About the Authors xiii

1 Numerical Methods for Electrical Engineers 1

1.1 Introduction 1

1.2 Engineering Goals 2

1.3 Programming Numerical Solutions 2

1.4 Why MATLAB?..... 3

1.5 The MATLAB Programming Language..... 4

1.6 Conventions in This Book 5

1.7 Example Programs..... 5

2 MATLAB Fundamentals7

2.1 Introduction 7

2.2 The MATLAB Windows 8

2.3 Constructing a Program in MATLAB..... 11

2.4 MATLAB Fundamentals 12

2.5 MATLAB Input/Output 21

2.6 MATLAB Program Flow..... 26

2.7 MATLAB Function Files 32

2.8 Anonymous Functions..... 36

2.9 MATLAB Graphics..... 36

2.10 Working with Matrices..... 46

2.11 Working with Functions of a Vector..... 48

2.12 Additional Examples Using Characters and Strings..... 49

2.13 Interpolation and MATLAB's interp1 Function..... 53

2.14 MATLAB's textscan Function..... 55

2.15 Exporting MATLAB Data to Excel..... 57

2.16	Debugging a Program.....	58
2.17	The Parallel RLC Circuit.....	60
	Exercises	63
	Projects	63
	References.....	76
3	Matrices.....	77
3.1	Introduction	77
3.2	Matrix Operations.....	77
3.3	System of Linear Equations	82
3.4	Gauss Elimination	87
3.5	The Gauss-Jordan Method.....	92
3.6	Number of Solutions	94
3.7	Inverse Matrix	95
3.8	The Eigenvalue Problem	100
	Exercises	104
	Projects	105
	Reference	108
4	Roots of Algebraic and Transcendental Equations.....	109
4.1	Introduction	109
4.2	The Search Method	109
4.3	Bisection Method	110
4.4	Newton-Raphson Method.....	112
4.5	MATLAB's fzero and roots Functions.....	113
	4.5.1 The fzero Function.....	114
	4.5.2 The roots Function	118
	Projects	119
	Reference	128
5	Numerical Integration.....	129
5.1	Introduction	129
5.2	Numerical Integration and Simpson's Rule.....	129
5.3	Improper Integrals.....	133
5.4	MATLAB's quad Function.....	135
5.5	The Electric Field.....	137
5.6	The quiver Plot.....	141
5.7	MATLAB's dblquad Function.....	143
	Exercises	146
	Projects	147
6	Numerical Integration of Ordinary Differential Equations.....	157
6.1	Introduction	157
6.2	The Initial Value Problem	158

6.3	The Euler Algorithm.....	158
6.4	Modified Euler Method with Predictor-Corrector Algorithm.....	160
6.5	Numerical Error for Euler Algorithms.....	166
6.6	The Fourth-Order Runge-Kutta Method.....	167
6.7	System of Two First-Order Differential Equations.....	169
6.8	A Single Second-Order Equation.....	172
6.9	MATLAB's ODE Function.....	175
6.10	Boundary Value Problems.....	179
6.11	Solution of a Tri-Diagonal System of Linear Equations.....	180
	Method Summary for m equations.....	181
6.12	Difference Formulas.....	183
6.13	One-Dimensional Plate Capacitor Problem.....	186
	Projects.....	190
7	Laplace Transforms.....	201
7.1	Introduction.....	201
7.2	Laplace Transform and Inverse Transform.....	201
7.2.1	Laplace Transform of the Unit Step.....	202
7.2.2	Exponential.....	202
7.2.3	Linearity.....	203
7.2.4	Time Delay.....	203
7.2.5	Complex Exponential.....	204
7.2.6	Powers of t	205
7.2.7	Delta Function.....	206
7.3	Transforms of Derivatives.....	209
7.4	Ordinary Differential Equations, Initial Value Problem.....	210
7.5	Convolution.....	220
7.6	Laplace Transforms Applied to Circuits.....	223
7.7	Impulse Response.....	227
	Exercises.....	228
	Projects.....	229
	References.....	232
8	Fourier Transforms and Signal Processing.....	239
8.1	Introduction.....	239
8.2	Mathematical Description of Periodic Signals: Fourier Series.....	241
8.3	Complex Exponential Fourier Series and Fourier Transforms.....	245
8.4	Properties of Fourier Transforms.....	249
8.5	Filters.....	251
8.6	Discrete-Time Representation of Continuous-Time Signals.....	253
8.7	Fourier Transforms of Discrete-Time Signals.....	255
8.8	A Simple Discrete-Time Filter.....	258
	Projects.....	269
	References.....	273

9	Curve Fitting.....	275
9.1	Introduction	275
9.2	Method of Least Squares	275
9.2.1	Best-Fit Straight Line.....	275
9.2.2	Best-Fit <i>m</i> th-Degree Polynomial.....	277
9.3	Curve Fitting with the Exponential Function.....	279
9.4	MATLAB's polyfit Function.....	281
9.5	Cubic Splines.....	285
9.6	The Function interp1 for Cubic Spline Curve Fitting.....	287
9.7	Curve Fitting with Fourier Series	289
	Projects	291
10	Optimization.....	295
10.1	Introduction	295
10.2	Unconstrained Optimization Problems	296
10.3	Method of Steepest Descent	297
10.4	MATLAB's fminunc Function.....	301
10.5	Optimization with Constraints	302
10.6	Lagrange Multipliers	304
10.7	MATLAB's fmincon Function.....	307
	Exercises	316
	Projects	316
	Reference	322
11	Simulink.....	323
11.1	Introduction	323
11.2	Creating a Model in Simulink	323
11.3	Typical Building Blocks in Constructing a Model.....	325
11.4	Tips for Constructing and Running Models	328
11.5	Constructing a Subsystem	329
11.6	Using the Mux and Fcn Blocks.....	330
11.7	Using the Transfer Fcn Block	330
11.8	Using the Relay and Switch Blocks.....	331
11.9	Trigonometric Function Blocks	334
	Exercises	337
	Projects	337
	Reference	339
	Appendix A: RLC Circuits.....	341
	Appendix B: Special Characters in MATLAB® Plots	353
	MATLAB® Function Index.....	357
	Index.....	361
