## I MATLAB Programming

|       |                                                                          |    |
|-------|--------------------------------------------------------------------------|----|
| 1     | <b>Introduction to MATLAB</b> .....                                      | 3  |
| 1.1   | <b>Demonstrations on Scientific Computing</b> .....                      | 4  |
| 1.1.1 | Solutions of Scientific Computing Problems .....                         | 4  |
| 1.1.2 | Limitations of Regular Computer Languages.....                           | 6  |
| 1.2   | <b>Introduction to MATLAB Language</b> .....                             | 8  |
| 1.2.1 | A Brief History of MATLAB.....                                           | 8  |
| 1.2.2 | Advantages of MATLAB.....                                                | 9  |
| 1.3   | <b>Three-Step Solution Method in Scientific Computing Problems</b> ..... | 10 |
| 1.4   | <b>Outlines of the Book</b> .....                                        | 12 |
| 1.5   | <b>Exercises</b> .....                                                   | 13 |
| 1.6   | <b>Mini-Projects</b> .....                                               | 15 |
|       | References.....                                                          | 16 |
| 2     | <b>Essentials in MATLAB Programming</b> .....                            | 17 |
| 2.1   | <b>Simple Manipulations of MATLAB</b> .....                              | 19 |
| 2.1.1 | Main Interface of MATLAB .....                                           | 19 |
| 2.1.2 | Working Folder of MATLAB .....                                           | 21 |
| 2.1.3 | Online Help in MATLAB.....                                               | 21 |
| 2.1.4 | Display Format in MATLAB.....                                            | 22 |
| 2.1.5 | Workspace and Management in MATLAB.....                                  | 23 |
| 2.1.6 | Other Facilities in MATLAB.....                                          | 24 |
| 2.2   | <b>Data Types in MATLAB</b> .....                                        | 25 |
| 2.2.1 | Reserved Constants .....                                                 | 25 |
| 2.2.2 | Variable Names and Naming Regulations .....                              | 26 |
| 2.2.3 | Double Precision Data Type.....                                          | 27 |
| 2.2.4 | Symbolic Data Type and Symbolic Functions.....                           | 28 |
| 2.2.5 | Generating Arbitrary Symbolic Matrices .....                             | 30 |
| 2.2.6 | Other Data Types.....                                                    | 31 |
| 2.2.7 | Data Types Recognition .....                                             | 32 |
| 2.3   | <b>MATLAB Statement Structures</b> .....                                 | 32 |
| 2.3.1 | Fundamental Assignment Statements.....                                   | 32 |
| 2.3.2 | Function Calls.....                                                      | 33 |
| 2.3.3 | Colon Expressions.....                                                   | 33 |
| 2.3.4 | Submatrix Extraction .....                                               | 34 |
| 2.3.5 | Man–Machine Interactive Functions in MATLAB.....                         | 35 |
| 2.4   | <b>Fundamental MATLAB Operations</b> .....                               | 35 |
| 2.4.1 | Arithmetic Operations.....                                               | 36 |
| 2.4.2 | Transcendental Functions .....                                           | 39 |
| 2.4.3 | Logical Operations .....                                                 | 42 |
| 2.4.4 | Relational Operations .....                                              | 42 |

