Foreword

ix

Part I Micro-fracture

<i>General Lecture</i> , F. KERKHOF: Wave fractographic investigations of brittle fracture dynamics	3
A. L. STEVENS, L. DAVISON and W. E. WARREN: Void growth during spall fracture of aluminum monocrystals	37
G. J. DVORAK: Statistical criteria for microcrack propagation in b.c.c. polycrystals	49
E. SMITH: Flat fracture propagation in mild steel: some comments on the role of plastic deformation processes	63

Part II Brittle materials and glass

<i>General Lecture</i> , G. D. FEARNEHOUGH: The small-scale test and its application to fracture propagation problems	77
E. G. BOMBOLAKIS: Brittle crack growth under uniaxial compression	103
S. S. PENG and C. A. ORTIZ: Crack propagation and fracture of rock specimens loaded in compression	113
J. A. HUDSON, E. T. BROWN and M. P. HARDY: Controlling crack growth in rock	131
G. P. CHEREPANOV†: On the theory of fracture of a brittle body by explosion	145

Part III Ductile materials

<i>General Lecture</i> , A. N. GENT: Strength of adhesive bonds—plastic and viscoelastic effects	157
J. CARLSSON, L. DAHLBERG and F. NILSSON: Experimental studies of the unstable phase of crack propagation in metals and polymers	165
W. A. POYNTON and G. D. FEARNEHOUGH: An analysis of shear fracture propagation in gas pipelines	183
R. W. BAUER and H. G. F. WILSDORF: The mechanical behavior in tension and fracture characteristics of stainless steel thin rolled foils	197

† Published without presentation.

Contents

L. J. BROUTMAN and T. KOBAYASHI: Dynamic crack propagation studies in polymers	215
J. C. RADON and N. P. FITZPATRICK: Deformation of PMMA at high rates of strain	227
A. P. GLOVER, F. A. JOHNSON and J. C. RADON: Crack velocity measurements in the toughness testing of polymers	245
I. D. GRAHAM, G. P. MARSHALL and J. G. WILLIAMS: The fracture mechanics of crazes	261
M. P. WNUK: Accelerating crack in a viscoelastic solid subject to subcritical stress intensity	273

Part IV Dynamic crack models

DuPont Lecture†, H. C. VAN ELST:

1. The relation between increase in crack-arrest temperature and decrease of stress wave attenuation by material embrittlement	283
2. The evaluation of the decrease in resistance against crack propagation in steel by embrittlement using a stress wave attenuation test	320
S. H. LEHNIGK: A macroscopic dynamic theory of stability and instability of cracks under impulsive loading	333
B. STEVERDING: Fracture and dislocation dynamics	349
Y. IDA: Cohesive force and unsteady propagation of a longitudinal-shear crack	363
Z. J. BILEK and S. J. BURNS: The dynamics of crack propagation in double cantilever beam specimens	371
J. M. ANDERSON, H. P. KAN and W. W. KING: A simple model of dynamic cleavage	387

Part V Continuum experiments

<i>General Lecture</i> , H. KOLSKY: Recent work on the relations between stress pulses and fracture	399
T. L. PAXSON and R. A. LUCAS: An experimental investigation of the velocity characteristics of a fixed boundary fracture model	415
J. CONGLETON: Practical applications of crack-branching measurements	427
J. P. CHUBB and J. CONGLETON: Crack acceleration	439
J. F. KALTHOFF: On the propagation direction of bifurcated cracks	449

† The DuPont Lectures were made possible by a grant from E. I. DuPont deNemours and Company.

Part VI Analytical crack problems

<i>DuPont Lecture</i> , K. B. BROBERG: On dynamic crack propagation in elastic-plastic media	461
A. NIAZY: Elastic displacements due to a propagating crack in an infinite medium; an exact solution	501
J. F. LOEBER and G. C. SIH: Torsional wave scattering about a penny-shaped crack lying on a bimaterial interface	513
J. D. ACHENBACH and L. M. BROCK: On quasistatic and dynamic fracture	529
F. NILSSON: A transient crack problem for an infinite strip under antiplane shear	543
L. B. FREUND: The motion of a crack in an elastic solid subjected to general loading	553

Part VII Structures

<i>General Lecture</i> , T. KANAZAWA: Recent studies on brittle crack propagation in Japan	565
R. L. SIERAKOWSKI, C. A. ROSS and E. R. JONES: Dynamic fracture of composite materials	599
W. R. HOOVER and R. E. ALLRED: The dynamic fracture behavior of Borsic-Al composites	613
S. R. WINKLER: Supersonic crack propagation in ionic crystals induced by strong laser pulses	623
L. SEAMAN, D. A. SHOCKEY and D. R. CURRAN: The growth law for crack propagation under shock conditions	629
G. T. HAHN, R. G. HOAGLAND, M. F. KANNINEN and A. R. ROSENFELD: A preliminary study of fast fracture and arrest in the DCB test specimen	649
A. S. KOBAYASHI and B. G. WADE: Crack propagation and arrest in impacted plates	663
R. T. SEDGWICK and L. J. HAGEMAN: A numerical model for plugging failure	679
M. MIRABILE and S. VENZI: Theoretical and experimental predictions of influence of the machine and initial crack length on fracture propagation and arrest	693
M. B. VALENTINE and G. D. WHITEHOUSE: The buckling failure modes of rods with large length-to-diameter ratios impacting rigid plates	709
