Preface.....ix
Acknowledgments.....xi
Editor Biographies xiii
Contributors xv

Chapter 1 State of the Art on Hybrid Nanofluids and Their Usage in
Machining Processes..... 1
Mustafa Kuntoglu

Chapter 2 Machining Performance of Inconel 718 under Nano-MQL
Strategy Using PVD TiAlN/TiN-Coated Cutter..... 31
*Ragavanantham Shanmugam, Monsuru Ramoni,
Nimel Sworna Ross, and M. Ganesh*

Chapter 3 Applications of Nanofluids in Minimum Quantity Lubrication
Machining: A Review 53
Abdullah Aslan and Emin Salur

Chapter 4 Nanomaterials in the Manufacturing of Structural Components..... 85
Bharat Bajaj

Chapter 5 Impact of Nanoparticles on the Tribological Behavior
of Cutting Fluids in Machining: A Review 105
Mehmet Erdi Korkmaz

Chapter 6 Investigating the Effect of Magnetic Nanoparticles in
Magneto-Rheological (MR) Fluid for Monotube
Damper Testing 125
*Jonny Singla, Anuj Bansal, Anil Kumar Singla,
and Deepak Kumar Goyal*

Chapter 7 Carbonaceous TiO₂-Nanocomposites for Treatment of
Dye-Laden Wastewater in Textile Industries 141
Priti Bansal and Paramjeet Kaur

Chapter 8	Approaches for Nanomaterial Lab Scale Synthesis and Manufacturing	163
	<i>Nidhi Sharotri and Deepali Sharma</i>	
Chapter 9	Synthesis and Applications of Metal-Based Nanomaterials	189
	<i>V. Bhuvaneswari</i>	
Chapter 10	Nanomaterial Characterization Techniques	219
	<i>Rajeev Bagoria and Mahender Kumar</i>	
Chapter 11	Recycling of Traditional Plastics: PP, PS, PVC, PET, HDPE, and LDPE, and Their Blends and Composites	235
	<i>Narinder Singh and Recep Demirsöz</i>	
Chapter 12	Graphene Oxide and Its Nanocomposite for Wastewater Treatment.....	259
	<i>Arshpreet Kaur, Harshita Bagdwal, Gagandeep Kaur, and Dhiraj Sud</i>	
Index		287
