1	Introduction to Plate and Shell Structures	1
1.1	Introduction	1
	References	5
2	Tensor Analysis	7
2.1	Introduction	7
2.2	Basic Definitions	8
2.3	Coordinate Transformation	11
2.4	Euclidean Metric Tensor	12
2.5	Different Types of Tensors	13
2.6	Some Special Tensors	15
2.7	Tensors in Cartesian Coordinates	17
2.8	Contraction	18
2.9	Partial Derivatives	18
2.10	Christoffel Symbol	20
2.11	Covariant Derivative	22
2.12	Some Important Tensor Equations	24
2.13	Base Vectors in Curvilinear Coordinates	25
2.14	Physical Components of Vectors and Tensors	33
2.15	Theory of Surfaces	35
2.16	Fundamental Quadratic Forms of Surfaces, Codazzi Equations	37
2.17	Problems	42
	References	42
3	Thermal Stresses in Plates	43
3.1	Introduction	43
3.2	Classical First-Order Plate Theory	44
3.3	Boundary Conditions	52
3.4	Circular Plates	54
3.5	Navier Solution for Rectangular Plates	56
3.6	Levy's Solution for Rectangular Plates	58

3.7	General Solution for Rectangular Plates	60
3.8	Circular Plate with Radial Temperature	66
3.9	Composite Rectangular Plates	67
3.10	Effect of Shear Deformation	75
3.11	Dynamic Analysis of FGM Plates	81
3.12	Rectangular FGM Plates Under Thermal Shock	101
3.12.1	Temperature Profile	110
3.13	Active Piezothermoelastic Analysis of Composite Plates	122
3.13.1	First-Order Shear Deformation Theory	124
3.13.2	Sensor and Actuator Equations	129
3.13.3	Finite Element Formulation	131
	References	139
4	Theory of Shells	145
4.1	Introduction	145
4.2	Shell Geometry	147
4.3	Shells of Revolution	157
4.4	Analysis of Strain	162
4.5	Stress–Strain Relations	173
4.6	Stress Resultants	175
4.7	Equations of Motion of Shells	182
4.8	Comparison of Different Theories	192
4.9	Problems	195
	References	196
5	Thermal Stresses in Shells	197
5.1	Introduction	197
5.2	Symmetrically Loaded Cylindrical Shells	197
5.3	Axially Loaded and Heated Cylindrical Shells	202
5.4	Thermal Stresses in Cylindrical Shells	205
5.4.1	Derivation of the Equilibrium Equations	206
5.4.2	Summary	212
5.4.3	Results and Discussion	215
5.5	Cylindrical Shells of Gas Turbine Combustor	216
5.5.1	Theoretical Formulation	216
5.6	Simply Supported Cylindrical Panel	222
5.7	Symmetrically Loaded Spherical Shells	228
5.8	Axisymmetric Thermal Stresses	234
5.9	Thermal Stresses in Spherical Domes	237
5.10	General Temperature Distribution Along Meridian	239
5.11	Membrane Analysis of Spherical Shells	242
5.12	Spherical Shells with Circular Holes	247
5.12.1	Numerical Examples	251
5.13	Thermal Stresses in Conical Shells	253
5.13.1	Conical Shell Formulae	254
5.13.2	Equilibrium Equations of Conical Shell	258

5.14	Rotating Conical Shell	263
	References	269
6	Coupled Thermoelasticity of Plates	271
6.1	Introduction	271
6.2	Rectangular FGM Plates, TSDT	273
6.2.1	Equations of Motion	274
6.2.2	Energy Equation	278
6.2.3	Laplace Transform	281
6.2.4	Results and Discussion	284
6.3	Coupled Thermoelasticity of FGM Annular Plate	296
6.3.1	Governing Equations	298
6.3.2	Equations of Motion	299
6.3.3	Energy Equation	303
6.3.4	Results and Discussion	313
	References	327
7	Couple Thermoelasticity of Shells	329
7.1	Introduction	329
7.2	Coupled Thermoelasticity of Cylindrical Shells	330
7.2.1	Analysis	332
7.2.2	Strain–Displacement Relations	334
7.2.3	Equations of Motion	335
7.2.4	Energy Equation	337
7.2.5	Numerical Solution	338
7.2.6	Results and Discussion	341
7.2.7	Parametric Studies	343
7.3	Cylindrical Shell; Effect of Normal Stress	354
7.4	Composite Cylindrical Shells	361
7.4.1	Energy Equation	364
7.4.2	Finite Element Solution	366
7.4.3	Discussion and Results	367
7.5	Coupled Thermoelasticity of Spherical Shells	378
7.5.1	Energy Equations	380
7.5.2	Solution Procedure	382
7.5.3	Results and Discussions	384
7.6	Composite Spherical Shells	389
7.6.1	Energy Equation	392
7.7	Coupled Thermoelasticity of Conical Shells	398
7.7.1	Strain–Displacement Relations	399
7.7.2	Stress–Strain Relations	401
7.7.3	Equations of Motion	401
7.7.4	Energy Equation	403
7.7.5	Numerical Solution	404
7.7.6	Results and Discussion	406

7.8	Thermoelasticity of Shells of Revolution	411
7.8.1	Coupled Problems	416
7.8.2	Cylindrical Shells	419
7.8.3	Spherical Shells	427
7.9	Stability of Cylindrical Shells, Coupled Thermoelastic Assumption	431
7.9.1	Analysis	433
7.9.2	Equations of Motion and Boundary Conditions	435
7.9.3	Energy Equation	437
7.9.4	Finite Element Modeling	439
7.9.5	Numerical Method	442
7.9.6	Results and Discussion	444
	References	449
8	Thermal Induced Vibrations	453
8.1	Introduction	453
8.2	FGM Rectangular Plates	455
8.2.1	Governing Equations	456
8.2.2	Temperature Profile	462
8.2.3	Results and Discussion	463
8.3	FGM Conical Shells	473
8.3.1	Fundamental Equations of the FG Conical Shell	474
8.3.2	Kinematic Assumptions	475
8.3.3	Stress Resultants	476
8.3.4	Equations of Motion	478
8.3.5	Temperature Profile	481
8.3.6	Results and Discussion	482
8.3.7	Comparison Study	483
8.3.8	Parametric Studies	484
8.4	Spherical Shells	494
8.4.1	Governing Equations	496
8.4.2	HDQ Discretization	500
8.4.3	Solution Procedure	503
8.4.4	Temperature Profile	504
8.4.5	Results and Discussion	506
8.4.6	Comparison Study	506
8.4.7	Parametric Studies	508
	References	516
