

Contents

1	Introduction	1
1.1	Description of Material Behaviour via Continuum Mechanics	1
1.2	Terminology and Notation	2
1.3	Understanding Some Basic Concepts	3
2	Kinematics	5
2.1	Lagrangian and Eulerian Approaches	5
2.1.1	Reference Versus Current Configuration.	
	Deformation Gradient	5
2.1.2	Material and Spatial Description of Property	7
2.1.3	Examples and Problems	9
2.2	Lagrangian and Eulerian Displacement Gradient	11
2.2.1	Examples and Problems	15
2.3	Strain Tensor	18
2.3.1	Examples and Problems	21
2.4	Polar Decomposition Theorem	24
2.4.1	Examples and Problems	26
2.5	Principal Strains and Directions	28
2.5.1	Examples and Problems	30
2.6	Distortion and Dilatation	34
2.6.1	Examples and Problems	34
2.7	Deformation Velocity Tensor	36
2.7.1	Examples and Problems	38
2.8	Condition of Compatibility	40
2.8.1	Examples and Problems	42
2.9	Deformation Gradient of a Discretized Body	43
2.9.1	Examples and Problems	45

3	Stress	51
3.1	Force and Stress	51
3.2	Cauchy Stress Tensor	52
3.2.1	Examples and Problems	54
3.3	Principal Values and Directions	56
3.3.1	Examples and Problems	57
3.4	First and Second Piola–Kirchhoff Stress Tensor	63
3.4.1	Examples and Problems	65
3.5	State of Stress in a Damaged Continuum	67
3.5.1	Examples and Problems	73
4	Constitutive Relations	75
4.1	Elastic Materials	76
4.1.1	Elasticity Tensor	78
4.1.2	Elastic Potential	78
4.1.3	Linear Isotropic Elastic Material	79
4.1.4	Linear Orthotropic Elastic Material	80
4.1.5	Examples and Problems	82
4.2	Hyperelasticity	83
4.2.1	Mooney–Rivlin Materials	86
4.2.2	Ogden Materials	87
4.2.3	Superelastic Materials—Thamburaja and Nikabdullah Model	89
4.2.4	Examples and Problems	91
5	Balance Principles in Continuum Mechanics	99
5.1	General Mechanical Balance Equation	99
5.1.1	Balance Equation for Mass Transfer	100
5.1.2	Balance Equation for Linear Momentum	101
5.1.3	Balance Equation for Angular Momentum	102
5.1.4	Examples and Problems	103
6	Solutions to the Problems	105
6.1	Section 2.1	105
6.2	Section 2.2	109
6.3	Section 2.3	114
6.4	Section 2.4	120
6.5	Section 2.5	124
6.6	Section 2.6	130
6.7	Section 2.7	132
6.8	Section 2.8	134
6.9	Section 2.9	136
6.10	Section 3.2	140
6.11	Section 3.3	143
6.12	Section 3.4	152
6.13	Section 3.5	158

Contents	xi
6.14 Section 4.1	160
6.15 Section 4.2	161
6.16 Section 5.1	170
