

CONTENTS

FOREWORD	7
1 Scope and object.....	11
2 Normative references	13
3 Specifications	15
3.1 Dimensional requirements	15
3.2 Mechanical requirements.....	17
3.3 Transmission requirements	21
3.4 Environmental requirements.....	23
Annex A (normative) Family specifications for A4a multimode fibres	27
Annex B (normative) Family specifications for A4b multimode fibres	31
Annex C (normative) Family specifications for A4c multimode fibres	35
Annex D (normative) Family specifications for A4d multimode fibres	39
Annex E (normative) Family specifications for A4e multimode fibres	43
Annex F (normative) Family specifications for A4f multimode fibres	47
Annex G (normative) Family specifications for A4g multimode fibres.....	51
Annex H (normative) Family specifications for A4h multimode fibres.....	55
Annex I (normative) Mode Scramblers for A4a to A4d Fibres (based on IEC 794-1-1, 1999).....	59
Annex J (informative) Typical characteristics and requirements for some buffered A4 fibres	61
Figure 1– Tensile load versus elongation for a plastic optical fibre.....	19
Figure I.1 – Mode scrambler for A4 fibre	59
Table 1 – Characteristics and applications of category A4 fibres.....	11
Table 2 – Dimensional attributes and measurement methods.....	15
Table 3 – Requirements common to all category A4 fibres	15
Table 4 – Additional attributes required in A4a through A4e family specifications	15
Table 5 – Additional attributes required in A4f through A4h family specifications.....	17
Table 6 – Mechanical attributes and test methods.....	17
Table 7 – Requirements common to category A4 fibres.....	17
Table 8 – Additional attributes required in family specification for categories A4a through A4e fibres	17
Table 9 – Additional attributes required in family specification for categories A4f through A4h fibres	17
Table 10 – Transmission attributes and measurement methods	21

Table 11 – Attributes required in family specifications	21
Table 12 – Environmental exposure tests.....	23
Table 13 – Attributes measured	23
Table 14 – Requirement for tensile strength.....	25
Table 15 – Requirement for change in attenuation for A4a through A4e fibre	25
Table 16 – Requirement for change in attenuation for A4f through A4h fibre	25
Table A.1 – Dimensional requirements specific to A4a fibres	27
Table A.2 – Mechanical requirements specific to A4a fibres.....	27
Table A.3 – Transmission requirements specific to A4a fibres.....	29
Table B.1 – Dimensional requirements specific to A4b fibres	31
Table B.2 – Mechanical requirements specific to A4b fibres.....	31
Table B.3 – Transmission requirements specific to A4b fibres.....	33
Table C.1 – Dimensional requirements specific to A4c fibres	35
Table C.2 – Mechanical requirements specific to A4c fibres.....	35
Table C.3 – Transmission requirements specific to A4c fibres.....	37
Table D.1 – Dimensional requirements specific to A4d fibres	39
Table D.2 – Mechanical requirements specific to A4d fibres.....	39
Table D.3 – Transmission requirements specific to A4d fibres	41
Table E.1 – Dimensional requirements specific to A4e fibres	43
Table E.2 – Mechanical requirements specific to A4e fibres.....	43
Table E.3 – Transmission requirements specific to A4e fibres.....	45
Table F.1 – Dimensional requirements specific to A4f fibres	47
Table F.2 – Mechanical requirements specific to A4f fibres	47
Table F.3 – Transmission requirements specific to A4f fibres.....	49
Table G.1 – Dimensional requirements specific to A4g fibres	51
Table G.2 – Mechanical requirements specific to A4g fibres	51
Table G.3 – Transmission requirements specific to A4g fibres	53
Table H.1 – Dimensional requirements specific to A4h fibres	55
Table H.2 – Mechanical requirements specific to A4h fibres.....	55
Table H.3 – Transmission requirements specific to A4h fibres	57
Table I.1 – Mode scramble parameters	59
Table J.1 – Dimensional attributes	61
Table J.2 – Mechanical attributes.....	61
