

# TABLE OF CONTENTS

## 1. NUCLEAR INTERACTIONS

|      |                                                                                                                                                                        |    |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 1.1  | EVALUATION OF THE $pp\pi^0$ COUPLING CONSTANT FROM LOW ENERGY p-p SCATTERING<br>R.D. Viollier, G.R. Plattner, K. Alder .....                                           | 1  |
| 1.2  | EXPLICIT ENERGY-DEPENDENCE OF A FIELD-THEORETIC N-N POTENTIAL<br>W.T. Nutt, L. Wilets .....                                                                            | 2  |
| 1.3  | RELATIVISTIC TWO-NUCLEON POTENTIAL FROM BETHE-SALPETER EQUATION<br>K. Erkelenz, K. Holinde .....                                                                       | 3  |
| 1.4  | $\rho$ - $\omega$ MIXING AND LOW ENERGY n-n SCATTERING PARAMETERS<br>G.J. Stephenson, Jr., B.F. Gibson .....                                                           | 4  |
| 1.5  | SUPER-SOFT-CORE P-P POTENTIAL WITH TWO-PION-AND $\omega$ -EXCHANGE CONTRIBUTIONS<br>R. de Tourreil, B. Rouben .....                                                    | 5  |
| 1.6  | NEUTRON-NEUTRON SCATTERING LENGTH AND BREAKING OF CHARGE SYMMETRY<br>R. Grötzschel, B. Kühn, H. Kumpf, K. Möller, J. Mösner, G. Schmidt, T. Stiehler, S. Tesch .....   | 6  |
| 1.7  | MOMENTUM SPACE BEHAVIOUR OF THE DEUTERON WAVE FUNCTIONS<br>W. Plessas, H.F.K. Zingl .....                                                                              | 7  |
| 1.8  | MESON CURRENT CORRECTIONS TO MANY BODY THEORY<br>D. Schütte .....                                                                                                      | 8  |
| 1.9  | A DENSITY-DEPENDENT LOCAL EFFECTIVE INTERACTION DERIVED FROM A RELATIVISTIC ONE-BOSON-EXCHANGE-POTENTIAL (OBEP)<br>R.Machleidt, K.Bleuler, K.Erkelenz, K.Holinde ..... | 9  |
| 1.10 | DENSITY-DEPENDENT EFFECTIVE INTERACTION DETERMINED VARIATIONALLY FROM THE FREE N-N POTENTIAL<br>M.E. Grypeos, E. Mavrommatis .....                                     | 10 |

|      |                                                                                                                                                             |    |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 1.11 | DERIVATION OF DENSITY-DEPENDENT FORCES WITHOUT<br>RECOURSE TO NUCLEAR MATTER CALCULATIONS<br>Amand Faessler, H.Müther, Ram K. Tripathi .....                | 11 |
| 1.12 | MESON-CURRENT CORRECTIONS IN NUCLEAR MATTER<br>K.Holinde, K.Kotthoff, R.Machleidt, D.Schütte.....                                                           | 12 |
| 1.13 | MESON-CURRENT CORRECTIONS TO THE STATE EQUATION OF<br>NEUTRON MATTER<br>K.Bleuler, K.Holinde, K.Kotthoff, R.Machleidt .....                                 | 13 |
| 1.14 | EFFECTIVE MASS EFFECTS IN EXCITED NUCLEAR MATTER<br>W.Stocker .....                                                                                         | 14 |
| 1.15 | SYMMETRY COEFFICIENT OF NUCLEAR MATTER IN SECOND-<br>ORDER PERTURBATION THEORY<br>J. Côté, B. Rouben, J.M. Pearson .....                                    | 15 |
| 1.16 | NUCLEAR BINDING ENERGIES USING A MODIFIED FORM OF<br>THE SUSSEX MATRIX ELEMENTS<br>J.P. Elliott, E.A. Sanderson .....                                       | 16 |
| 1.17 | RECENT CALCULATIONS OF THE BINDING ENERGY OF A $\Lambda$ IN<br>NUCLEAR MATTER<br>M.E. Grypeos .....                                                         | 17 |
| 1.18 | ONE-BOSON-EXCHANGE-POTENTIAL AND STRUCTURE OF FINITE<br>NUCLEI IN THE LOCAL-DENSITY APPROXIMATION<br>J. Németh, R. Machleidt, K. Holinde .....              | 18 |
| 1.19 | $p + D \rightarrow p + n + n$ REACTION AT 155 MeV AND NUCLEON-<br>NUCLEON INTERACTION<br>M.L'Huillier, J.L. Ballot, P.Benoist-Gueutal .....                 | 19 |
| 1.20 | THE APPLICATION OF T-MATRIX PERTURBATION THEORY IN<br>TRITON BINDING ENERGY CALCULATIONS<br>J.S. Levinger, B. Siebert .....                                 | 20 |
| 1.21 | A NEW VARIATIONAL METHOD AND BINDING ENERGIES OF THE<br>TRITON AND THE ALPHA PARTICLE WITH REALISTIC<br>POTENTIALS<br>Y. Akaishi, M. Sakai, H. Tanaka ..... | 21 |
| 1.22 | CHARGE FORM FACTOR OF $^4\text{He}$ AND $^3\text{He}$ WITH REALISTIC<br>POTENTIALS<br>T.Katayama, Y.Akaishi, J. Hiura, H. Tanaka .....                      | 22 |
| 1.23 | WHAT HAS BEEN LEARNED ABOUT NUCLEAR FORCES FROM THE<br>STUDIES OF FEW-BODY BREAKUP EXPERIMENTS<br>Ivo Šlaus .....                                           | 23 |
| 1.24 | OFF-SHELL EFFECTS IN THREE-BODY SYSTEMS<br>P.U. Sauer, M. Stingl .....                                                                                      | 24 |

