
2.8.7.2	Magnetic pigments	70
2.8.7.3	Pigments for the laser marking of plastics	70
2.8.7.4	Solar heat-reflecting pigments	70
2.9	Effect pigments based on alumina flakes	72

2.10	Effect pigments based on borosilicate flakes.....	74
2.11	Effect pigments based on silicon dioxide flakes.....	76
2.12	Effect pigments based on iron oxide flakes	79
2.13	Effect pigments consisting of metal oxide-coated metal platelets.....	80
2.14	Multilayer pigments with a Fabry-Perot structure manufactured using the PVD-method	82
2.15	Effect pigments based on liquid-crystal polymers (cholesteric effect pigments)	84
2.16	Structured effect pigments.....	86
2.16.1	Holographic pigments	86
2.16.2	Diffraction pigments	87
3	Special effect pigments in paints	92
3.1	General comments on the use, application and processing ...	92
3.2	Technology comparison for the coloring of plastics and paints.....	96
3.3	Incorporation, dispersion and stabilization.....	98
3.4	Sedimentation	103
3.5	Surface treated effect pigments in paints.....	107
3.6	Particle geometry and orientation.....	109
3.7	Consequences of the application	113
3.8	Color and effect creation	115
3.9	Special effect pigments in paint.....	118
3.10	Special effect pigments in paints films and their properties...	122
3.11	Examples of use.....	124
4	Special effect pigments in plastics	137
4.1	General information on the application of pearl luster pigments in plastics	137
4.1.1	Transparency of the plastic matrix	137
4.1.2	Dispersion of the pearl luster pigments.....	137
4.1.3	Orientation of the pigment platelets	139
4.1.4	Applications for pearl luster pigments	139
4.2	Pearl luster pigments in duromers	139

4.2.1	Unsaturated polyester casting resins	140
4.2.2	Polymethyl methacrylat casting resins	143
4.2.3	Orientation methods for PMMA cast resin sheets	144
4.2.4	Laminating resins	147
4.2.5	Compression molding compounds	148
4.3	Pearl luster pigments in thermoplastics	149
4.3.1	Effect designing	150
4.3.2	Pigment selection and pigment concentration	150
4.3.3	Marble effects	153
4.3.4	Application procedures for pigmenting thermoplastics	154
4.3.5	Pigmentation of thermoplastics with pigment preparations ..	156
4.3.6	Special cases of pearl luster pigmentation	158
4.3.7	Processing pearl luster molding materials and recycling	160
4.4	Pearl luster pigments for laser marking	165
4.4.1	Functionality of laser-sensitive pearl luster pigments	166
4.4.2	Laser marking methods	166
4.4.3	Laser welding	168
5	Special effect pigments in printing inks	171
5.1	Importance of pearl luster pigments in the printing industry	171
5.1.1	Design effects	171
5.1.2	Environmental protection	172
5.2	Application areas	173
5.2.1	Printing onto textile fabrics	173
5.2.2	Wallpapers and furniture facings	174
5.2.3	Fine papers and carton board	174
5.2.4	Packaging	175
5.3	Applicable printing methods	175
5.3.1	Pearl luster pigments in gravure printing	175
5.3.2	Pearl luster pigments in flexographic printing	178
5.3.3	Pearl luster pigments in screen printing	181
5.3.4	Pearl luster pigments in wet offset printing	185
5.3.5	Pearl luster pigments in other lithographic offset printing methods	189

5.3.6	Pearl luster pigments in offset coating	189
5.3.7	Pearl luster pigments in the bronzing process	190
5.3.8	Pearl luster pigments in other coating processes	192
5.4	Evaluation of the print results.....	193
5.4.1	Print down and print run characteristics.....	193
5.4.2	Coloristics.....	194
6	Special effect pigments in cosmetics	195
7	Colorimetry of special effect pigments	197
7.1	General information.....	197
7.2	Practical color measurement of effect pigments.....	198
7.3	Color measurement systems for effect pigments.....	198
7.3.1	Angle-dependent color measurement – a historical review ..	198
7.3.2	Angle-dependent color measurement – a general review.....	201
7.3.3	Angle-dependent color measurement – new developments ..	203
7.4	Possible applications of colorimetric measurement for effect pigments.....	205
8	Impact of special effect pigments on humans and the environment	209
8.1	Proof of physiological compatibility.....	209
8.2	Regulatory approval of metal oxide mica pigments.....	209
	Acknowledgement.....	212
