

TABLE OF CONTENTS

CHAPTER I

REACTIONS

ARTICLE	PAGE
1. Introduction	1
2. Equilibrium Conditions	1
3. Structural Computations	3
4. The Force Polygon	6
5. The Equilibrium Polygon	8
6. Reactions and Types of Supports	12
7. Equilibrium Polygons Through Two Points	18
8. Equilibrium Polygons Through Three Points	20
9. Shear and Bending Moment Diagrams	25
10. Bending Moments Determined Graphically by Use of the Equilibrium Polygon	27

CHAPTER II

STRESSES IN FRAMED TRUSSES

BASIC METHODS OF ANALYSIS FOR FIXED LOADS

15. General Considerations	31
16. Definition of a Truss	32
17. Stress Computations in Trusses	34
18. Stress Computations by the Equilibrium of Joints	35
19. Stress Computations by the Equilibrium of Sections	38
20. Stress Diagrams	43
21. Stress Coefficients	49
22. Algebraic Stress Computations by Proportions	53

CHAPTER III

BEAMS

STRESSES IN BEAMS

25. Classification of Beams	55
26. Stress Distribution in Beams	55
27. The External and Internal Forces Acting on a Beam	56

ARTICLE	PAGE
28. Average Unit Vertical Shear	57
29. Fiber Stress	58
30. Resisting Moment	58
31. Horizontal Shear	59

DESIGN OF BEAMS

32. Preliminary Considerations	62
33. Applied Loads	63
34. Span Lengths	63
35. External Forces, Internal Stresses, and Beam Dimensions	63

TIMBER BEAM DESIGN

36. Allowable Unit Stresses in Structural Timbers	67
37. Design of Timber Beams	67

DESIGN OF STEEL BEAMS

38. Introduction	74
39. Allowable Stresses	75
40. Design of Steel Beams	75
41. Deflection of Beams	77
42. Web Crippling at Points of Concentrated Loads	88
43. Lateral Deflection Caused by Buckling of the Compression Flange	90
44. End Bearing Design	92
45. Beam-to-Column and Beam-to-Beam Connections	93
46. Welded Connections	98

CHAPTER IV

PLATE GIRDERS

50. Description and Classification	107
51. Plate Girder Design	111
52. Stress Distribution over the Cross-Sectional Area of Plate Girders	114
53. Preliminary Design	115
54. Exact or "Moment of Inertia" Method for Determining the Cross Section	118
55. Approximate or "Chord Stress" Methods for Determining the Cross-Section	120
56. Length of Cover Plates	123
57. End Stiffeners	127
58. Intermediate Stiffener Spacing	129
59. Rivet Design for Plate Girders	134
60. Web Splice Design	138
61. Flange Splice	141

CONTENTS

vii

CHAPTER V

DESIGN OF STEEL ROOF TRUSSES

ARTICLE	PAGE
65. General Aspects of Structural Design	144
66. Roof Trusses	146
67. Roofs	148
68. Snow Loads	150
69. Wind Loads	150
70. Load Combinations for Maximum Stress Effects	154
71. Purlin Design Using Sag Rods	155
72. Weights of Steel Roof Trusses	159
73. Computations of Maximum Stresses in Roof Trusses	159
74. Design of Tension Members	161
75. Design of Compression Members	164
76. Design of Truss Joints	165
77. The Detail Drawing	167

CHAPTER VI

INDUSTRIAL BUILDINGS

80. Introduction	173
81. Classification	173
82. Typical Transverse Sections	175
83. Stresses in Two-Column Transverse Bents	178
84. Stresses in Multi-Column Transverse Bents	184
85. Graphic Determination of Stresses in Transverse Bents with any Number of Columns	186
86. Stresses in Bracing Systems	186
87. Top Chord Members Subject to Axial and Bending Stresses	190
88. Purlins Subject to Unsymmetrical Bending	192
89. Girt Analysis and Design	197
90. Crane Runway Girders	198
91. Column Brackets	209
92. Columns Subject to Axial, Eccentric, and Transverse Loading	213
93. Design of Columns Subject to Axial Loads and Transverse Bending	218
94. Column Base Design	221

TIMBER FRAMING

95. Introduction	225
96. Classification of Lumber	225
97. General Lumber Information	227
98. Factors Affecting the Strength of Structural Timbers	228
99. Design Data	232
100. Timber Mill Building Construction	237
101. Timber Truss Framing	243
102. Timber Trestles	250

CHAPTER VII

STRESSES IN TRUSSES FOR MOVING LOADS

ARTICLE	PAGE
110. The Bridge as a Complete Structure	254
111. The Distribution of Dead Loads to the Structure	255
112. The Application of Live Loads to the Structure	256
113. Introduction to Live Load Stresses	256

LOADS CONSIDERED AS LIVE PANEL LOADS

114. Influence Tables. Basic Treatment for Moving Loads	257
115. Simple Trusses with Parallel Chords	259
116. Live Load Stress Coefficients	260
117. Counters	263
118. Simple Trusses with Inclined Chords	264

LIVE LOADS CONSIDERED AS UNIFORMLY DISTRIBUTED

119. Introduction	268
120. Computation of Stresses	268

INFLUENCE DIAGRAMS

121. Construction of Influence Diagrams	269
122. Checks for Influence Diagrams	270
123. Concentrated Loads	270
124. Uniformly Distributed Loads	272

LOCOMOTIVE WHEEL LOADS

125. Introduction	276
126. Tables and Diagrams	277
127. Stress Computations for Concentrated Moving Loads	282
128. Moments and Shears	283
129. Criterion for Shear	283
130. Stresses in Trusses with Parallel Chords	289
131. Stresses in Trusses with Inclined Chords	292
132. Long Span Simple Truss Types	296
133. Skew Bridges	301