|      |                                                                                                                                                                |    |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 1.25 | THREE-NUCLEON CALCULATIONS WITHOUT THE EXPLICIT USE<br>OF TWO-BODY POTENTIALS<br>P.U. Sauer, J.A. Tjon .....                                                   | 25 |
| 1.26 | THE LINKED CLUSTER THEOREM IN FINITE MODEL SPACES<br>H.A. Mavromatis .....                                                                                     | 26 |
| 1.27 | A NON-PERTURBATIVE APPROXIMATION SCHEME FOR THE<br>EFFECTIVE INTERACTION IN NUCLEI<br>H.M.Hofmann,S.Y.Lee,J.Richert,H.A.Weidenmüller,<br>T.H.Schucan .....     | 27 |
| 1.28 | A CONVERGENT CALCULATION FOR THE EFFECTIVE<br>INTERACTION<br>H.M.Hofmann,S.Y.Lee,J.Richert,H.A.Weidenmüller,<br>T.H.Schucan .....                              | 28 |
| 1.29 | A MODEL OF SEPARABLE RESIDUAL INTERACTION<br>W. Knüpfer, M.G. Huber .....                                                                                      | 29 |
| 1.30 | EFFECTIVE INTERACTIONS AND CONSERVING APPROXIMATIONS<br>Hughues Nopre, Ernst Werner .....                                                                      | 30 |
| 1.31 | SPIN AND DENSITY DEPENDENCE OF EFFECTIVE INTERACTIONS<br>R.Sharp, L. Zamick .....                                                                              | 31 |
| 1.32 | NEW $1d_{5/2} \cdot 1p_{3/2}^{-1}$ STATES IN $^{16}\text{O}$ AS A TEST OF EFFECTIVE<br>INTERACTIONS<br>G. Mairle, G.J. Wagner .....                            | 32 |
| 1.33 | NATURE OF THE EFFECTIVE TWO-BODY INTERACTION SEEN IN<br>THE RENORMALIZATION OF G MATRIX AND IN THE<br>EFFECTIVE SHELL MODEL CALCULATIONS<br>Raj K. Gupta ..... | 33 |
| 1.34 | A DOUBLY-PARTITIONED CALCULATION OF THE EFFECTIVE<br>TWO-PARTICLE INTERACTION IN MASS-18 NUCLEI<br>B.R. Barrett .....                                          | 34 |
| 1.35 | EFFECTS OF NON-CENTRAL FORCES ON A=21 AND 22 NUCLEI<br>N.Anyas-Weiss, D. Strottman .....                                                                       | 35 |
| 1.36 | PARITY-MIXING OF THE GROUND AND FIRST EXCITED STATES<br>IN $^{19}\text{F}$<br>E.G.Adelberger,H.E.Swanson,J.W.Tape,M.D.Cooper ....                              | 36 |

