CHAPTER I

INTRODUCTION

VIBRATING SYSTEMS. DEGREES OF FREEDOM.	1
QUESTIONS.	6

CHAPTER II

FUNDAMENTALS

SEC. II-1. KINEMATICS OF SIMPLE VIBRATORY MOTION	8
Vector Representation.	12
Beats	13
Example.	14
Problems	15
Questions	15
SEC. II-2. DIFFERENTIAL EQUATIONS OF SIMPLE VIBRATORY MOTION	16
Examples	26
Problems	27
Questions	28
SEC. II-3. UNITS.	28
Examples	30
Problems	30
Questions	31

CHAPTER III

UNDAMPED VIBRATIONS OF SYSTEMS OF ONE DEGREE OF FREEDOM

SEC. III-1. UNDAMPED FREE VIBRATIONS. NATURAL FREQUENCIES.	
EQUILIBRIUM METHOD.	32
Examples	37
Problems	38
Questions	41
SEC. III-2. ENERGY METHOD. RAYLEIGH METHOD	41
Examples	43
Rayleigh Method.	46

	Page
Problems	50
Questions	52
SEC. III-3. UNDAMPED FORCED VIBRATIONS.	52
Examples	57
Nonharmonic Periodic Shaking Force	58
Problems	60
Questions	61
SEC. III-4. SPRING MOUNTING OF MACHINES AND VEHICLES. VIBRA- TION-MEASURING INSTRUMENTS.	62
Constant-speed Machine on Variable Stiffness Mounting.	62
Variable-speed Machine on Constant Stiffness Mounting.	65
Rotating Machines	67
Vibration-measuring Instruments.	68
Spring Mounting of Vehicles.	71
Examples	73
Problems	74
Questions	75
SEC. III-5. CRITICAL SPEEDS OF SHAFTS. STATIC AND DYNAMIC BALANCING.	75
Static Balancing	80
Dynamic Balancing.	81
Examples	83
Problems	86
Questions	87

CHAPTER IV

DAMPED VIBRATIONS OF SYSTEMS OF ONE DEGREE OF
FREEDOM

SEC. IV-1. DAMPING.	88
Fluid Resistance	88
Dry-friction or Coulomb Damping	89
Hysteresis Damping or Solid Friction	89
Questions	91
SEC. IV-2. FREE VIBRATIONS WITH VISCOUS DAMPING	92
Examples	99
Problems	100
Questions	101
SEC. IV-3. FORCED VIBRATIONS WITH VISCOUS DAMPING	102
Vector Method.	106
Examples	109
Problems	112
Questions	113
SEC. IV-4. VIBRATION ISOLATION OF MACHINES AND VEHICLES. ACCELERATION-MEASURING INSTRUMENTS.	114
Constant-speed Machine on Variable Stiffness Mounting.	115
Variable-speed Machine on Constant Stiffness Mounting.	118
Vehicle Suspension	120

CONTENTS

ix

	PAGE
Acceleration-measuring Instruments	124
Examples	126
Problems	128
Questions	129
SEC. IV-5. WORK DONE BY A HARMONIC SHAKING FORCE AND ENERGY	
DISSIPATED BY DAMPING. EQUIVALENT VISCOUS DAMPING.	129
Examples	132
Problems	135
Questions	137

CHAPTER V

VIBRATIONS OF SYSTEMS WITH MORE THAN ONE DEGREE OF FREEDOM

SEC. V-1. MODES OF VIBRATION. STATIC AND DYNAMIC COUPLING	138
Free Vibrations.	138
Orthogonality of Natural Modes	141
Forced Vibrations.	141
Uncoupled Systems	144
Static Coupling.	145
Dynamic Coupling	146
Examples	148
Problems	152
Questions	153
SEC. V-2. ANALYSIS BY MEANS OF COMPLEX VARIABLES.	153
Examples	158
Complex Damping	161
Problems	163
Questions	163

CHAPTER VI

APPLICATIONS TO IMPORTANT PRACTICAL PROBLEMS

SEC. VI-1. TORSIONAL VIBRATION	164
Holzer's Method	165
Porter's Method	168
Examples	177
Problems	183
SEC. VI-2. UNCOUPLED BENDING VIBRATION OF BEAMS.	184
Beam with Free End	185
Simply Supported Beam.	194
Examples	199
Effective Inertia of Airplane Fuselage	199
Critical Speeds of Shafts with Large Disks.	200
Problems	210
Effective Mass of Airplane Fuselage.	210

	PAGE
SEC. VI-3. UNCOUPLED BENDING VIBRATION OF PROPELLERS, TURBINE BLADES, AND ROTATING WINGS	210
Effective Inertia of Propeller.	214
Example.	214
SEC. VI-4. COUPLED BENDING-TORSION VIBRATION OF BEAMS	215
Beam with Free End	216
Simply Supported Beam.	228
Examples	233
SEC. VI-5. COUPLED BENDING-TORSION VIBRATION OF PROPELLERS, TURBINE BLADES, AND ROTATING WINGS	239
Effective Inertia of Propeller.	242
Example.	243
SEC. VI-6. TWO-DIMENSIONAL WING FLUTTER ANALYSIS	246
Examples	255
SEC. VI-7. THREE-DIMENSIONAL WING FLUTTER ANALYSIS	259
Examples	265
Wing-aileron Flutter	269
Forced Vibration of Airplane Wing	273
SEC. VI-8. FLUTTER OF PROPELLER BLADES AND ROTATING WINGS	278
Example.	280

APPENDIX A

TABLE OF THE FUNCTION $T(\beta) = \frac{\tan \beta}{\beta}$	286
---	-----

APPENDIX B

CURVES FOR THE AERODYNAMIC COEFFICIENTS OF WING FLUTTER	288
---	-----

APPENDIX C

EQUATIONS FOR WING-AILERON FLUTTER.	296
Table of R Functions	300
INDEX.	301
