Preface

Chapter 1	Introduction to MATLAB	1
1.1	Introduction	1
	1.1.1 Book Organization	3
	1.1.2 Chapter Organization	3
1.2	Starting MATLAB	3
1.3	Simple Calculations in MATLAB	4
	1.3.1 Elementary Functions	6
1.4	Variables	7
1.5	Plotting	10
1.6	Strings	14
1.7	Saving a Session and Its Variables	17
1.8	Input/Output Instructions	19
	1.8.1 Formatted Output	19
	1.8.2 Data Input	22
1.9	Help	23
	1.9.1 Help Page	24
1.10	Concluding Remarks	24
1.11	Exercises	25
1.12	References	27
Chapter 2	Variables and Functions	29
2.1	Variables	29
	2.1.1 Symbolic Variables	30
2.2	Functions	32
	2.2.1 MATLAB Elementary Functions	35
	2.2.2 Using Symbolic Functions	36
	2.2.3 Plots	37
	2.2.4 Function Evaluation Using eval and feval	38
	2.2.5 The Function funtool	39
2.3	Polynomials	40
2.4	Curve Fitting	48
	2.4.1 Cubic Spline Fitting	50
	2.4.2 The Tool Basic Fitting	51

2.5	Solution of Equations	52
2.6	Execution Time, Date, and Time of the Day	57
2.7	Concluding Remarks	60
2.8	Exercises	61
2.9	References	63
Chapter 3	Matrices and Linear Algebra	65
3.1	Matrices	66
3.2	Basic Operations with Matrices	68
3.3	Vectors	72
	3.3.1 Norm of a Vector	76
	3.3.2 Vector Generation	77
3.4	Dot and Cross Product	78
	3.4.1 Dot Product	78
	3.4.2 Cross Product	79
3.5	Matrix and Vector Functions	80
3.6	Systems of Simultaneous Linear Equations	81
	3.6.1 LU Factorization	83
3.7	Eigenvalues and Eigenvectors	84
3.8	Cell Arrays	86
3.9	Structures	88
3.10	Concluding Remarks	89
3.11	Exercises	90
3.12	References	93
Chapter 4	Calculus	95
4.1	Introduction	95
4.2	Limits of Functions	95
4.3	Limits of Sequences	97
4.4	Continuity	99
4.5	Derivatives	101
4.6	Integration	103
4.7	Series	107
4.8	Differential Equations	109
	4.8.1 Numerical Solution of Differential Equations	112
4.9	Concluding Remarks	114
4.10	Exercises	114
4.11	References	118
Chapter 5	Plotting with MATLAB	119
5.1	Introduction	119
5.2	Two-Dimensional Plotting	119

	5.2.1 Plotting from the Workspace	126
	5.2.2 Mesh Plots	128
5.3	Plot Options	128
5.4	Other Two-Dimensional Plots	134
	5.4.1 Polar Plot	134
	5.4.2 Bar Plot	135
	5.4.3 Stairs Plot	136
	5.4.4 Histogram Plot	136
	5.4.5 Stem Plot	139
	5.4.6 Compass Plot	139
	5.4.7 Pie Plot	140
5.5	Subplots	140
5.6	Three-Dimensional Plots	141
	5.6.1 The Instruction plot3	142
	5.6.2 Mesh Plot	144
	5.6.3 Surf Plot	148
	5.6.4 Contour Plot	149
5.7	Observation Point	152
5.8	Structure of Objects in MATLAB	154
	5.8.1 Handles for Other Objects	158
	5.8.2 Axes Handles (gca)	159
	5.8.3 Object Properties	159
5.9	Hierarchy of MATLAB Objects	160
5.10	Concluding Remarks	161
5.11	Exercises	161
5.12	References	163
Chapter 6	Programming in MATLAB	165
6.1	Creating m-files	165
6.2	MATLAB Basic Programming Instructions	168
	6.2.1 The Instruction if-end	168
	6.2.2 The Statement if-else-end	170
	6.2.3 The Instruction elseif	171
	6.2.4 The Statement switch-case	172
	6.2.5 The Statement for	173
	6.2.6 The while Loop	175
6.3	Functions	176
6.4	Variables of Functions	179
	6.4.1 Global Variables	182
	6.4.2 The Instruction return	184
	6.4.3 The Instructions nargin and narginout	185
	6.4.4 Recursive Functions	185
6.5	File Management	186
	6.5.1 File Opening and Closing	186

6.6	Writing Information to a File	189
6.6.1	Reading and Writing Formatted Data	189
6.6.2	Reading and Writing Binary Files	194
6.7	Passing Data between MATLAB and Excel	197
6.7.1	Exporting Data to Excel	197
6.7.2	Exporting Excel Files to MATLAB	199
6.8	Deployment of MATLAB m-files	204
6.9	Publishing m-files from MATLAB	208
6.9.1	Cell Programming	208
6.9.2	Publishing m-files	212
6.10	Concluding Remarks	215
6.11	Exercises	216
6.12	References	220
Chapter 7	Graphical User Interfaces	221
7.1	Creation of a GUI with the Tool GUIDE	221
7.1.1	Starting GUIDE	221
7.1.2	Properties of Objects in a GUI	222
7.1.3	A Simple GUI	223
7.2	Examples	229
7.3	Deployment of GUIs	249
7.4	Concluding Remarks	252
7.5	Exercises	252
7.6	References	253
Chapter 8	Simulink	255
8.1	The Simulink Environment	255
8.1.1	A Basic Example	257
8.2	Model Edition	259
8.3	The Scope	260
8.4	Continuous and Discrete Systems	260
8.5	Subsystems	264
8.5.1	Masking Subsystems	267
8.5.2	Icon Tab	268
8.5.3	Parameters Dialog Window	270
8.5.4	Initialization Tab	271
8.5.5	The Documentation Tab	271
8.6	Model Linearization with the Control Toolbox	272
8.7	Examples	274
8.8	Concluding Remarks	279
8.9	Exercises	279
8.10	References	280

Chapter 9	MATLAB Applications in Engineering	281
9.1	Applications in Signals and Systems	281
9.2	Applications in Digital Signal Processing	290
9.3	Applications in Control	295
9.4	Applications in Chemical Engineering	299
9.5	Applications in Industrial Engineering	305
9.6	Applications in Food Engineering	312
9.7	Applications in Civil Engineering	315
9.8	Applications in Mechanical Engineering	321
9.9	Concluding Remarks	327
9.10	References	328
Chapter 10	MATLAB Applications in Physics	329
10.1	Examples in Kinematics	329
10.2	Examples in Dynamics	336
10.3	Applications in Astronomy	343
10.4	Applications in Electricity and Magnetism	346
10.5	Applications in Optics	349
10.6	Applications in Modern Physics	352
10.7	Concluding Remarks	354
10.8	References	355
Chapter 11	MATLAB Applications in Finance	357
11.1	Simple and Compound Interest	357
11.2	Annuities	361
11.3	Cash Flow	363
11.4	The Financial Toolbox	367
11.5	The Financial Derivatives Toolbox	374
11.6	The Black-Scholes Analysis	375
	11.6.1 American Options	379
	11.6.2 Finite Difference Methods	387
	11.6.3 Monte Carlo Methods	390
11.7	The Greek Letters	392
11.8	Concluding Remarks	398
11.9	References	400
Appendix A		401
Appendix B		403
Index		405
