

Table of Contents

Problems and Examples in Vibration Theory..... 1

1 Vibrations of Systems with a Single Degree of Freedom..... 3

 1.1 Free Vibrations 3

 1.2 Free Vibrations of Systems with Allowance for Resistance Forces..... 14

 1.3 Forced Vibrations..... 19

 1.4 Critical States and Vibration Stability..... 36

 1.5 Parametric Vibrations..... 43

 1.6 Nonlinear Vibrations..... 49

2 Vibrations of Systems with Several Degrees of Freedom..... 57

 2.1 Free Vibrations..... 57

 2.2 Forced Vibrations..... 72

 2.3 Critical States and Vibration Stability... 81

 2.4 Approximate Methods of Determining the Lowest Frequency..... 88

 2.5 Random Vibrations..... 91

Answers and Solutions..... 101

1 Vibrations of Systems with a Single Degree of Freedom..... 103

 1.1 Free Vibrations..... 103

 1.2 Free Vibrations of Systems with Allowance for Resistance Forces..... 126

 1.3 Forced Vibrations..... 136

 1.4 Critical States and Vibration Stability..... 162

 1.5 Parametric Vibrations..... 177

 1.6 Nonlinear Vibrations..... 188

2 Vibrations of Systems with Several Degrees of Freedom..... 209

 2.1 Free Vibrations..... 209

 2.2 Forced Vibrations..... 248

 2.3 Critical States and Vibration Stability..... 267

 2.4 Approximate Methods of Determining the Lowest Frequency..... 287

 2.5 Random Vibrations..... 291
