### Chapter 1 Introduction

1.1	What is Fluid Mechanics? . . . . .	1
1.2	What Good is Fluid Mechanics? . . . . .	2
1.3	Basic Ideas in Fluid Mechanics . . . . .	3
1.4	Liquids and Gases . . . . .	4
1.5	Properties of Fluids . . . . .	5
1.6	Pressure . . . . .	15
1.7	Force, Mass, and Weight . . . . .	17
1.8	Units and Conversion Factors . . . . .	18
1.9	Consistent Systems of Units . . . . .	21
1.10	Principles versus Techniques . . . . .	24
1.11	Engineering Problems . . . . .	24
1.12	Summary . . . . .	26

### Chapter 2 Fluid Statics

2.1	The Basic Equation of Fluid Statics . . . . .	30
2.2	Pressure–Depth Relationships . . . . .	32
2.3	Pressure Forces on Surfaces . . . . .	37
2.4	Buoyancy . . . . .	44
2.5	Pressure Measurement . . . . .	47
2.6	Variable Gravity . . . . .	52
2.7	Pressures in Accelerated Rigid-Body Motions . . . . .	53
2.8	Thin-Walled Pressure Vessels . . . . .	58
2.9	More Problems in Fluid Statics . . . . .	59
2.10	Summary . . . . .	59

### Chapter 3 The Balance Equation and the Mass Balance

3.1	The Balance Equation . . . . .	69
3.2	The Mass Balance . . . . .	71
3.3	Steady-State Balances . . . . .	73
3.4	The Steady-State Flow, One-Dimensional Mass Balance . . . . .	74
3.5	Unsteady-State Mass Balances . . . . .	77
3.6	Mass Balances for Multidimensional Flows . . . . .	79
3.7	Summary . . . . .	80

**Chapter 4 The First Law of Thermodynamics**

4.1	Energy . . . . .	84
4.2	Forms of Energy . . . . .	85
4.3	Energy Transfer . . . . .	87
4.4	The Energy Balance . . . . .	89
4.5	Kinetic and Potential Energies . . . . .	91
4.6	Internal Energy . . . . .	93
4.7	The Work Term . . . . .	95
4.8	Injection Work . . . . .	96
4.9	The Enthalpy . . . . .	98
4.10	Restricted Forms . . . . .	99
4.11	Some Common Machines and Processes . . . . .	101
4.12	Unsteady-State Systems, Accumulation . . . . .	106
4.13	Less Restricted Systems . . . . .	111
4.14	Other Forms of Work and Energy . . . . .	116
4.15	Limitations of the First Law . . . . .	120
4.16	Summary . . . . .	120

**Chapter 5 Bernoulli's Equation**

5.1	The Energy Balance for a Steady, Incompressible Flow. . . . .	127
5.2	The Friction-Heating Term . . . . .	128
5.3	Zero Flow. . . . .	130
5.4	The Head Form of Bernoulli's Equation . . . . .	131
5.5	Diffusers and Sudden Expansions . . . . .	131
5.6	Bernoulli's Equation for Gases . . . . .	132
5.7	Torricelli's Equation and Its Variants . . . . .	135
5.8	Bernoulli's Equation for Fluid-Flow Measurement . . . . .	138
5.9	Negative Absolute Pressures: Cavitation . . . . .	146
5.10	Bernoulli's Equation for Unsteady Flows . . . . .	148
5.11	Summary . . . . .	151

**Chapter 6 Fluid Friction in One-Dimensional Flow**

6.1	The Pressure-Drop Experiment. . . . .	159
6.2	Reynold's Experiment . . . . .	160
6.3	Laminar Flow . . . . .	162
6.4	Turbulent Flow . . . . .	168
6.5	The Three Friction Factors Problems . . . . .	173
6.6	Some Comments about the Friction-Factor Method and Turbulent Flow . . . . .	179
6.7	More Convenient Methods . . . . .	179
6.8	Fitting Losses. . . . .	183
6.9	Enlargements and Contractions . . . . .	185
6.10	Fluid Friction in One-Directional Flow and Other Geometries . . . . .	187
6.11	More Complex Problems Involving Bernoulli's Equation . . . . .	191
6.12	Economic Pipe Diameter . . . . .	196
6.13	Flow around Submerged Objects . . . . .	202
6.14	Summary . . . . .	208

**Chapter 7 The Momentum Balance**

7.1	Momentum . . . . .	218
7.2	The Momentum Balance . . . . .	220
7.3	Some Steady-Flow Applications of the Momentum Balance . . . . .	224
7.4	Relative Velocities . . . . .	235
7.5	Airplanes . . . . .	239
7.6	The Angular-Momentum Balance . . . . .	242
7.7	The Momentum Balance for Three-Dimensional Flow . . . . .	244
7.8	The Navier-Stokes Equations . . . . .	248
7.9	Summary . . . . .	252

