1 Alkylphenol ethoxylates: biodegradability, aquatic toxicity and environmental fate	1
C.-D. HAGER	
1.1 Background	1
1.2 Biodegradability	3
1.3 Pathways of biodegradation	6
1.4 Removal of NPEs in sewage treatment plants	8
1.5 Fate and levels in sludge	12
1.6 Fate in soil	13
1.7 Fate and levels in rivers and sediments	14
1.8 Aquatic toxicity	18
1.9 Bioconcentration	20
1.10 Estrogenic effects of NPEs	24
References	25
2 Surfactants in environmental remediation: aquifer restoration	30
J.H. HARWELL, R.C. KNOX and D.A. SABATINI	
2.1 Introduction	30
2.1.1 Groundwater contamination	30
2.1.2 Surfactant studies	34
2.2 Overview of the potential of surfactant-enhanced aquifer remediation	35
2.3 Recent results	41
2.4 Summary and conclusions	54
Acknowledgements	55
References	56
3 Current developments in cationic surfactants	59
D.S. STEICHEN and J.F. GADBERRY	
3.1 Introduction and background	59
3.2 Manufacturing processes	59
3.2.1 Amine preparation	59
3.2.2 Quaternization	62
3.3 Applications of cationic surfactants	63
3.3.1 Fabric softeners	63
3.3.2 Dryer softeners	68
3.3.3 Softergents	70
3.3.4 Hair conditioners	70
3.3.5 Detergents	72

3.3.6	Thickeners	72
3.3.7	Hard-surface cleaners	73
3.3.8	Cationic surfactants in polymerization	73
3.3.9	Organoclays	75
3.3.10	Miscellaneous	75
3.3.11	Surfactant recovery	76
3.4	Developments in cationic surfactants	76
3.4.1	Cationic surfactant/non-ionic polymer systems	76
3.4.2	Cationic surfactant/cellulosic systems	76
3.4.3	Cationic surfactant/charged polymer systems	77
3.4.4	Inorganic/cationic surfactant systems	77
3.4.5	Traditional cationic surfactants	78
3.4.6	Influence of anions	79
3.4.7	Symmetrical diquatertiary surfactants: gemini surfactants	80
3.4.8	Catanionic surfactants	81
3.4.9	Cationic/non-ionic surfactant systems	82
3.4.10	Calculated surfactant properties	83
	References	82