CHAPTER VIII

ECONOMIC FACTORS GOVERNING THE PROPORTIONS OF
SIMPLE SPAN BRIDGES

140. Introduction	306
141. Major Economic Factors	307
142. Minor Economic Factors	308
143. Summary of Economic Factors	309

CONTENTS

ix

ARTICLE	PAGE
144. Economic Selection.....	309
145. Financial Data.....	310
146. Economic Relation Between the Cost and the Proportions of a Structure.....	313
147. Annual Cost.....	315
148. Capitalized Cost.....	315
149. Choosing the Economic Span Length.....	316
150. Choosing the Economic Outline of the Truss.....	318
151. Problems	319

CHAPTER IX

DESIGN OF TRUSS BRIDGES

160. Introduction	332
161. Specifications	332
162. Dead Loads	333
163. Live Loads for Highway Bridges.....	338
164. Live Loads for Railroad Bridges.....	340
165. Impact	340
166. Typical Bridge Design Drawings.....	342

THE SELECTION OF SECTIONS

167. Introduction	364
168. Floor System.....	365
169. Stringers	365
170. Floor Beams.....	366
171. Trusses	368
172. Upper Chords.....	369
173. Verticals	370
174. Lower Chords.....	371
175. Diagonals	372
176. Lateral Bracing.....	372
177. Sway Bracing.....	373
178. Portal Bracing.....	374
179. Combined Stresses in End Posts.....	376
180. End Bearings.....	377
181. Pins	378

DETAILS

182. Connections at Joints.....	378
183. Latticing and Stay Plates.....	379
184. End Connections of Tension Members.....	380
185. Riveting	381
186. Welding	382
187. Application of the Principles of Design.....	383

CONTENTS

CHAPTER X

DEFLECTION OF TRUSSES.
STATICALLY INDETERMINATE STRUCTURES

DEFLECTION OF FRAMED STRUCTURES

ARTICLE	PAGE
191. Introduction	396
192. Algebraic Solution	398
193. Graphic Solution	399
194. Symmetrical Situations	400
195. Unsymmetrical Situations	401

STATICALLY INDETERMINATE STRUCTURES

196. Introduction	405
197. The Two Span Continuous Bridge	406
198. Spandrel Braced Arches	409
199. Basic Energy Relations	415
200. Energy Theory Applied to Trusses with One Redundant Member	417
201. Stresses in Trusses with Two or More Redundant Members	418
202. Stress Computations in Redundant Members	422
203. Energy Theory Applied to Beams	422
204. Energy Theory Applied to the Trussed Beam	423

CHAPTER XI

MULTISTORY BUILDINGS

GENERAL CONSIDERATIONS

210. Introduction	432
211. Building Codes	432
212. Dead Loads	436
213. Minimum Live Loads	437

TYPICAL FLOOR DESIGNS

214. Floors	439
215. Concrete Slabs on Steel Beams and Girders	439
216. Flat Clay-Tile Arch on Steel Beams and Girders	443
217. Concrete Joist Floors on Steel Girders	446
218. Open Web Steel Joists, Steel Girders	447
219. Metal Deck Floor on Steel Beams and Girders	450

WIND-BRACING ANALYSIS OF MULTISTORY BUILDINGS

220. Introduction	454
221. Basic Assumptions	454
222. Preliminary Computations	458

CONTENTS

xi

ARTICLE	PAGE
223. Wind Stress Analysis Based on Cantilever Action.....	459
224. Wind Stress Analysis Based on Portal Action.....	462
225. Bending Moments Produced by Wind and Gravity Loads.....	464
226. Wind Stress Analysis by the Moment Distribution Method.....	468
227. Wind Stress Analysis as Recommended by the American Society of Civil Engineers Sub-Committee Report of 1932.....	473
228. Wind Stress Analysis Based on the Spurr Method.....	479

WIND-BRACING CONNECTIONS

229. Wind-Bracing Systems.....	485
230. Shallow Wind-Bracing Connections.....	488
231. Bracket Wind-Bracing Connections.....	494
232. Columns.....	496
233. Column Splices.....	498
234. Column Base Slabs.....	499
235. Grillage Footings.....	500

CHAPTER XII

CONTINUOUS FRAMES AND SECONDARY STRESSES

CONTINUOUS FRAMES

240. Introduction.....	507
241. Slope-deflection Theory.....	507
242. The Moment-Distribution Theory.....	512
243. Temperature and Settlement Stresses.....	521

SECONDARY STRESSES

244. Introduction.....	526
245. Determination of Joint Displacements.....	526
246. Fixed-End Moments.....	529
247. Computations of Moments Causing Secondary Stresses.....	529
248. Carry-Over-Distribution Method.....	530
249. Influence Lines for Secondary Stresses.....	532
250. Secondary Stresses.....	533

APPENDIX A

SPECIFICATIONS FOR STEEL RAILWAY BRIDGES AMERICAN RAILWAY ENGINEERING ASSOCIATION 1935

PART I. DESIGN AND MANUFACTURE

Section A. Proposals and Drawings.....	535
1. General Features of Design.....	537
2. Loads and Stresses.....	539
3. Unit Stresses.....	544

CONTENTS

	PAGE
4. Details of Design.....	546
5. Workmanship	557
6. Full Size Tests of Eye-bars.....	563
7. Weighing and Shipping	564

APPENDIX B

STANDARD SPECIFICATIONS FOR HIGHWAY BRIDGES
AMERICAN ASSOCIATION OF STATE HIGHWAY OFFICIALS 1935

DIVISION V—DESIGN

Section 1. General Features of Design.....	567
2. Loads	573
3. Distribution of Loads.....	582
4. Unit Stresses.....	585
5. Substructures and Retaining Walls.....	587
6. Structural Steel Design.....	595