**Chapter 8 One-Dimensional High-Velocity Gas Flow**

8.1	The Speed of Sound . . . . .	259
8.2	Steady, Frictionless, Adiabatic, One-Dimensional Flow of a Perfect Gas . . . . .	264
8.3	Nozzle-Choking . . . . .	273
8.4	Normal Shock Waves . . . . .	274
8.5	Relative Velocities . . . . .	277
8.6	Nozzles and Diffusers . . . . .	279
8.7	Pitot Tubes for High-Velocity Gas Flow . . . . .	284
8.8	High-Velocity Gas Flow with Friction, Heating, or Both . . . . .	285
8.9	Summary . . . . .	291

**Chapter 9 Pumps, Compressors, and Turbines**

9.1	Positive-Displacement Pumps . . . . .	298
9.2	Centrifugal Pumps . . . . .	302
9.3	Positive-Displacement Compressors . . . . .	308
9.4	Rotary Compressors . . . . .	313
9.5	Compressor Efficiencies . . . . .	314
9.6	Fluid Engines and Turbines . . . . .	316
9.7	Fluid Engine and Turbine Efficiency . . . . .	320
9.8	Summary . . . . .	320

**Chapter 10 Potential Flow**

10.1	The History of Potential Flow and Boundary Layer . . . . .	324
10.2	Streamlines . . . . .	326
10.3	Potential Flow . . . . .	327
10.4	Irrotational Flow . . . . .	335
10.5	Stream Function . . . . .	339
10.6	Bernoulli's Equation for Two-Dimensional, Perfect-Fluid, Irrotational Flows . . . . .	344
10.7	Flow around a Cylinder . . . . .	345
10.8	Separation . . . . .	348
10.9	Summary . . . . .	350

**Chapter 11    The Boundary Layer**

11.1	Prandtl's Boundary-Layer Equations . . . . .	353
11.2	The Laminar Boundary Layer on a Flat Plate Parallel to the Flow	354
11.3	Turbulent Boundary Layers . . . . .	363
11.4	Turbulent Flow in Pipes . . . . .	364
11.5	The Steady, Turbulent Boundary Layer on a Flat Plate . . . .	368
11.6	The Successes of Boundary-Layer Theory . . . . .	371
11.7	Summary . . . . .	373

**Chapter 12    Flow through Porous Media**

12.1	Fluid Friction in Porous Media . . . . .	380
12.2	Two-Fluid Cocurrent Flow in Porous Media . . . . .	388
12.3	Countercurrent Flow in Porous Media . . . . .	391
12.4	Simple Filter Theory. . . . .	393
12.5	Fluidization . . . . .	396
12.6	Summary . . . . .	397

**Chapter 13    Model Studies, Dimensional Analysis, and Similitude**

13.1	Prediction and Models . . . . .	400
13.2	Dimensionless Numbers. . . . .	401
13.3	Finding the Dimensionless Numbers . . . . .	402
13.4	Judgment, Guesswork, and Caution . . . . .	412
13.5	Summary . . . . .	412

**Chapter 14    Gas-Liquid Flow**

14.1	Vertical, Upward Gas-Liquid Flow . . . . .	414
14.2	Horizontal Gas-Liquid Flow . . . . .	419
14.3	Two-Phase Flow with Boiling . . . . .	421
14.4	Summary . . . . .	421

**Chapter 15    Non-Newtonian Fluids**

15.1	The Role of Structure in Non-Newtonian Behavior . . . . .	423
15.2	Measurement and Description of Non-Newtonian Fluids . . . .	424
15.3	Laminar Flow of Non-Newtonian Fluids in Circular Tubes . . . .	427
15.4	Turbulent Flow of Non-Newtonian Fluids in Pipes . . . . .	430
15.5	Summary . . . . .	431

**Chapter 16    Turbulence**

16.1	Why Study Turbulence? . . . . .	434
16.2	Turbulence Measurements . . . . .	435
16.3	Free and Confined Turbulent Flows . . . . .	437
16.4	Turbulent Kinetic Energy . . . . .	438
16.5	The Experimental and Mathematical Descriptions of Turbulent Flows . . . . .	439

16.6	Reynolds Stresses . . . . .	446
16.7	Turbulence Theories . . . . .	449
16.8	Summary . . . . .	449

**Chapter 17 Surface Forces**

17.1	Surface Tension and Surface Energy . . . . .	451
17.2	Wetting and Contact Angle. . . . .	452
17.3	The Measurement of Surface Tension . . . . .	453
17.4	Interfacial Tension . . . . .	455
17.5	Forces Due to Curved Surfaces . . . . .	456
17.6	Some Examples of Surface-Force Effects . . . . .	459
17.7	Summary . . . . .	462

**Appendixes**

A	Tables of Properties . . . . .	469
B	Proof that for a Fluid at Rest the Pressure is the Same in all Directions. . . . .	489
C	The Hydraulic Jump Equations . . . . .	490
D	The Properties of an Ideal Gas. . . . .	491
E	The Area Ratio . . . . .	494
F	Normal Shock Waves . . . . .	495
G	Equations for Adiabatic, Zero-Clearance, Isentropic Compressors . . . . .	498
H	Proof that the Curves of Constant $\phi$ and the Curves of Constant $\psi$ Are Perpendicular . . . . .	499
	<b>References . . . . .</b>	<b>501</b>
	<b>Answers to Selected Problems . . . . .</b>	<b>509</b>
	<b>Index . . . . .</b>	<b>511</b>
