

CONTENTS

Static behaviour of functionally graded plates resting on elastic foundations using neutral surface concept – Van-Loi Nguyen, Minh-Tu Tran, Van-Long Nguyen, Quang-Huy Le.....	5
Hybrid GRA-PCA and modified weighted TOPSIS coupled with Taguchi for multi-response process parameter optimization in turning AISI 1040 steel – Mst. Nazma Sultana, Nikhil Ranjan Dhar.....	23
Simulation of loading and wear rate distribution on cutting edges during gears hobbing – Ihor Hrytsay, Vadym Stupnytskyy, Vladyslav Topchii.....	51
Investigations on pool boiling of refrigerant R141b outside a horizontal tube – Touhami Baki, Abdelkader Aris, Mohamed Tebbal.....	77
Vibration and stability analyses of functionally graded beams – Burak Kılıç, Özge Özdemir.....	93

2021 DCz. 235

CONTENTS

Slow flow past a weakly permeable spheroidal particle in a hypothetical cell – Tina Bucha, Madasu Krishna Prasad	119
Effect of surface roughness on steady performance of hydrostatic thrust bearings: Rabinowitsch fluids – Udaya P. Singh	147
Combination of feedback control and spring-damper to reduce the vibration of crane payload – Trong Kien Nguyen	165
Effort of the protective structure of the shelter under the influence of an external fire – Adam Barylka	183
Evaluation of thermal performance factor for solar air heaters with artificially roughened channels – Waseem Siddique, Aneeq Raheem, Muhammad Aqeel, Sualeh Qayyum, Tareq Salameh, Khalid Waheed, Kamran Qureshi	195
Comprehensive analysis of tribological factor influence on stress-strain and thermal state of workpiece during titanium alloys machining – Vadym Stupnytskyy, She Xianning	227

CONTENTS

Characterization of geometrical parameters of plastic bottle shredder blade utilizing a two-step optimization method – Trieu Khoa Nguyen, Minh Quang Chau, The-Can Do, Anh-Duc Pham	253
Optimizing the weight of the two-level gear train in the personal rescue winch – Truong Giang Duong, Van Tinh Nguyen, Tien Dung Nguyen	271
Application of comparative design study in the development of preservation encasements for historical documents – Alejandro C. Ramirez-Reivich, Ma. Pilar Corona-Lira, Diego A. Zamora-Garcia, Anahí Velazquez-Silva, Vicente Borja	287
Resonance phenomenon in the single stage cycloidal gearbox. Analysis of vibrations at the output shaft as a function of the external sleeves stiffness – Roman Król	303
Effect of part build orientations and sliding wear factors on tribological characteristics of FDM processed parts – Turki Alamro, Mohammed Yunus, Rami Alfattani, Ibrahim A. Alnaser	321
Investigation of particle size distribution of grinded amber by electropulse discharges in a liquid medium – Valentyn Chorny, Yevgen Kharchenko, Taras Mysiura, Nataliia Popova, Volodymyr Zavialov	337