2. SELFCONSISTENT THEORIES

|      |                                                                                                                |    |
|------|----------------------------------------------------------------------------------------------------------------|----|
| 2.1  | EXISTENCE OF NON-TRIVIAL HARTREE-FOCK SOLUTIONS                                                                |    |
|      | M. de Llano .....                                                                                              | 37 |
| 2.2  | SEMI SELF-CONSISTENT CALCULATION OF NUCLEI                                                                     |    |
|      | J. Németh, D. Kisdi .....                                                                                      | 38 |
| 2.3  | SELF-CONSISTENT CALCULATIONS OF NUCLEAR GROUND STATES PROPERTIES                                               |    |
|      | R.J. Lombard, M. Beiner .....                                                                                  | 39 |
| 2.4  | NUCLEAR MASSES WITH THE SKYRME INTERACTION                                                                     |    |
|      | H.Flocard, M.Beiner, P.Quentin, D. Vautherin .....                                                             | 40 |
| 2.5  | HARTREE-FOCK CALCULATIONS OF GROUND STATE PROPERTIES FOR SOME RARE EARTH NUCLEI                                |    |
|      | P.Quentin, H. Flocard, D. Vautherin .....                                                                      | 41 |
| 2.6  | DEFORMATION ENERGY CURVE OF $^{240}\text{Pu}$ WITH THE C.H.F. METHOD                                           |    |
|      | D. Vautherin, H. Flocard, P. Quentin .....                                                                     | 42 |
| 2.7  | H.F. CALCULATIONS PLUS 2 <sup>nd</sup> ORDER CORRECTIONS USING MODIFIED SUSSEX INTERACTION                     |    |
|      | C.P. Malta, E.A. Sanderson .....                                                                               | 43 |
| 2.8  | THE HARTREE-FOCK FIELD AND ENERGY SURFACES FOR SIMPLE MULTIPOLE POTENTIALS: AN EXAMPLE OF DEFORMATION BARRIERS |    |
|      | M. Harvey .....                                                                                                | 44 |
| 2.9  | VARIATIONAL CALCULATIONS WITH A DENSITY-DEPENDENT INTERACTION: SYSTEMATICS OF LIGHT NUCLEI                     |    |
|      | J.P. Svenne, N.E. Reid, N.E. Davison .....                                                                     | 45 |
| 2.10 | A HARTREE-FOCK REVIEW OF $^{28}\text{Si}$                                                                      |    |
|      | S.P. Pandya, D.R. Kulkarni .....                                                                               | 46 |
| 2.11 | DEFORMATION AND PAIRING CORRELATIONS IN THE f-p-g CONFIGURATION SPACE                                          |    |
|      | S.K. Sharma, S.B. Khadkikar .....                                                                              | 47 |
| 2.12 | HARTREE-FOCK BOGOLYUBOV METHOD WITH DENSITY-DEPENDENT INTERACTION                                              |    |
|      | D. Cogne .....                                                                                                 | 48 |
| 2.13 | ON THE SMEARING OF MULTIPLE HARTREE-FOCK (HF) MINIMA BY HARTREE-FOCK-BOGOLYUBOV (HFB) PAIRING CORRELATIONS     |    |
|      | S.K. Sharma .....                                                                                              | 49 |
| 2.14 | TOWARDS A UNIFIED, MICROSCOPIC THEORY OF NUCLEAR SPECTRA                                                       |    |
|      | K.Kumar, S. Wahlborn, J. Almberger .....                                                                       | 50 |

|      |                                                                                                                                              |    |
|------|----------------------------------------------------------------------------------------------------------------------------------------------|----|
| 2.15 | MICROSCOPIC DESCRIPTION OF ANTIPAIRING AND<br>ANTISTRETCHING IN sd AND pf SHELL NUCLEI<br>K.Allaart, A. Faessler, K. Goeke, F. Grümmer ..... | 51 |
| 2.16 | VALIDITY OF HARTREE-FOCK APPROXIMATION IN LIGHT<br>SPHERICAL NUCLEI<br>V. Satyan, J. Parikh .....                                            | 52 |
| 2.17 | REARRANGEMENT TERMS IN GROUND STATE CALCULATIONS<br>H. Kümmel .....                                                                          | 53 |
| 2.18 | MICROSCOPIC CALCULATIONS OF REARRANGEMENT ENERGIES<br>IN $^{16}\text{O}$<br>R. Padjen, B. Rouben, F.C. Khanna .....                          | 54 |
| 2.19 | A PROBLEM IN THE TREATMENT OF NUCLEAR REARRANGEMENT<br>ENERGIES<br>M. Harada .....                                                           | 55 |
| 2.20 | GENERALIZED SHELLS IN NUCLEI: HF CALCULATIONS OF<br>BUBBLE NUCLEI<br>S.J. Krieger, K.T.R. Davies, C.Y. Wong .....                            | 56 |
| 2.21 | THE INTERACTING BOSON APPROXIMATION AND THE STRUCTURE<br>OF $^{16}\text{O}$<br>F. Iachello, H. Feshbach .....                                | 57 |
| 2.22 | SELF-CONSISTENT QUASIPARTICLE-PHONON COUPLING<br>J.D. Immele, G.L. Struble .....                                                             | 58 |

### 3. NUCLEAR MODELS

#### SINGLE PARTICLE ASPECTS

|     |                                                                                                                                                  |    |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 3.1 | EXCITATION OF TWO QUASI-PARTICLE STATES IN EVEN-MASS<br>Te NUCLEI<br>M.Matoba, M.Hyakutake, J.Nidome, K.Yagi, Y. Aoki,<br>C. Rangacharyulu ..... | 59 |
| 3.2 | THE SYSTEMATICS OF NUCLEAR SINGLE-PARTICLE STATES<br>D.J. Millener, F. Malaguti, P.E. Hodgson .....                                              | 60 |
| 3.3 | GENERALIZED NEUTRON PARTICLE-HOLE STATES IN AN EX-<br>TENDED UNIFIED-MODEL<br>K. Heyde, M. Waroquier .....                                       | 61 |
| 3.4 | ISOSPIN POLARISATION IN NUCLEI<br>C.A. Engelbrecht, R.H. Lemmer .....                                                                            | 62 |