|       |                                                         |    |
|-------|---------------------------------------------------------|----|
| 2.4.5 | String Manipulations .....                              | 42 |
| 2.4.6 | Processing Symbolic Expressions.....                    | 45 |
| 2.5   | <b>File Processing in MATLAB</b> .....                  | 47 |
| 2.5.1 | Assessing MATLAB Workspace Variables.....               | 47 |
| 2.5.2 | File Read and Write Functions.....                      | 48 |
| 2.5.3 | Assessing Microsoft Excel Files .....                   | 49 |
| 2.6   | <b>Exercises</b> .....                                  | 50 |
| 2.7   | <b>Mini-Projects</b> .....                              | 51 |
|       | Reference.....                                          | 52 |
| 3     | <b>MATLAB Flow Control Structures</b> .....             | 53 |
| 3.1   | <b>Loop Structures</b> .....                            | 54 |
| 3.1.1 | For Loop Structure .....                                | 54 |
| 3.1.2 | While Loop Structures.....                              | 57 |
| 3.1.3 | Nesting Loop Structures .....                           | 58 |
| 3.1.4 | Vectorized Programming and loops .....                  | 59 |
| 3.2   | <b>Conditional Structures</b> .....                     | 61 |
| 3.2.1 | Simple Conditional Structures .....                     | 61 |
| 3.2.2 | Ordinary Form of Conditional Structures.....            | 62 |
| 3.2.3 | Other Flow Control Commands .....                       | 62 |
| 3.2.4 | Vectorized Computing of Piecewise Functions .....       | 63 |
| 3.3   | <b>Switch Structures</b> .....                          | 64 |
| 3.4   | <b>Trial Structures</b> .....                           | 66 |
| 3.5   | <b>Exercises</b> .....                                  | 67 |
| 3.6   | <b>Mini-Projects</b> .....                              | 70 |
|       | References.....                                         | 71 |
| 4     | <b>MATLAB Functions Programming</b> .....               | 73 |
| 4.1   | <b>MATLAB Script Files</b> .....                        | 74 |
| 4.1.1 | MATLAB Editor .....                                     | 74 |
| 4.1.2 | MATLAB Live Editor .....                                | 75 |
| 4.2   | <b>Fundamental Structures of MATLAB Functions</b> ..... | 77 |
| 4.2.1 | Why MATLAB Functions? .....                             | 78 |
| 4.2.2 | MATLAB Function Structures.....                         | 78 |
| 4.2.3 | Naming Regulations of MATLAB Functions.....             | 79 |
| 4.2.4 | Numbers of Input and Output Arguments .....             | 80 |
| 4.2.5 | Input Arguments Validation.....                         | 81 |
| 4.2.6 | Recursive Structures.....                               | 83 |
| 4.2.7 | Anonymous Functions.....                                | 85 |
| 4.3   | <b>Variable Transfers in Functions</b> .....            | 87 |
| 4.3.1 | Extractions of Arguments.....                           | 87 |
| 4.3.2 | Local and Global Variables.....                         | 89 |
| 4.3.3 | Accessing MATLAB Workspace Variables.....               | 90 |
| 4.4   | <b>Debugging in MATLAB Functions</b> .....              | 90 |
| 4.4.1 | MATLAB Function Debugging.....                          | 91 |
| 4.4.2 | Pseudocode Technique.....                               | 92 |
| 4.5   | <b>Exercises</b> .....                                  | 93 |
| 4.6   | <b>Mini-Projects</b> .....                              | 96 |
|       | Reference.....                                          | 97 |

