

# Table of contents

1. Introduction	9
2. Applied definitions, abbreviations and symbols	13
3. Formal and legal basis and related documents	19
4. Formal requirements for products and installations in use, conformity assessment, design, performance of technical inspections and maintenance activities	27
5. Providing conditions for rescue and firefighting operations in construction objects, with stations designed for charging electric and plug-in hybrid cars	35
6. Characteristics of sites in construction objects for charging electric and plug-in hybrid cars	41
7. Identification and risk assessment of sites for storing and charging electric and plug-in hybrid cars	45
1. Identification of risks	47
2. Analysis and assessment of the risks to garages in buildings equipped with charging points for electric and plug-in hybrid cars	54
8. Selected issues concerning operation of installations	57
1. Charging electric and plug-in hybrid vehicles from electrical outlets	59
2. Vehicle charging from mobile chargers	61
3. Vehicle charging from stationary chargers (charging points)	62
4. Using extension cords to charge electric or plug-in hybrid cars	63
9. Key factors influencing the fire safety of indoor and outdoor locations designed for charging electric and plug-in hybrid cars	65
1. Introduction	67
2. Technical and construction conditions of the garage	70
3. Number of charging points and number of parking stalls suitable for installation of charging points	70
4. Location of charging points in the garage	71
5. Active and passive fire protection in the garage	71
6. Electrical safety features used in the construction facility, including, in particular, safety features for electric and plug-in hybrid vehicle charging points	76
7. Safety features used in electric and plug-in hybrid vehicles	89

<b>10. Fire protection requirements for on-site and off-site locations for charging electric and plug-in hybrid cars</b>	<b>93</b>
1. Introduction	95
2. Analysis and evaluation of fire protection conditions in buildings	96
3. Classification and characterization of fire detection and information transmission and containment devices used for the fire hazard analysis and assessment under consideration	100
4. Checklist for analyzing and evaluating the fire safety of electric car and plug-in hybrid charging points	105
<b>11. Certification of fire protection conditions for the installation of charging points for electric and plug-in hybrid vehicles</b>	<b>115</b>
<b>12. Certification of competence in design, installation and maintenance</b>	<b>119</b>
<b>13. Research results referenced and conducted</b>	<b>123</b>
<b>14. Summary</b>	<b>155</b>
<b>15. Annexes</b>	<b>159</b>
