Introduction	7
Chapter 1. Basic concepts	9
1.1. Statistics – definition and outline	9
1.2. Statistical population, statistical characteristics, and measurement scales	10
1.3. Statistical regularities	13
1.4. Forms of characteristics presentation	16
1.4.1. Statistical series	17
1.4.2. Statistical tables	25
1.4.3. Statistical figures	27
1.5. Statistical study	43
1.6. Statistical indicators	46
Chapter 2. Structure analysis	50
2.1. Building an interval series and a histogram	50
2.2. Measures of central tendency	62
2.2.1. Arithmetic mean	63
2.2.2. Harmonic mean	69
2.2.3. Geometric mean	73
2.2.4. Mode	75
2.2.5. Median	82
2.2.6. Quantiles	85
2.3. Measures of variability	93
2.3.1. Variance and standard deviation	96
2.3.2. Mean absolute deviation	106
2.3.3. Quarterly variation	107
2.3.4. Areas of variation	109
2.3.5. Coefficients of variation	111
2.4. Measures of asymmetry	113
2.5. Measures of kurtosis and concentration	122
2.5.1. Measures of kurtosis	122
2.5.2. Measures of concentration	126
2.6. Comparison and comprehensive analysis of structures	134

Chapter 3. Interdependence analysis	138
3.1. Correlation series and table	138
3.1.1. Correlation series	138
3.1.2. Correlation table	141
3.2. Measures of the strength of statistical interdependence	147
3.2.1. Tschuprow's coefficient	147
3.2.2. Spearman's rank correlation coefficient	150
3.2.3. Pearson's linear correlation coefficient	152
3.2.4. Correlation ratios	157
3.3. Linear regression	161
 Chapter 4. Dynamics analysis	169
4.1. Short-term change study	170
4.1.1. Increments and individual indices	170
4.1.2. Aggregate indices (for absolute values)	177
4.2. Long-term change study	182
4.2.1. Trend-setting methods	183
4.2.2. Seasonality testing methods	193
4.2.3. Forecasting	201
 Annex	205
Literature	209
Abstract	213
Streszczenie	214