|       |                                                          |     |
|-------|----------------------------------------------------------|-----|
| 5     | <b>MATLAB Graphics</b>                                   | 99  |
| 5.1   | <b>Simple Two-Dimensional Plots</b>                      | 101 |
| 5.1.1 | Data-based Plotting                                      | 101 |
| 5.1.2 | Function Expression-based Plotting                       | 105 |
| 5.1.3 | Plots of Parametric Equations                            | 107 |
| 5.1.4 | Plots with Two y Axes                                    | 109 |
| 5.1.5 | Graph Decorations and Editing                            | 109 |
| 5.1.6 | Extracting Data from Plots                               | 111 |
| 5.2   | <b>Special Two-Dimensional Plots</b>                     | 111 |
| 5.2.1 | Polar Plots                                              | 112 |
| 5.2.2 | Representation of Discrete Signals                       | 114 |
| 5.2.3 | Statistical Plots                                        | 115 |
| 5.2.4 | Filled Plots                                             | 117 |
| 5.2.5 | Logarithmic Plots                                        | 118 |
| 5.2.6 | Dynamic Trajectory and Animation                         | 120 |
| 5.2.7 | Graphics Window Divisions                                | 121 |
| 5.3   | <b>Three-Dimensional Plots in MATLAB</b>                 | 121 |
| 5.3.1 | Three-Dimensional Curves                                 | 122 |
| 5.3.2 | Three-Dimensional Parametric Equation Curves             | 123 |
| 5.3.3 | Three-Dimensional Surfaces                               | 123 |
| 5.3.4 | Viewpoint Setting                                        | 125 |
| 5.3.5 | Surface of Parametric Equations with Two Parameters      | 126 |
| 5.3.6 | Three-Dimensional Animation                              | 127 |
| 5.4   | <b>Implicit Function Plotting</b>                        | 128 |
| 5.4.1 | Two-Dimensional Implicit Function Curves                 | 129 |
| 5.4.2 | Three-Dimensional Implicit Function Surfaces             | 131 |
| 5.5   | <b>Exercises</b>                                         | 132 |
| 5.6   | <b>Mini-Projects</b>                                     | 135 |
|       | References                                               | 136 |
| 6     | <b>Object-Oriented Programming</b>                       | 137 |
| 6.1   | <b>Essential Concepts in Object-Oriented Programming</b> | 138 |
| 6.2   | <b>Classes and Objects Design</b>                        | 139 |
| 6.2.1 | Class Data Structure                                     | 139 |
| 6.2.2 | Input and Display of Classes                             | 140 |
| 6.2.3 | Overload Functions for Addition and Subtraction          | 142 |
| 6.2.4 | Overload Function of Multiplication                      | 144 |
| 6.2.5 | Overload Function of Power Operations                    | 146 |
| 6.2.6 | Overload Function for Like-Term Collection               | 147 |
| 6.3   | <b>Interface Design of Apps</b>                          | 147 |
| 6.3.1 | User Interface Objects                                   | 148 |
| 6.3.2 | Simple Dialog Boxes                                      | 148 |
| 6.3.3 | Programming and Applications of Standard Dialog Boxes    | 149 |
| 6.3.4 | App Designer Programming                                 | 151 |
| 6.4   | <b>Exercises</b>                                         | 156 |
| 6.5   | <b>Mini-Projects</b>                                     | 156 |
|       | References                                               | 157 |

## II Scientific Computing

|       |                                                       |     |
|-------|-------------------------------------------------------|-----|
| 7     | <b>Calculus and Integral Transforms</b>               | 161 |
| 7.1   | <b>Analytical Solution of Calculus Problems</b>       | 162 |
| 7.1.1 | Limit of Univariate Functions                         | 163 |
| 7.1.2 | Limits of Multivariate Functions                      | 168 |
| 7.1.3 | Derivatives                                           | 170 |
| 7.1.4 | Integrals                                             | 177 |
| 7.2   | <b>Series Approximation of Functions</b>              | 181 |
| 7.2.1 | Taylor Series                                         | 181 |
| 7.2.2 | Fourier Series                                        | 184 |
| 7.2.3 | Series Sums                                           | 185 |
| 7.2.4 | Product of Sequences                                  | 188 |
| 7.2.5 | Convergence of Infinite Series                        | 190 |
| 7.3   | <b>Numerical Calculus Solutions</b>                   | 191 |
| 7.3.1 | Numerical Differentiation                             | 192 |
| 7.3.2 | Numerical Integrals                                   | 193 |
| 7.4   | <b>Introduction to Integral Transforms</b>            | 200 |
| 7.4.1 | Laplace Transform                                     | 200 |
| 7.4.2 | Numerical Laplace Transform                           | 202 |
| 7.4.3 | Fourier Transform                                     | 204 |
| 7.4.4 | z Transform                                           | 205 |
| 7.5   | <b>Exercises</b>                                      | 206 |
| 7.6   | <b>Mini-Projects</b>                                  | 213 |
