PREFACE	PAGE V
-------------------	-----------

CHAPTER I INFINITE SERIES

SECTION	
1. Fundamental Concepts	1
2. Series of Constants.	6
3. Series of Positive Terms.	9
4. Alternating Series	15
5. Series of Positive and Negative Terms	16
6. Algebra of Series.	21
7. Continuity of Functions. Uniform Convergence.	23
8. Properties of Uniformly Convergent Series.	28
9. Power Series.	30
10. Properties of Power Series.	33
11. Expansion of Functions in Power Series.	35
12. Application of Taylor's Formula.	41
13. Evaluation of Definite Integrals by Means of Power Series	43
14. Rectification of Ellipse. Elliptic Integrals	47
15. Discussion of Elliptic Integrals.	48
16. Approximate Formulas in Applied Mathematics	55

CHAPTER II FOURIER SERIES

17. Preliminary Remarks.	63
18. Dirichlet Conditions. Derivation of Fourier Coefficients	65
19. Expansion of Functions in Fourier Series	67
20. Sine and Cosine Series	73
21. Extension of Interval of Expansion.	76
22. Complex Form of Fourier Series	78
23. Differentiation and Integration of Fourier Series.	80
24. Orthogonal Functions.	81

CHAPTER III SOLUTION OF EQUATIONS

25. Graphical Solutions.	83
26. Algebraic Solution of Cubic	86
27. Some Algebraic Theorems.	92
28. Horner's Method.	95

SECTION	PAGE
29. Newton's Method	97
30. Determinants of the Second and Third Order	102
31. Determinants of the n th Order.	106
32. Properties of Determinants	107
33. Minors	110
34. Matrices and Linear Dependence.	114
35. Consistent and Inconsistent Systems of Equations	117

CHAPTER IV

PARTIAL DIFFERENTIATION

36. Functions of Several Variables.	123
37. Partial Derivatives.	125
38. Total Differential	127
39. Total Derivatives	130
40. Euler's Formula	136
41. Differentiation of Implicit Functions	137
42. Directional Derivatives.	143
43. Tangent Plane and Normal Line to a Surface	146
44. Space Curves	149
45. Directional Derivatives in Space.	151
46. Higher Partial Derivatives	153
47. Taylor's Series for Functions of Two Variables.	155
48. Maxima and Minima of Functions of One Variable.	158
49. Maxima and Minima of Functions of Several Variables.	160
50. Constrained Maxima and Minima	163
51. Differentiation under the Integral Sign	167

CHAPTER V

MULTIPLE INTEGRALS

52. Definition and Evaluation of the Double Integral	173
53. Geometric Interpretation of the Double Integral.	177
54. Triple Integrals	179
55. Jacobians. Change of Variable	183
56. Spherical and Cylindrical Coordinates.	185
57. Surface Integrals.	188
58. Green's Theorem in Space.	191
59. Symmetrical Form of Green's Theorem.	194

CHAPTER VI

LINE INTEGRAL

60. Definition of Line Integral.	197
61. Area of a Closed Curve.	199
62. Green's Theorem for the Plane.	202
63. Properties of Line Integrals	206
64. Multiply Connected Regions.	212
65. Line Integrals in Space	215
66. Illustrations of the Application of the Line Integrals	217

CHAPTER VII

ORDINARY DIFFERENTIAL EQUATIONS

67. Preliminary Remarks.	225
68. Remarks on Solutions.	227
69. Newtonian Laws.	231
70. Simple Harmonic Motion	233
71. Simple Pendulum	234
72. Further Examples of Derivation of Differential Equations.	239
73. Hyperbolic Functions.	247
74. First-order Differential Equations	256
75. Equations with Separable Variables.	257
76. Homogeneous Differential Equations	259
77. Exact Differential Equations.	262
78. Integrating Factors.	265
79. Equations of the First Order in Which One of the Variables Does Not Occur Explicitly.	267
80. Differential Equations of the Second Order	269
81. Gamma Functions	272
82. Orthogonal Trajectories.	277
83. Singular Solutions	279
84. Linear Differential Equations	283
85. Linear Equations of the First Order	284
86. A Non-linear Equation Reducible to Linear Form (Bernoulli's Equation).	286
87. Linear Differential Equations of the n th Order.	287
88. Some General Theorems.	291
89. The Meaning of the Operator $\frac{1}{D^n + a_1 D^{n-1} + \dots + a_{n-1} D + a_n} f(x)$	295
90. Oscillation of a Spring and Discharge of a Condenser.	299
91. Viscous Damping.	302
92. Forced Vibrations	308
93. Resonance.	310
94. Simultaneous Differential Equations	312
95. Linear Equations with Variable Coefficients	315
96. Variation of Parameters.	318
97. The Euler Equation	322
98. Solution in Series.	325
99. Existence of Power Series Solutions.	329
100. Bessel's Equation	332
101. Expansion in Series of Bessel Functions.	339
102. Legendre's Equation	342
103. Numerical Solution of Differential Equations	346

CHAPTER VIII

PARTIAL DIFFERENTIAL EQUATIONS

104. Preliminary Remarks.	350
105. Elimination of Arbitrary Functions.	351

SECTION	PAGE
106. Integration or Partial Differential Equations.	353
107. Linear Partial Differential Equations with Constant Coefficients	357
108. Transverse Vibration of Elastic String	361
109. Fourier Series Solution	364
110. Heat Conduction	367
111. Steady Heat Flow	369
112. Variable Heat Flow.	373
113. Vibration of a Membrane.	377
114. Laplace's Equation.	382
115. Flow of Electricity in a Cable	386

CHAPTER IX VECTOR ANALYSIS

116. Scalars and Vectors.	392
117. Addition and Subtraction of Vectors	393
118. Decomposition of Vectors. Base Vectors.	396
119. Multiplication of Vectors	399
120. Relations between Scalar and Vector Products.	402
121. Applications of Scalar and Vector Products	404
122. Differential Operators	406
123. Vector Fields	409
124. Divergence of a Vector	411
125. Divergence Theorem	415
126. Curl of a Vector	418
127. Stokes's Theorem	421
128. Two Important Theorems.	422
129. Physical Interpretation of Divergence and Curl	423
130. Equation of Heat Flow.	425
131. Equations of Hydrodynamics	428
132. Curvilinear Coordinates.	433

CHAPTER X COMPLEX VARIABLE

133. Complex Numbers	440
134. Elementary Functions of a Complex Variable	444
135. Properties of Functions of a Complex Variable.	448
136. Integration of Complex Functions	453
137. Cauchy's Integral Theorem	455
138. Extension of Cauchy's Theorem	455
139. The Fundamental Theorem of Integral Calculus	457
140. Cauchy's Integral Formula	461
141. Taylor's Expansion.	464
142. Conformal Mapping	465
143. Method of Conjugate Functions	467
144. Problems Solvable by Conjugate Functions	470
145. Examples of Conformal Maps	471
146. Applications of Conformal Representation.	479

CONTENTS

xi

SECTION

PAGE

CHAPTER XI PROBABILITY

147. Fundamental Notions.	492
148. Independent Events	495
149. Mutually Exclusive Events	497
150. Expectation.	500
151. Repeated and Independent Trials	501
152. Distribution Curve.	504
153. Stirling's Formula	508
154. Probability of the Most Probable Number.	511
155. Approximations to Binomial Law.	512
156. The Error Function	516
157. Precision Constant. Probable Error	521

CHAPTER XII EMPIRICAL FORMULAS AND CURVE FITTING

158. Graphical Method	525
159. Differences	527
160. Equations That Represent Special Types of Data	528
161. Constants Determined by Method of Averages.	534
162. Method of Least Squares	536
163. Method of Moments	544
164. Harmonic Analysis.	545
165. Interpolation Formulas.	550
166. Lagrange's Interpolation Formula	552
167. Numerical Integration	554
168. A More General Formula	558
